M. A. Hospital Administration

Syllabus

AFFILIATED COLLEGES

Program Code: ***

2021 - 2022 onwards

BHARATHIAR UNIVERSITY

(A State University, Accredited with "A" Grade by NAAC, Ranked 13th among Indian Universities by MHRD-NIRF, World Ranking: Times - 801-1000, Shanghai - 901-1000, URAP - 1047)

Coimbatore - 641 046, Tamil Nadu, India

Program	Educational Objectives (PEOs)						
The M.A	The M.A.(Hospital Administration) program describes that graduates are expected to attain						
within fiv	within five to seven years after graduation						
PEO1	To learn efficient methods of Hospital Administration						
PEO2	To understand the concepts of management relevant to modern hospitals						
PEO3	To prepare and train qualified and efficient administrators to manage hospitals						
PEO4	To apply the principles of management when provided Quality patient Care in selected areas of Clinical Specialty in the Hospital and Community						
PEO5	To achieve desired knowledge, skills and attitude in the field of hospital administration and enhance culture of professionalism in their approach.						
PEO6	To improve the ability of hospital based professionals in ethical decision making and implementation in key result areas of Hospital Administration.						
PEO7	To build skills in the use of managerial tools of planning, organising, and achieve optimal resource utilisation in hospital settings.						

Program	Program Specific Outcomes (PSOs)					
After the	successful completion of M.A.(Hospital Administration) program, the students are					
expected	to obtain					
PSO1	Punitive Knowledge: Capable of demonstrating comprehensive knowledge and					
F301	understanding of healthcare administration.					
PSO2	Communicational Skills: Ability to read and write analytically, and present					
F3O2	healthcare practices information in a clear and concise manner.					
	Critical Thinking: Ability to critically evaluate healthcare administrative					
PSO3	practices, policies and theories by following scientific approach to knowledge					
	development.					
PSO4	Problem Solving: Ability to apply healthcare administration concepts with real-					
F3O4	life situations for wellbeing of the society.					
PSO5	Humanistic and Relationship Approach: Ability to emphatically understand					
healthcare administration and provide patient care with resilience.						
PSO6	Professionalism : Ability to conscientiously and innovatively show leadership					
1300	skills to meet healthcare administration needs of India.					

Progran	n Outcomes (POs)				
	On successful completion of the M.A.(Hospital Administration) program the students are				
able					
PO1	To understand the major concepts in the functional areas of human resource,				
101	marketing and finance in hospital management.				
PO2	To comprehend the major perceptions in the functional areas of information				
102	technology and management in relation to hospitals.				
PO3	To build skills in the use of managerial tools of planning and organising in				
103	hospital management.				
PO4	To demonstrate Problem Solving Skills and achieve optimal resource utilisation				
104	in hospital settings.				
PO5	To utilize the oral and written communication skills to meet the needs of divergent				
103	audience.				
PO6	To develop teamwork, organizational skills, supervision and work group units to				
100	meet diverse stakeholders in different healthcare environments.				
PO7	To inculcate techniques of coaching for effective lead in hospital organization.				
PO8	To generate innovative solutions for strategic, tactical and operational issues in				
100	managing healthcare systems.				
	To develop associated information technology through the combined use of				
PO9	information, data analytics, organizational knowledge, talent management and				
	critical and design thinking.				
PO10	To build abilities to face the practical issues in hospital management.				

BHARATHIAR UNIVERSITY: COIMBATORE 641 046 M.A.(Hospital Administration) (CBCS Pattern) (Affiliated Colleges)

(For the students admitted during the academic year 2021 – 22 onwards)

FOR PROGRAMME COMPLETION Students have to complete the following subject: oblige

- 1. All the Core papers in I, II, III and IV semester.
- 2. All the Supportive papers in I, II and III semester.
- 3. One Elective Course in I, II, and III semester.
- 4. A project and Elective project in the IV semester.
- 5. Hospital Internship 45 Hours in I, II and III Semester and evaluation of the report will be done by the internal and external examiners. Based on their performance Grade will be awarded as follows:

A: 75 Marks and above

B: 60-74 Marks

C: 50-59 Marks

Below 50 Marks - (Reappear)

- 6. Hospital Orientation 30 days during II Semester summer holidays and Evaluation will be done in Third semester by internal and external examiners.
- 7. Project work and Elective project in IV Semester will be evaluated by the internal and external examiners.

EARNING EXTRA CREDITS IS NOT MANDATORY FOR PROGRAMME COMPLETION

EXTRA CREDITS

S. No.	Course	Credit	Total Credits
1.	Publication with ISSN Journal	1	1
2.	Hindi /Other Foreign language	1	1
3.	Paper Presented in Sponsored National/ International Seminar/Conference/ Workshop	1 000	1/1
4.	Online Courses Prescribed by the Department / Self Study paper	2	2
5.	Representation — Academic/Sports /Social Activities/ Extra Curricular Activities at University/ District/ State/ National/ International	1	1
6.	Value Added Course	2	2
7.	Job Oriented Course	2	2
Total			10

Rules:

