Program Edu	icational Objectives (PEOs)									
The B. Sc. Computer Technology program describe accomplishments that graduates are										
expected to at	expected to attain within five to seven years after graduation									
1	To enhance the broad knowledge in core area related to computer software									
	and hardware technologies									
2	To develop and acquire in-depth knowledge in software design and									
	implementation to meet the requirement of corporate									
3	To facilitate the graduates to pursuing professional careers or researcher or									
	entrepreneurs in computing technologies									
4	To enrich the learners to develop communication, professional skills and to									
	inculcate team spirit									
5	To stimulate the graduates to build awareness on social responsibility,									
	ethical practices and human values in-built in the discipline									

Program Spe	Program Specific Outcomes (PSOs)								
After the succ expected to	essful completion of B.Sc Computer Technology program, the students are								
1 Ability to apply core area knowledge in computing system in appropriate the discipline									
2	Acquired knowledge in software and hardware skills and implementation challenges in varying techniques								
3	Ability to engage in life-long learning and adopt fast changing technology to prepare for professional development								
4	Improve to exhibit professionally or team leader or entrepreneur								
5	Realize technological advances impart society and the social, ethical difficulties of computer technology and their practice.								

Program	Outcomes (POs)								
On succe	On successful completion of the B.Sc. Computer Technology program								
	Disciplinary knowledge: Capable to apply the knowledge of mathematics,								
PO1	algorithmic principles and computing fundamentals in the modeling and design								
	of computer based systems of varying complexity.								
PO2	Scientific reasoning/ Problem analysis: Ability to critically analyze, categorizes,								
102	formulate and solve the problems that emerges in the field of computer science.								
	Problem solving: Able to provide software solutions for complex scientific and								
PO3	business related problems or processes that meet the specified needs with								
105	appropriate consideration for the public health and safety and the cultural, societal								
	and environmental considerations.								
PO4	Environment and sustainability: Understand the impact of software solutions								
101	in environmental and societal context and strive for sustainable development.								
PO5	Modern tool usage: Use contemporary techniques, skills and tools necessary for								
	integrated solutions.								
	Ethics: Function effectively with social, cultural and ethical								
PO6	responsibility as an individual or as a team member with positive								
	attitude.								
PO7	Cooperation / Team Work: Function effectively as member or leader on								
	multidisciplinary teams to accomplish a common objective.								
	Communication Skills: An ability to communicate effectively with diverse								
PO8	types of audience and also able to prepare and present technical documents to								
	different groups.								
	Self-directed and Life-long Learning: Graduates will recognize the need for								
PO9	self-motivation to engage in lifelong learning to be in par with changing								
	technology.								
PO10	Enhance the research culture and uphold the scientific integrity and objectivity

Core/Elective/Supp	portive	Core: 5	4	0	0	4						
Pre-requisite		Students should have basic understanding of OOPs concept.	Syllab Versio	us n	2021 Onw	-22 vards						
Course Objective	es:											
 The main objective 1. To expose to programming 2. The concepts 3. The course of methods and 4. Simultaneous world problemethods 	 To expose the students with the introduction to OOPs and advantages of object oriented programming. The concepts of OOPs make it easy to represent real world entities. The course introduces the concepts of converting the real time problems into objects and methods and their interaction with one another to attain a solution. Simultaneously it provides the syntax of programming language Java for solving the real world problems.

