14 MCE01: (ELECTIVE I) MEDIA ANALYSIS

MEDIA ANALYSIS (PRINT, TELEVISION AND ONLINE)

(To be evaluated as a part of the practical module in the first semester)

Aim of introducing this paper as part of the curricula, that covers print, electronic and online media, is as follows:

- Develop a sense of history and development of Indian media and media industries.
- Develop media literacy skills
- Build a broad overview of current trends in mass and networked media, especially concentration of ownership and conglomeration, globalization, audience fragmentation, hyper commercialization and convergence.
- Analyze the technological, organizational and economic nature of media formats and messages.

- Examine a number of controversial effects issues by media practitioners.
- Understand the global nature of mediated communication and gain familiarity with other country's media systems.

A typical media analysis can answer the following questions:

- a) How does the same story of the day differ from each source? What factors might account for these differences? What important things would regular viewers of local news stations likely not know about the news subject? Which news source is more likely to satisfy a democracy's need for informed citizens?
- b) How does the rhetoric used in each report-- the diction, imagery, selection of detail, etc. differ from each source and how the different rhetoric present the event differently?
- c) How do the media frame public discussion of an issue (by repeating various elements, using common metaphors, quoting similar people, etc)
- d) Who are the main spokespeople on a particular topic and how are they being quoted? Are they mainly advocates, policymakers, academicians, etc?
- e) How often are the various spokespeople quoted and in what context?
- f) What topics are being covered and what are being ignored?
- g) Which outlets are covering or ignoring an issue or organization that should be covering?
- h) Is there a time of year when an issue or organization is more likely to be covered than others?
- i) Is a topic or organization front-page news and if not, where in the paper is that topic or organization covered?
- j) Which reporters are writing on this issue/organization?
- k) What messages are being used?

Documentation for Print News

Students will select News story(ies) from the newspapers of their choice for 20 days and record the summary of each day's selected news story.

Documentation for Television News

In order to develop a critical understanding of television news, students will watch excerpts of news programs during class, participate in discussions and write a compare/contrast paper.

Students will view news broadcasts everyday for about a week and keep a log of the specific stories, types of stories, and the time of stories in number of seconds besides any attention-grabbing, sensationalist headlines they see that might be bias toward a certain individual or group of people. Then, they will identify the types of content in terms of time devoted to "news," "weather," "sports," "consumer/health/entertainment feature stories," and "ads." Within the "news" category, they will characterize the types of stories included.

If they view several different news stations on the same day, they will then compare the differences in station's news in terms of their style, topic selection, self-promotion, bias, substantive analysis, story development, etc. They will also examine difference in the stations' news ratings and discuss differences in popularity as due to the particular personalities of the anchors and/or the quality of their coverage. They may also note the similarities in the news in terms of formats, stories, topics, styles, flashy weather/sports. They will finally discuss hidden agenda's demonstrated through stories selected & perspectives demonstrated.

Documentation for Online News

As online news opens up new avenues for scientific inquiry, students will analyze the variations in news flow over the Internet for about a week in the class, participate in discussions and write a compare/contrast paper.

Students will view news broadcasts everyday and keep capture the screen shots of the specific stories, types of stories, and the time of stories in number of seconds besides any variations in headlines. They will characterize the types of stories included in a specific screen shot to check for multiple versions of a text updated over the Internet. students will then prepare a summary of the news stories based on the additional features in the online version and changes in the way news is produced online. They will check for content completeness and uniqueness besides keeping a track of versions, histories and developments of "unfinished texts" that can tell more about the texts produced by contemporary journalism.

The Analytical process

- Media type (newspaper/radio/television/online)
- Organization's share of media attention in the total coverage of a product, issue, industry, cause, etc.
- Story size/length – the space the story occupies in print media (half a page, 400 lines, a tiny mention, etc.), the time (10 seconds, one minute, etc.) devoted to it in broadcast media, and the space/time it earns in new media.
- Story treatment – how a story is treated in the media (a cover story/a running story earning coverage day after day/ a one-shot mention, or a story earning multiple mentions in one issue, one broadcast or one Twitter day.
- Story(ies) are classified by type (opinion/news/feature).
- Placement of the story(ies) (Front page/national/international/etc) for print and the context in which an item is presented in the electronic media (news, opinion/commentary, community service, etc.). Information on the content and placement of such visuals as photographs or audiovisual insertions.
- Timing of the story(ies)
- Story(ies) topic (shows how an issue is covered)
- **Media analysis methodology** –Identifying key term(s) in the story
- **Spokespeople analysis** – identification for frequency of being quoted often.
- **Framing analysis** - Close reading of the story(ies) to analyze its content and see how reporters connect its topic to the archetypal stories already existing

within people's minds and determine underlying message of the media. More than one frame can appear in the same story.

- **Comparative analysis** – variation in the story topics between the time periods.
- **Structuring the analysis** – Begin with an executive summary that includes an introduction, the purpose of the analysis and major findings with a conclusion and recommendations.