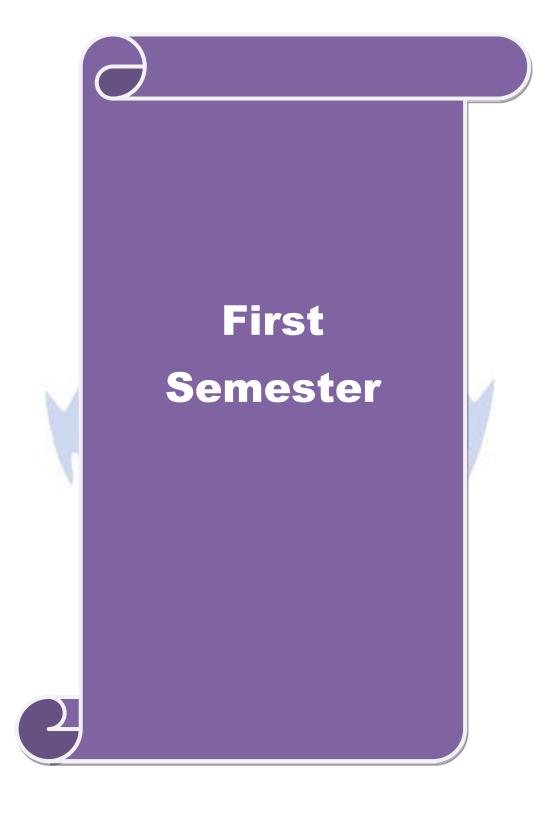

The students can earn extra credits only if they complete the above during the programme period (I to III semester) and based on the following criteria. Proof of Completion must be submitted in the office of the Controller of Examinations before the commencement of the IV Semester. (Earning Extra credits are not mandatory for programme completion).

- 1. Publication with ISSN Journal by student and co-authored by staff member will be given one credit extra.
- 2. Student can opt Hindi/ French/ Other foreign Language approved by certified Institutions to earn one credit. The certificate (Hindi) must be obtained from Dakshina Bharat Hindi Prachar Sabha and He/ she has to enroll and complete during their programme period (First to Third semester).
 - 3. Award winners in Paper Presentation in Sponsored National/International Seminar/Conference/ Participation in short term workshop (minimum 5 days) will be given one credit extra.
 - 4. Student can earn two credit, if they complete any one minimum 4 weeks Online certification courses (MOOC/SWAYAM/NPTEL/COURSEERA) / Self study paper prescribed by the concerned department.

Self study paper offered by the Hospital Administration Department

S. No.	Semester	Course Code	Course Title
1.	1 2	21PHMSS1	Hospital Hazards Management
2.	I Semester to III Semester	21PHMSS2	Brand Management
3.		21PHMSS3	Customer Relationship Management

- 5. Award Winners in Social Activities/ Extra Curricular /Co-Curricular Activities / Representation in Sports at University/ District/ State/ National/ International level can earn one credit extra.
- 6. Student can earn two credits, if they complete the Value Added Course Medical Terminology & Procedures (or) Disaster Management (30 hours).
- 7. Student can earn two credits, if they complete the Job Oriented Course Medical Records Management (or) Quality Accreditations in Healthcare (30 hours).

Course code	21PHM13A	MANAGEMENT PRINCIPLES	L	T	P	C
Core/Elective	e/Supportive	Core – I	4	-	-	4
Prerequisite			Sylla Versi		Firs	st

The main objectives of this course are to:

- 1. Provide a basic framework of understanding and applying management concepts in Health Care Organizations.
- 2. Analyze, evaluate, and solve problems using the methods of management science at various types of Health Care Sectors.
- 3. Use the interpersonal & communication skills as an effective technique which a leader needs to make correct decisions and to act within social and ethical dimensions.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

011 6	the successful completion of the course, student will be use to:	
1	Outline the historical developments, fundamental concepts, emerging trends and	K2
	developments in Management	
2	Develop the tools of planning and decision making in health care management	K3
3	Categorize and classify the organizational skills that fit to the health care organization	K4
4	Appraise and interpret the elements of directing and motivating in health care	K5
	management	
5	Compile and propose controlling techniques for health care organization	K6

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 Evolution and Process of Management

9 hours

Evolution of Management Science: Definition, Nature, Principle and Process of Management - Management as Science or an Art - Management as a Process - The Managerial Roles - Management Theories.

Unit:2 Planning and Decision Making 10 hours

Planning: Meaning, Definition and Features – Pervasive Nature of Planning – Process, Importance, Techniques of Planning – Characteristics of Good Plan – Objectives – Management By Objectives – MBE Strategic Planning. Policy-Procedure, Methods and Rules -Types of Policy - Decision Making - Types of Decisions - Common Problems and Difficulties in Decision Making - Decision Support System (DSS) – Models – Forecasting - Types and Elements – Limitations.

Unit:3 Organizing 9 hours

Organizing: Nature, Purpose and Importance - Elements of Organizing - Formal and Informal Organization - Limitations of Informal Organization - Forms of Organization - Delegation - Principles, Tasks And Needs - Barriers of Effective Delegation - Process of Delegation - Guidelines For Effective Delegation.

Unit:4 Directing, Leadership and Motivation 9 hours

Directing: Behavioural Models – Creativity – Leadership – Traits of Leader - Importance of Leadership – Functions of Leader – Distinction Between Leadership and Manager - Trait Theory – Leadership Theory – Power Styles - Motivation – Motivation Techniques - Job Enrichment – Hierarchy of Needs Theory – McClelland's Theory – ERG Theory – Equity Theory-

		nt Theory.	
Į	Unit:5	Controlling	9 hours
Co	ontrolling -	- Control System and Processes - Characteristics of Control - L	imitations of Control
- (Control Te	chniques - Budget Controlling Methods- Gantt Chart - PERT	CPM – Flow Chart,
Flo	ow Process	s Charts, Work Distribution Charts.