Course code	System Software and Operating Systems	L	Т	P	С						
Core/Elective/Supporti	e Core : 6	4	0	0	4						
Pro-roquisito	Students Should have the basic knowledge in	Syllab	ous	2021	-22						
I le-lequisite	computer.	Versio	n	Onw	ards						
Course Objectives:											
The main objectives of	this course are to:				. •						
1. To understand th	processing of programs on a computer system to design	and im	plen	ienta	tion						
2 To enhance the a	SSOF.	knowle	daa	bout							
Code optimization using software tools.											
3 Students will gain knowledge of basic operating system concepts											
4. To have an in-dep	h understanding of process concepts, deadlock and men	nory ma	nage	men	t.						
5. To provide an exp	osure to scheduling algorithms, devices and information	manage	emer	ıt.							
Expected Course Out	comes:										
On the successful cor	pletion of the course, student will be able to:			_							
1 Know the progr	m generation and program execution activities in detail			K	.1						
2 Understand the	2 Understand the concepts of Macro Expansions and Gain the knowledge of Editing										
processes	processes										
3 Remember the b	Remember the basic concepts of operating system										
4 Understand the	oncepts like interrupts, deadlock , memory management	and file	e	K	2						
management											
5 Analyze the nee	l for scheduling algorithms and implement different alg	orithms	5	K	1-K4						
used for represe	itation, scheduling, and allocation in DOS and UNIX of	perating	5								
K1 Domombor K2	Understand: K2 Apply: K4 Apply: K5 Evolute:	K6 C	rooto								
KI - Kellelliber, K2	Olderstand, K3 - Appry, K4 - Anaryze, K5 - Evaluate,	NO - C	reale								
Unit.1	INTRODUCTION TO SYSTEM SOFTWARE			12 h	nire						
Introduction_System	oftware and machine architecture Loader and Lit	kers	Raci	$\frac{12}{10}$	ader						
Functions - Machine	lependent loader features – Machine independent load	er feati	ires	- Lo	ader						
design options		or rout		20	uuui						
Unit:2	MACHINE AND COMPILER			15 h	ours						
Machine dependent of	ompiler features - Intermediate form of the program -	Machi	ine c	lepen	dent						
code optimization - N	achine independent compiler features - Compiler desig	gn optic	ons -	Divi	ision						
into passes – Interpret	rs – p-code compilers - Compiler-compilers.										
Unit.2	ODED ATINC SVSTEM			15 h	011100						
What is an Operatiu	System? Process Concepts: Definition of Process	s _ Pro		15 11 Stat							
Process States Trans	ion – Interrupt Processing – Interrupt Classes - Storag	e Mana	igem	ent.	Real						
Storage: Real Stora	e Management Strategies – Contiguous versus Nor	1-contig	uou	s sto	rage						
allocation – Single	Jser Contiguous Storage allocation- Fixed partition	multipr	ogra	mmii	1g –						
Variable partition mu	iprogramming.	1	-		-						
Unit:4	VIRTUAL STORAGE			15 h	ours						
Virtual Storage: Vir	ual Storage Management Strategies – Page Replace	ement	Strat	egies	—						

W Sc	orking Set	s – Demand Paging – Page Size. Processor Management: reemptive Vs Non-preemptive scheduling – Priorities – Deadlin	Job and Processor e scheduling.							
	U		0							
U	nit:5	DEVICE AND INFORMATION MANAGEMENT	15 hours							
De	evice and Ir	formation Management Disk Performance Optimization: Oper	ration of moving head							
dis	disk storage – Need for disk scheduling – Seek Optimization – File and Database Systems: File									
Sy	rstem – Fu	nctions – Organization – Allocating and freeing space – File	e descriptor – Access

Cour	se code		Linux and Shell Programming	L	Т	Р	С					
Core/	/Elective/S	upportive	Core : 6	4	0	0	4					
Pre	-requisite		Before starting the course students should have the basic knowledge about operating system and C programming.	Syllab Versio	ous on	2021-22 Onwards						
Cour	se Object	tives:										
The r	nain objec	ctives of this	s course are to:									
1.	Linux is a	multi-user	and multi-tasking operating system and after learning	g the co	ncep	ts of	an					
	operating	system										
2.	Student w	ill be able t	o write simple shell programming using Linux utilitie	es, pipes	and	filter	rs.					
3. The file system, process management and memory management are discussed.												
4. Various commands used by Linux shell is also discussed which makes the users to interact												
	with each	other.										
5.	Bourne sh	ell program	ming is dealt in depth which can be used to develop	applicat	ions							
Expe	cted Cou	rse Outcon	ies:									
Ont	the succes	sful comple	tion of the course, student will be able to:									
1	Describe	escribe the architecture and features of Linux Operating System and distinguish i										
	from oth	er Operatin	Operating System.									
2	Develop	Linux uti	inux utilities to perform File processing, Directory handling, User K2-K3									
	Manager	ment and di	nt and display system configuration									
3	Develop	shell script	s using pipes, redirection, filters and Pipes			K	2					
4	Apply a	nd change t	he ownership and file permissions using advance Un	ix		K	.3					
	commar	nds.										
5	Build Re	egular expr	ession to perform pattern matching using utilities and			K	.3-K6					
TZ 1	Impleme	ent shell scr	ipts for real time applications.	V(C