The main objectives of this course are to:

- 1. Make the students understand implications of personal and societal behaviour on disease and disease prevention and demonstrate their understanding of health principles
- 2. Understand the broad view of epidemiological principles of disease and understand various health awareness programs and actively participate in health decisions.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

On th	ne successful completion of the course, student will be able to:	
1	Understand about concept of health and compare different types of diseases, causation	K4
	and demonstrate knowledge on concept of disease prevention.	
2	Understand and demonstrate the knowledge on basic anatomy, physiology and	K4
	different functions of human body.	
3	Understand and analyse various epidemiological principles and strategic models in	K4
	conducting field studies.	
4	Distinguish and compare various health level of India health care system and analyse	K5
	the various health policies	
5	Understand and assess various health programs in India and criticize their current	K5
	progress on public health.	

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 – Create

Unit:1 Concept of Health and Diseases 8 hours

Concept of Health - Definition and Dimensions of Health - Health Development - Health in Developed and Developing Regions - Spectrum of Health - Determinants of Health - Indicators of Health - Concept of Disease - Concepts of Disease Causation - ICEBERG PHENOMENON of Disease - Natural History of Disease - Concept of Disease Control - Concept of Prevention - Disease Classification.

Unit:2	Basic Anatomy and Physiology & Human System	8 hours
Introduction -	The Cell - The Tissues - Organs and Systems - Skeletal System	em - Joint of the
Skeleton – Bl	ood – Blood Components – Human System -Cardiovascular S	System – Urinary
System – Res	piratory System - Digestive System - Central Nervous System	n – Reproductive
System.		

Unit:3 Epidemiology and Infection Control 8 hours

Definition and Basic Concepts of Epidemiology - Basic Measurement - Mortality and Morbidity - Methods of Epidemiology - Infectious Disease Epidemiology - Investigation of an Epidemic Outbreak - Nosocomial Infection-Asepsis - Reservoir, Carrier and Mode of Transmission of Communicable Diseases .

Infection Control Measures - Host Defence - Immune Response - Immunization Agents - Hazards of Immunization - Disease Prevention and Control-Non Communicable Disease - Barrier Nursing-Isolation.

Unit:4 Health Administration & Health Policies In India 10 hours Introduction – Health Administration at Center - Health Administration in State –District Health Administration - Health Administration in Rural Areas – Village Level Health Workers – Voluntary Health Agencies - Health Planning in India – National Health Policy – National Housing Policy -National Nutritional Policy – National Population Policy - National Health Policy- National Rural Health Mission-National Urban Health Mission.-MCI ACT. Unit:5 **National and International Health Programs** 12 hours Indian Health Policy - National Family Welfare Programs – Universal Immunization Programs Reproductive and Child Health Programs- Revised National Tuberculosis Control Programs National Tuberculosis Elimination Programs – National Leprosy Eradication Programs – National AIDS Control Programs-National Program For Control of Blindness - National Program for Prevention and Control of Cancer Diabetes, Cardiovascular Disease and Stroke – National Mental Health Programs - SWATCH BHARAT- Rashtriya Swasthya Bima Yojana - POSCO Act International Health Programs - Rock Feller Foundation - Ford Foundation - World Bank Programs. **Contemporary Issues** Unit:6 2 hours Expert Lectures, Online Seminars – Webinars **Total Lecture hours** 48 hours Text Book(s) K. Prerequisite		Relevant Software	Syllabus Version		Fi	irst

The main objectives of this course are at:

- 1. Provide detailed knowledge on Word, Excel & PowerPoint
- 2. Learn the fundamentals of computing devices in curriculum

WORD 20 Hours

Creating a New Document With Templates & Wizard - Creating Own Document - Opening/Modifying A Saved Document - Converting Files to and From Other Document Formats - Using Keyboard Short-Cuts & Mouse - Adding Symbols & Pictures to Documents - Headers and Footers - Finding and Replacing Text - Spell Check and Grammar Check - Formatting Text - Paragraph Formats - Adjusting Margins, Line Space - Character Space - Changing Font Type, Size - Bullets and Numbering - Tables - Adding, Editing, Deleting Tables - Working Within Tables - Adding, Deleting, Modifying Rows And Columns - Merging & Splitting Cells-Mail Merge - Macro Shortcut.

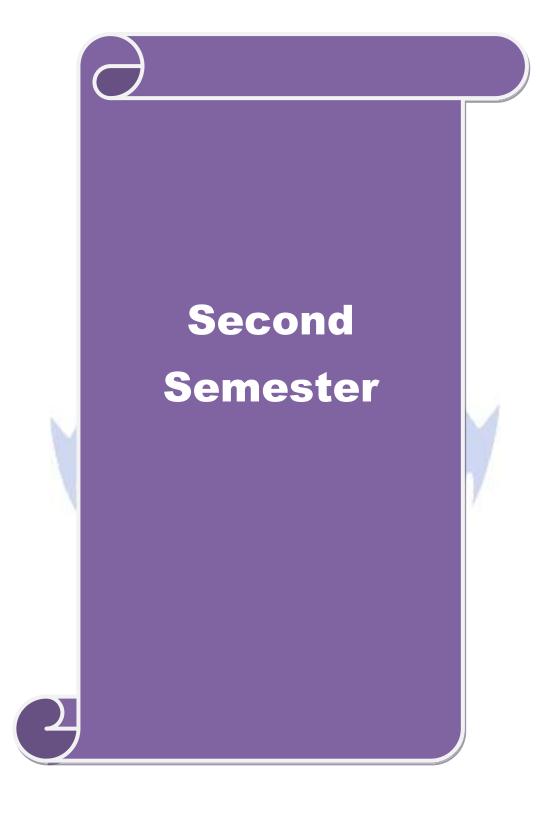

EXCEL 20 Hours

Working with Worksheets - Cells - Entering, Editing, Moving, Copying, Cutting, Pasting, Transforming Data - Inserting and Deleting of Cells, Rows & Columns – Working with Multiple Worksheets - Switching between Worksheets - Moving, Copying, Inserting & Deleting Worksheets - Using Formulas for Quick Calculations - Working & Entering a Formula - Formatting a Worksheet - Creating and Editing Charts - Elements of an EXCEL Chart - Selecting Data to a Chart - Types of Chart - Chart Wizard – Formatting Chart Elements - Editing a Chart - Printing Charts.

POWERPOINT 20 Hours

Creating New Presentations - Auto Content Wizard - Using Template - Blank Presentation - Opening Existing Presentations - Adding, Editing, Deleting, Copying, Hiding Slides - Presentations - Applying New Design - Adding Graphics - Using Headers and Footers - Animating Text - Special Effects to Create Transition Slides - Controlling the Transition Speed - Adding Sounds to Slides - Using action Buttons.

Core/Elective	Supportive	Core – V	4	-	-	4
Pre-requisite			Syllabus Version Firs		First	

The main objectives of this course are to

- 1. Provide knowledge on the dimensions of Economics, Demand and supply curves.
- 2. Explain the different types of Competitions in the market.
- 3. Obtain the role of economic systems in providing solution to economic problems and employment opportunities in Health Care Industries.

Exp	Expected Course Outcomes:					
On 1	On the successful completion of the course, student will be able to:					
1	Apply knowledge on concepts of Demand and Production function.	K3				
2	Examine the concepts of supply and different costs analysis.	K4				
3	Analyze the different types of competitions in economic growth.	K4				
4	Assess the knowledge on effective management of resources.	K5				
5	Compare the economic problems in healthcare using various budgeting techniques.	K5				

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit: 1 Concepts of Economics 9 hours

Characteristics – Dimensions of Economics, Economist Role and Responsibilities – Demand - Consumer Demand Utility- Law of Demand - Demand Curve - Indifference Curve - Elasticity of Demand- Determinants - Production – Process - Factors of Production - Isoquants - Production Function – Production Possibility Frontier in Health Care - Measures of Health Status.

Ilmit . 2	Driging and Cumply	0 houng
Unit: 2	Pricing and Supply	9 hours

Concepts – Theory of Price Determination – Utility Analysis – Supply Curves – Cost Concepts and Cost Analysis.

Unit: 3 Market 9 hours

Kinds of Market Structures - Perfect and Pure Competition - Monopoly - Monopolistic Competition - Oligopoly- price discrimination - Types - National Income and Business Cycle - Concepts - Measures - Methods- Economic growth.

Unit: 4 Healthcare Service Market 9 hours

Principles of Primary Health Care – Services - Sources – Accesses- Healthcare Service Market - Economic Analysis - Medical Care Market Place - Market Failure in Medical Markets - Employment at Indian Health Service – Efficiency – School - Market Dynamics-Healthcare Industry- Segments- Conditions – Pharmaceutical Market.

Un	it : 5	Financial Economics	10 hours
Eco	onomic	s of Size - Economics and Diseconomies of Scale - Input Output Ar	nalysis - Capital
Bu	dgeting	– Pay Back Period Method – NPV – IRR – Monetary and Fiscal Po	licies.

Course Designed By: Mrs.V.Prabavathi

Course code	21PHM23E	LEGAL AND ETHICAL ISSUES IN HEALTH CARE	L	Т	P	C
Core/Elective	/Supportive	Core – VIII	4	-	-	4
Pre-requisite			Sylla Vers		Fi	irst

The main objectives of this course are to:

- 1. Provide knowledge on Laws, promoting and protecting healthcare.
- 2. Analyze the Legal framework and its importance in Indian Healthcare.
- 3. Explain the role of Pharmacy Legislations and Pollution Controls.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

U	and substitute of the course, substitute of the course,	
1	Apply the health Law concepts and code of Ethics in health care	К3
2	Evaluate the laws related to Medical practices.	K5
3	Assess the Laws related to Hospital Administration and Hospital Finance assistance.	K5
4	Formulate the Laws related to support Services.	K6
5	Explain the Laws related to Pharmacy Legislation in India	K6

K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze; K5 - Evaluate; K6 – Create

Unit: 1 Health Law and Code of Ethics 9 Hours

Introduction to Health Law – Basic Concepts of Law, Courts and Legal System – Duties and Responsibilities of a Doctor – Hippocratic Oath, Geneva Declaration, Declaration of Helsinki and Medical Code of Ethics – Medical Negligence – Qualities of a Great Medical Professional – Patients Rights and Responsibilities - Euthanasia.