		in visual basic	and oops conc	cept.		Versi	on	Onw	ards	
Course Objectives	5:									
The main objective	s of this c	course are to:		. 1						
1. To develop ap	plication	s using Graphica	al User Interfa	ce tools.						
3. To design and	build dat	abase systems a	nd demonstrat	e their competen	ce.					
4. To create requ	irement a	nalysis and spec	cification for s	oftware application	ons.					
		· · ·		**						
Expected Course Outcomes:										
On the successful	completi	on of the course	, student will b	be able to:						
I Understand the concepts of Visual Basic.									1	
2 Learn the advantages of Controls in VB								K	2	
3 Design and	develop t	ne event- driven	applications u	sing Visual Basi	c fran	neworl	ζ.	K.	3	
4 Apply the ki	nowledge	of database me	thods.					K	4	
5 Learn basics of PL/SQL and develop programs using Cursors, Exceptions,						K	6			
Procedures and Functions K1 Remember: K2 Understand: K3 Apply: K4 Apply: K5 Evaluate: K6 Create								ata		
KI – Kemember,	K 2 – Ulk	ierstand, K 5 – F	Appry, IX4 – A	$\frac{11}{100}$	iluate,	<u>K0</u> –	CIC	ale		
Programs							3	6 hou	rs	
1. Construction	n of an Ar	ithmetic Calcula	ator (Simple).	9						
2. Writing sim	ple progr	ams using loops	s and decision-	making statemen	its.					
a. Generate	e Fibonac	ci series.	ER CONTRACT							
b. Find the	sum of N	numbers.	HIAR UN	C. OKAT						
3. Write a prog	gram to c	reate a menu an	d MDI Forms.	身と						
4. Write a prog	gram to d	isplay files in a	directory using	g DriveListBox, l	DirLis	tBox	and			
FileListBo	x control	and open, edit a	nd save text fi	le using Rich tex	t box	contro	1.			
5. Write a prog	gram to il	lustrate Commo	on Dialog Con	trol and to open,	edit aı	nd sav	e tez	kt file.		
6. Write a prog	gram to ii	nplement anima	ation using tim	ers.						
7. Write a sim	ple VB p	rogram to accep	t a number as	input and conver	t it int	0				
a. Binary	b. Octal	c. Hexa-decima	1							
8. Create a tab fields:	le for Em	ployee details v	vith Employee	Number as prim	ary k	ey and	fol	lowin	g	
Name, Des perform va operators.	Tields: Name, Designation, Gender, Age, Date of Joining and Salary. Insert at least ten rows and perform various queries using any one Comparison, Logical, Set, Sorting and Grouping operators.									
 9. Write a PL/SQL to update the rate field by 20% more than the current rate in inventory table which has the following fields: Prono, ProName and Rate. After updating the table a new field (Alter) called for Number of item and place for values for the new field without using PL/SQL block. 										
10. Write a PL/S	SQL prog	ram to impleme	ent the concept	of Triggers						

	11. Write a PL/SQL program to implement the concept "Procedures".									
	12. Write a VB program to manipulate the student mark list with oracle dat	abase connectivity								
	program.	_

Course code	ANIMATION TECHNIQUES	L	Т	P	С						
Core/Elective/Supportive	Elective : II	5	0	0	4						
Pre-requisite	Basic knowledge in 2D and 3D animations	Syllab Versio	ous on	2021 Onw	-22 ards						
Course Objectives:											
The main objectives of thi	s course are to:										
1. To learn the animation and its uses, types and techniques of animation.											
 To enable the students to learn 3D animation in FLASH. To understand the concept of motion in 3D animation 											
4. To make the student to create 3D animated movies.											
4. TO make the stude.	in to create 5D animated movies.										
Expected Course Outcor	Expected Course Outcomes:										
On the successful comple	etion of the course, student will be able to:										
1 Understand the basics of animation, need of animations, types of animation,											
techniques of anima	ation and special effects.	1.0		TZ							
2 Understand and apply animations in flash, working with time time-line and frame											
based animations, tween-based animations and layers.											
5 Knowledge on working with time-line, frame-based and tween-based animation.											
4 Understanding the motion caption, software to capture the motion.											
5 Apply the animation concepts and concept development to develop or create 3D K4-K											
K1 - Remember: K2 - U	nderstand: K3 - Apply: K4 - Analyze: K5 - Evaluate:	K6 – C	reat	e							
				-