Unit: 2 Laws Related to Medical Practices 9 Hours

The Indian Medical Council Act, 1956 – Clinical Trials – Disability Act, 1995 – Transplantation of Human Organs Act, 1994 – Medical Termination of Pregnancy Act, 2002 – Registration of Births and Deaths Act, 1969 – Pre-Natal Diagnostics Techniques Act, 1994 – Indian Mental Health Act, 1987 – Legal Aspects of Medical Records.

Unit: 3	Laws Related to Hospital Administration and Hospital	9 Hours
---------	--	---------

Law of Contract 1872 – Patient and Consumer Protection Act, 1986 – CENVAT – Insurance Regulatory and Development Authority (IRDA) – Service Tax – Sexual Harassment Act 2013.

Unit: 4	Laws Related to Support Services	9 Hours
---------	----------------------------------	---------

Prevention of Food and Adulteration Act 1954 – Bio-Medical Waste (Management and Handling) Rules 2011 – Pollution Control Acts and Regulations of India 1981 – Indian Boilers Act 1923.

Uni	t:5	Laws Related to Pharmacy	10 Hours

Course code	21PHM33B	HUMAN RESOURCE MANAGEMENT AND INDUSTRIAL RELATIONS	L	Т	P	C

The main objectives of this course are to:

- 1. Learn the Human Resource functions and trends in Human Resource Management and to study the laws related to labour work force in Hospital.
- 2. Understand the recruitment, placement, training and development process of Human Resource Management in the Healthcare Industry.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

On the s	successful completion of the course, student will be able to.	
1	Demonstrate the concepts of HR on the nature, importance and functional	K4
	skills of Human Resource Management among the healthcare personnel.	
2	Understand the functional regions of demand and supply forecast used for	K4
	HR management and to built skill on familiar job terminologies.	
3	Understand the importance of recruitment, training and development	K2
	process of Human Resource Management in the Healthcare Industry.	
4	Assess various employee welfare acts and to implement the skill based	K5
	concepts to current healthcare industrial setup.	
5	Measure the different types of performance appraisal strategies used in the	K5
	healthcare industries.	

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 Introduction to HRM in Hospitals 10 hours

Evolution of HRM – Importance – Nature – Characteristics – Functions and Role of HRM – HR Systems

Unit:2 HR Planning 9 hours

Job Design – Specification – Job Roles – Job Enrichment – Job Analysis – Job Description – Job Sharing – Promotion – Transfer - Demotion – Absenteeism, Labour Turn Over (Meanings, Purposes, Types) – Steps in Career Planning and Development System – Actions – Prerequisites For Success – Key Issues in Career Development – Manpower Requirement Analysis

Unit:3Recruitment and Selection9 hoursObjectives of Recruitment – Recruitment Policy – Sources of Recruitment – Traditional
Techniques – Modern Techniques- Factors Affecting Recruitment – Assessment of Recruitment
Programme – Selection – Roll of Selection Procedure- Organization for Selection – Selection
Procedure – Placement – Induction – Management of Changes – Technology Changes – Managing
Changes – Resistance to Change – Approach to Organizational Changes – Organizational
Development (Meaning, Characteristics, Values, Objectives) – Organization Culture

Unit:4Industrial Relations9 hoursFactories Act, 1948 - Maternity Benefit Act,1961 - Employee State Insurance Act, [ESI] 1948 -

Employees' Provident Fund Scheme, 1952 – Payment of Bonus Act, 1965 – Workmen's Compensation Act, 1923 – Apprentices Act, 1961 – Contract Labour Act (R&A), 1970 – Introduction to Payment of Wages Act 1936 – KRA / KPA (With Recent Amendments)

	Unit:5	Employees` Performance Appraisal	9 hours
His	story and De	finition – Purpose – Process – Advantages – Limitation – Model A	ppraisal Firms –
Pre	cautions –	Methods of Appraisal. Wage And Salary Administration – Introduc	ction- Purpose –
Me	aning – W	ages Vs Salary – Obligations of Management.

Course Object	tives:					
The main object	ctives of this cours	e are to:				
1. Introdu	ce the basic cond	cepts of research and apply the fundament	als of s	ampl	ling	and

- scaling techniques along with methods of data collection.
- 2. Learn the process of analyzing the collected data, interpretation, report writing and application of computers in research and documentation.

Expected Course Outcomes: On the successful completion of the course, student will be able to: Understand the fundamental concepts of research, types and research process. K2 K2 Summarize the sampling design and scaling techniques. 3 Construct a method for data collection and able to edit, code, classify and tabulate K3 the collected data. Analyze the collected data to prove or disprove the hypothesis. K4 4 Interpret the data and prepare a research report. K5

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Introduction to Research Methodology Unit:1 Research - Definition - Significance - Criteria of Good Research - Types -Research Process

Selecting the Research Problem – Techniques Involved in Defining a Problem - Research Design : Features of a Good Design - Important Concepts Relating to Research Design - Different Research Designs.

Sampling and Scaling 11 hours Unit:2

Sampling Design – Steps - Types - Sampling Errors and Non-Sampling Errors – Factors Influencing the Size of the Sample - Scaling - Classification of Measurement Scales - Scaling Techniques.