Cyber Security course contents

- 1. **Course 1**: Information Security Fundamentals
- 2. Course 2: Cyber Security Introduction
- 3. Course 3: Technologies in Cybersecurity eco-system
- 4. **Course 4**: Core Threat Intelligence Engineering
- 5. Course 5: Core Vulnerability Management Engineering
- 6. Course 6: Core Penetration Management Techniques
- 7. Course 7: Core Cyber Exploitations
- 8. Course 8: Global Cyber Attack Trends
- 9. Course 9: Security Operations Management
- 10. Course 10: Incident Management
- 11. Course 11: Web and Mobile security Techniques
- 12. Course 12: Privacy and Online Rights
- 13. Course 13: Best Practices for keeping Systems and Data safe
- 14. **Course 14**: Cloud Security Engineering
- 15. Course 15: Industry Infosec Governance

```
---
```

Course 1 - Information Security Fundamentals : Broad Overview of Information Security will coverthe following topics:

- 1.1 Information Security, 1.2 Computer Security, 1.3 CIA Triad/Principles, 1.4 Non-repudiation, 1.5 Risk Management
- 1.6 Cryptography Basics, 1.7 Authentication, 1.8 Authorization, 1.9 Access Control, 1.10Security Policies
- 1.11 Security Auditing, 1.12 Security Laws and Regulations, 1.13 Defense, 1.14 SecurityMonitoring,
 1.15 ISO 27000 framework
- 1.16 Information Security use case demonstration as per industry verticals, 1.17 Policy, Process, Procedures, Standards, Guidelines, Baselines

- Case structure Objectives, Target audience, Executive summary, Background, Yourevaluation, Proposed solution, Conclusion
- Case Study #1: List Foundations of HealthCare Industries Page 79 of 90

- Patient medical records contain sensitive information that must be protected from unauthorized access.
- Case Study #2: List Strong Foundations of Fintech Industries
 - Financial institutions handle large amounts of sensitive financial data, such as accountnumbers and transaction history, which must be protected from cyber threats
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

Course 2 - Cyber Security Introduction : Broad Overview of Cyber Security will cover the

followingtopics:

2.1 Cybersecurity, 2.2 Cybers attacks, 2.3 Social Engineering, 2.4 Cybersecurity Defences (Firewall, AV, SIEM, Patch, Password etc), 2.5 Cloud security, 2.6 Endpoint security, 2.7 Mobile security, 2.8 Zero trust, 2.9 IOT, 2.10 Layers of cybersecurity, 2.11 Hacking, 2.12 Incident management, 2.13 Security operations

Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:

- Case Study #3: Define cyber security governance structure for CISO in bank
- Case Study #4: Define cyber security structure for CISO in Auto manufacturing
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

Course 3 - Technologies in Cybersecurity eco-system: Broad Overview of Technologies will cover thefollowing topics:

- 3.1 Network security Architecture and Standards, Wireless security, Network Vulnerabilities, Threats
 Password cracking, Spoofing, Packet sniffing, Port scanning, Poisoning
- 3.2 System security Asset classification, Asset accountability, Configuration management, Privilege access control, Virtualization security, System hardening, End-point security, System upgrades and patches, Backup and recovery, Systems Auditing, Threats – Denial of Service (DOS), DHCP spoofing, Dictionary attack, Email spoofing
- 3.3 Software security Secure Design, Secure Coding, Static Security, Dynamic Security, Open source governance, Software composition analysis, Log and audit trail, OWASP Top10 Threats
- SQL Injection, Cross Site Scripting (XSS), Cross Site Request Forgery (CSRF)
 - 3.4 Cryptography Basics Security by Obscurity, Cryptographic Keys, Asymmetric, Symmetric, Hashing, Page 80 of 90

Public Key Infrastructure (PKI), Challenges in cryptography

- 3.5 Application of Cryptography Virtual Private Network (VPN), Secure Socket Layer (SSL), Digital Signature
- 3.6 Cloud security Identity and Access management (IAM), Key management, Governance, Risk and Compliance (GRC), Legal, Data sovereignty, Business continuity, Disaster recovery, Cloud security models
- 3.7 Block chain security, 3.8 Zero Trust, 3.9 XDR, 3.10 AI, 3.11 MUD, 3.12 Context aware

Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:

- Case Study #5: What are the Fundamental Network protections used in Any Industry
 - Firewalls, IDS, IPS, VPN, Antivirus, SIEM
- Case Study #6: List methods to Secure Data in transit and Data at rest
 - Encryption, Hashing,
- Case Study #7: How many ways can you protect any user account in applications
 - 2FA, MFA, Password Management
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