Data Collection and Preparation Unit:3 12 hours

Collection of Primary Data: Observation Method - Interview Method - Questionnaire Method -Schedule Method- Some other Methods of Data Collection - Collection of Secondary Data - Case Study Method - Data Preparation : Editing - Coding- Classification - Tabulation- Graphical Representation.

Unit:4 **Processing and Analyzing of Data** 12 hours

Hypothesis – Basic Concepts Concerning Testing of Hypothesis - Procedure for Hypothesis Testing - Z Test - T Test - Chi-Square Test - ANOVA - Application of SPSS (Simple Problems Only).

Interpretation and Report Writing 12 hours

Interpretation: Techniques - Precautions - Report Writing - Steps in Writing Report - Layout of the Research Report - Types of Reports - Mechanics of Writing a Research Report - Precautions for Writing Research Reports.

The main objectives of this course are to:

- 1. Make the students understand the role and value of information technology in potentially revolutionizing healthcare.
- 2. Analyze obstacles and success factors for implementation and integration of information, communication and decision technologies in healthcare.
- 3. Evaluate the type of information that best serves the health care sector.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

On t	the successful completion of the course, student will be able to.	
1	Explain the importance of information and electronic communication in health care	K2
	sector	
2	Identify the impact of automation and construct the organizational culture that	K3
	manage change	
3	Examine the role of health care professionals in protecting the Information	K4
4	Determine the future of informatics in health care	K5
5	Create an administrative application of computer technology for health care sector	K6

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 Information System 10 hours

Importance of Information—Impact on Healthcare - The Future of Healthcare Technology -World of Informatics: Importance—Rights — Structure. Health Informatics — Components -Goals-Classification — Future.

Electronic Communications: A Bit of History – Hardware and Software for Connecting – Methods of Accessing Information – World Wide Web (WEB) – Communication Technologies – Summary.

Unit:2 Changing Information System 9 hours

Impact for Automation – Organizational Culture –Resistance to Change – Importance of Managing Change – Management Strategies. Information Becomes Knowledge Through Research: Types – Data Management – Ethical Issues.

Unit:3 Role of Information 9 hours

Right Information – Process of Decision Making – Literature Database – Problems in Literature Seeking – Standards of Information Seeking. Securing the Information: Privacy and Confidentiality – Computer Crimes – Security – Law – Role of Healthcare Professionals in Protecting the Information.

Unit:4 Electronic Health Record 9 hours

Functions - Implementation — Advantages — Disadvantages. Telehealth: Types — Initiatives — Advantages — Barriers — Future. Future of Informatics: Globalization of Information in Public Health, Education, Knowledge, Security, Wireless Computing — Barriers.

Core/Elective	/Supportive	Core – XII	5	-	-	4
Pre-re	equisite		Sylla Vers	abus sion	Fi	irst

The main objectives of this course are to:

- 1. Provide knowledge in different quality concepts and their influence in healthcare.
- 2. Learn and analyze the several quality tools and techniques for healthcare industry.
- 3. Understand the various quality certification processes for Healthcare industry

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

On t	On the successful completion of the course, student will be able to.					
1	Identify prerequisites for quality management in Indian & International scenario.	К3				
2	Evaluate the principles of quality and peculiarities of their implementation	K5				
3	Explain statistical process control data to improve production planning and control.	K5				
4	Compare various quality concepts tools and techniques in process improvement.	K5				
5	Assess the use of quality management certification methods in solving problems of healthcare organization.	K5				

K1 – Remember; K2 – Understand; K3 – Apply; K4 – Analyze; K5 - Evaluate; K6 – Create

Unit: 1 ASPECTS OF QUALITY

10 hours

Quality in Healthcare – Definition - Evolution of Quality - Quality Gurus - Quality Indian & International Scenario - Cost of Quality - Awareness of Quality - Quality Obstacles & Benefits.

Unit: 2 TOTAL QUALITY MANAGEMENT

12 hours

Characteristics of Quality Gurus - Ethics in Quality - Quality Council - Quality Statements - Strategic Planning - Customer Perception of Quality - Customer Feedback - Service Quality - Translating Needs into Requirements - Customer Retention - Employee Motivation Teams

- Recognition & Rewards - Performance Appraisal & Employee Involvement.

Unit: 3 QUALITY MANAGEMENT PROCESS – I, II

14 hours

Quality Management process - I

Simple Seven Tools of Quality Control Charts - Check Sheet - Histogram - Scatter Diagram - Process Mapping - Cause and Effect Diagram - Pareto Analysis - PDCA Cycle.

Quality Management process - II

Control Chart for Variables- X, X bar and R Charts and Control Charts for Attributes - p, Np and c Charts. Acceptance Sampling Plan - Quality Planning- Quality Improvement Methods – Kaizen.

Unit: 4 EVALUATION OF QUALITY SYSTEMS 10 hours

Quality audits – Benchmarking - Six Sigma – JIT - Balance score card – FMEA - Stages of FMEA - Process & Types.

Unit: 5 ACCREDITATION / CERTIFICATION 12 hours

Accreditation - Nursing Care Standards - NABL - NABH - Introduction to ISO Standards - Documentation of ISO Standards - Documentation of Quality Systems - Quality Manual - Procedure Manual - Work Instruction Manual - JCI Accreditation.

Unit: 6 Contemporary Issues 2 hours

Expert Lectures, Online Seminars – Webinars

Total Lecture hours 60 hours

Course code	21PHM1ED	INTRODUCTION TO INDUSTRY 4.0	L	Т	P	С
Core/Electiv	e/Supportive	Elective – I	4	-	-	4
Pre-requisite			Sylla Versi		Firs	st

The main objectives of this course are to:

- 1. Introduce the basic concepts of Industry 4.0, Artificial Intelligence, Big Data and Internet of Things.
- 2. Learn the applications and tools of Industry 4.0.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

1	Understand the basic concepts of Industry 4.0	K2
2	Outline the features of Artificial Intelligence	K2
3	Summarize the Big data domain stack and Internet of Things	K2
4	Identify the applications and Tools of Industry 4.0	К3
5	Analyze the skills required for future	K4

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 Industry 4.0 8 hours

Need – Reason for Adopting Industry 4.0 - Definition – Goals and Design Principles - Technologies of Industry 4.0 – Big Data – Artificial Intelligence (AI) – Industrial Internet of Things - Cyber Security – Cloud – Augmented Reality.

Unit:2 Artificial Intelligence 9 hours

Artificial Intelligence: Artificial Intelligence (AI) – What & Why? - History of AI - Foundations of AI - The AI - Environment - Societal Influences of AI - Application Domains and Tools - Associated Technologies of AI - Future Prospects of AI - Challenges of AI.

Unit:3 Big Data and IoT 11 hours

Big Data: Evolution - Data Evolution - Data: Terminologies - Big Data Definitions - Essential of Big Data in Industry 4.0 - Big Data Merits and Advantages - Big Data Components: Big Data Characteristics - Big Data Processing Frameworks - Big Data Applications - Big Data Tools - Big Data Domain Stack: Big Data in Data Science - Big Data in IoT - Big Data in Machine Learning - Big Data in Databases - Big Data Use cases: Big Data in Social Causes - Big Data for Industry - Big Data Roles and Skills - Big Data Roles - Learning Platforms; Internet of Things (IoT): Introduction to IoT - Architecture of IoT - Technologies for IoT - Developing IoT Applications - Applications of IoT - Security in IoT.

Unit:4 Applications and Tools of Industry 4.0 9 hours

Applications of IoT – Manufacturing – Healthcare – Education – Aerospace and Defence – Agriculture – Transportation and Logistics – Impact of Industry 4.0 on Society: Impact on Business, Government, People. Tools for Artificial Intelligence, Big Data and Data Analytics, Virtual Reality, Augmented Reality, IoT, Robotics.

Unit:5	Jobs 2030	9 hours
Industry 4	0 – Education 4.0 – Curriculum 4.0 – Faculty 4.0 – Skills required for	Future - Tools for
Education	- Artificial Intelligence Jobs in 2030 - Jobs 2030 - Framework for al	igning Education
with Indu	try 4.0.	
Unit:6	Contemporary Issues	2 hours
Expert Le	etures, Online Seminars – Webinars	
		_
	Total Lecture hours	48 hours

Course code	21PHM3EB	HEALTH CARE DELIVERY SYSTEM	L	T	P	C
Core/Elective/	Supportive	Elective – III	4	-	-	4
Prerequisite			Sylla Versi		Firs	st

The main objectives of this course are to:

- 1. Make the students understand the Health care Delivery System.
- 2. Inculcate the concept of Disaster Management, Biomedical waste Management and usage of computers in medicine.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

1	Understand the overview of health care delivery system.	K2				
2	Analyze the clinical terminology in specialty wise.					
3	Evaluate the organization of Medical records department	K5				
4	Assess the importance of disaster management system, Medical insurance and	K5				
	Biomedical waste management in hospital					
5	Analyze the computer applications in Medicine.	K4				

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 – Create

Unit:1 Introduction to Healthcare Delivery System 9 hou

Healthcare Delivery System – An Overview – Common Terms of Healthcare Management: Terms Related to Levels of Health Care - Primary, Secondary and Tertiary - Systems of Medicine - Preventive and Curative Medical Care – General and Specialty Hospitals Indian Systems of Medicine.

Unit:2 Specialty-wise Terminology 9 hours

Specialty-wise Terminology – Pathology Terms of Common Use – Clinical, Diagnostic and Therapeutic Terms – Pediatric Services – Dental – Psychiatric – Casualty and Emergency – Neurology – Obstetrics and Gynecology – Dermatology Intensive Care – Coronary Care Services.

Unit:3 Medical Records 9 hours

Medical Records – Admission – Billing - Nursing Records - Diagnostic Records - Infection Control Records - Maintenance of Operation Theatres Records - Maintenance of Intensive Care Units Records - Clinical Records – Housekeeping Records – Food Records – Engineering Records – Maintenance Records – Security Records – Fatal Documents – Mortuary Maintenance Records – Transportation – Medico Legal Records.

Unit:4	Disaster Management, Medical Insurance, Biomedical	10 hours
	Waste Management	

Disaster Management : Basic Concepts - Principles of Disaster Planning - Objectives of a Hospital Disaster Plan - Disaster Committee - Organisation - Roles and Responsibilities - Organising Disaster Facilities.

Medical Insurance : Insurance Policy – Health Insurance in Indian Scenario – Economics of Life and Health Insurance - Importance – Health Insurance Policies – Administration of Health

Insurance Schemes.

Biomedical Waste Management & Handling Rule Management – Schedules – Segregation - Bio Medical Waste Collection – Transportation – Disposal - Modern Technology for Handling BMW - Radioactive Waste Handling.

Unit:5 Computers in Medicine 9 hours

Computers in Medicine – System Design - Multichannel Computerised ECG, EMG and EEG Data Acquisition - Storage and Retrieval, Transmission of Signal and Images - Patient Monitoring - Physiological Monitoring - Automated ICU - Computerised Arrhythmia Monitoring - Information Flow in a Clinical Lab - Computerised Concepts - Interfacing to HIS - Computers in Medical Systems and Medical Research.

Unit:6	Contemporary Issues	2 hours
Expert Lecture	s, Online Seminars – Webinars	

Total Lecture hours 48 hours

The main objectives of this course are to:

- 1. Enable students to understand hazards in hospital environment and infection control system in hospital.
- 2. Learn the Biomedical waste management system.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

1	Outline the hospital hazards and preventive measures	K2
2	Choose the suitable measures to control the hospital acquired infection	K3
3	Categorize the biomedical wastes and it's management	K4
4	Plan human waste disposal and sewage disposal	K3
5	Summarize the medical insurance	K2

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 Introduction to Hospital Hazards

Hospital Hazards: Meaning – Types – Physical – Biological - Mechanical - Psychological – It's Impact on Employees - Preventive Measures - Hospital Hazards Management: Meaning – Need – Principles – Purpose.

Unit:2 Infection

Control of Hospital Acquired Infection: Types of Infection – Common Nosocomial Infection and their Causative Agents – Prevention of Hospital Acquired Infection – Role of Central Sterile Supply Department – Infection Control Committee – Monitoring and Control or Cross Infection-Staff Health.

Unit:3 Biomedical Waste Management

Biomedical Waste Management: Meaning – Categories of Biomedical Wastes – Disposal of Biomedical Waste Products – Incineration and it's Importance – Indian Medical Association – TNPCB Rules and Schedules – Standards for Waste Mutoclaving, Micro waving and Deep Burial – Segregation – Packaging – Transportation – Storage.

Unit:4 Human Waste and Sewage Disposal

Human Waste Disposal and Sewage Disposal: Diseases Carried from Excreta – Sanitation Barrier – Methods of Excreta Disposal – Sewage Wastes: Meaning – Composition – Aims of Sewage Disposal – Decomposition of Organic Matter – Modern Sewage Treatment – Drawbacks of Improper Disposal of Wastes – Solid and Liquid.

Unit:5 Medical Insurance

Medical Insurance: National Insurance Companies – Paramount Health Care Services – Third Party Insurance – Payment Terms and Conditions – Limitations of Liability and Indemnity.

VALUE ADDED COURSE - I

MEDICAL TERMINOLOGY & PROCEDURES

Course Objectives:

The main objectives of this course are to:

- 1. Identify and define combining forms, prefixes and suffixes pertaining to the Human anatomy and physiology system.
- 2. Correctly spell and pronounce medical terminology associated with the Human anatomy and physiology system.
- 3. Identify and define selected anatomical and pathology terms associated with the Human anatomy and physiology system.
- 4. State and describe diagnostic procedures, treatments and therapeutic procedures associated with the Human anatomy and physiology system.
- 5. State abbreviations associated with the Human anatomy and physiology system.

Module 1	Fundamentals of Medical Terminology Word Roots- Prefix – Suffix - Abbreviations & Symbols	3 hours
Module 2	Introduction to Anatomy & Physiology	3 hours
Module 3	Organs & Systems Gastro Intestinal – Respiratory – Circulatory – Renal – Reproductive – Nervous	6 hours
Module 4	Common Diseases & Procedures Gastro Intestinal — Cholecystitis — Cholelithiasis — Appendicitis - Intestinal Obstruction — Hernia — Peritonitis	3 hours
Module 5	Common Diseases & Procedures Respiratory – Tuberculosis - Bronchial Asthma - Respiratory Failure - Pulmonary Embolison – Pneumonia -Branchosopy, Pulmonary Function Test, Cardio-Pulmonary Resuscitation	3 hours
Module 6	Circulatory Hypertension - Coronary Artery Disease — Arrhythmias - Cardiac Arrest	3 hours
Module 7	Renal Nephrotic Syndrome - Urinary Tract Infection - Renal Failure - Renal / Bladder Stones - Intravenous Pylography, Cystoscopy	3 hours
Module 8	Reproductive Female — Breast Cancer/Self Examination - Menstrual Disorders, Dysmenorrhoea - Premenstrual Syndrome (PMS) -Menorrhagia Ovarian Cyst, Fibroids - Malignancy, Infertility Mammography, Ultra Sound, Laparoscopy, IVF, Tubectomy, D & C Male - Prostate Enlargement, Hydrocele, Impotence	3 hours
Module 9	Nervous Stroke (Cerebro Vascular Accident) - Brain Tumor - Brain Injuries - Spinal Cord Injuries - Lumbar Puncture, Myelography, CT Scan, MRI, EEG, EMG	3 hours
	Total Lecture hours	30 hours