Course 4 - Core Threat Intelligence Engineering: Broad Overview of threat intelligence will cover the following topics:

• 4.1 Threat model, 4.2 Tactical, operations and strategic threat intelligence, 4.3 How to detect, respond and defeat threats, 4.4 Adversary data, 4.5 Reactive and proactive threat approach , 4.6 IOC, 4.7 Cyber kill chain, . 4.8 MITRE ATT@ACK

- Case Study #8: How many Levels of User expertise are involved to form an Threat Intelteam
- Case Study #9: What are the roles included in Threat Intelligence at Industry level
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

 B.Sc. Computer Technology Syllabus w.e.f. 2023-2024 Batch - Affiliated Colleges - Annexure No.33B SCAA date: 18.05.2023
 Course 5 - Core Vulnerability Management Engineering: Broad Overview of Vulnerability

managementwill cover the following topics:

 5.1 what is vulnerability, Threats, Risks, Exploitation, 5.2 Computer ports / protocols, 5.3 Ethical hack, Recon, Enumeration, Port Scanning, 5.4 Tools, 5.5 Attack Toolset – Metasploit, Nessus, nmap, Burpsuite, 5.6 Basic defence measures - Antivirus, Intrusion Detection / Prevention systems

Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:

- Case Study #10: What are few examples of an Vulnerability as per Industry oriented applications
- Case Study #11: Explain RACI Matrix in banking
 environment
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

Course 6 - Core Penetration test techniques: Broad Overview of penetration test techniques will cover the following topics:

- 6.1 what is penetration testing, vulnerability, Threats, Risks, Exploitation, 6.2 Computer ports / protocols, 6.3 Port Scanning, 6.4 Tools, 6.5 Attack Toolset Metasploit, Nessus, nmap, Burpsuite, 6.6 Basic defence measures Antivirus, Intrusion Detection / Prevention systems,
- 6.7 Penetration test approach, tools, 6.8 Pen test reporting, 6.9 Pen test rules, 6.10 Gray box, White box, Black box , 6.11 Sniffing, 6.12 DOS, 6.12 Social engineering, 6.13 Session hijacking, SQL Injection

Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:

- Case Study #12: How to do network scanning in banking industry
- Case Study #13: How to do social engineering (email phishing) in auto manufacturing
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

Course 7 - Core Cyber Exploitations: Broad Overview of cyber exploitation will cover the

following topics:

7.1 Exploitation, 7.2 Types of exploits, 7.3 Identify, Protect, Detect, Respond, Recover, 7.3 Honey pot,
 7.4 Data collection, analytics 7.5 Proactive and reactive exploitation, 7.6 Red , blue team, and purple team, 7.7 Incident management, 7.8 Data breach, 7.9 Ransomware,

7.10 Zero day attack, 7.11 Man in the middle

Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:

- Case Study #14: Difference between Vulnerability and Exploitations. How to identifyexploitation in banking industry
- Case Study #15: What Network vectors are considered for exploitation. How to implement in healthcare
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

Course 8 – Global attack trends: Broad Overview of cyber-attack trends will cover the

followingtopics:

- 8.1 Past, present & future trends of cyber threat landscape (Worldwide)
- 8.2 Cybercrime landscape in Asia Pacific
- 8.3 Organizational processes, Security roles and responsibilities, Due care and Due diligence
- 8.4 Cybersecurity threats Malware, Viruses and Worms, Trojan horses, Botnets, Zero-dayexploits, Phishing, Spear phishing, Whaling, Social engineering, etc.
- 8.5 Risk management concepts, Personnel security policies, Information security training and awareness
- 8.6 Critical infrastructure protection, Privacy by design

Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:

- Case Study #16: Explain Ransomware behaviour and impact within the industries.
- Case Study #17: What is a Malware and how to setup malware protection in hospital
- Case Study #18: Will Linux and Mac have any Attacks and Malware. Consider ecommerceservices
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

Page 83 of 90

- Course 9 Security Operations Management : Broad Overview of SOC will cover the following topics:
 - 9.1 SOC security operations centre concept, 9.2 Logging, Attack methodology and monitoring,
 - 9.3 Incident detection and Reporting, 9.4 SIEM, 9.5 Threat intelligence feed , 9.6 24x7 monitoring

Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:

- Case Study #19: What is Security posture for any healthcare industry
- Case Study #20: What is SOC in food chain industry
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

 Course 10 – Security Incident Management
 : Broad Overview of incident management will cover the

 following topics:
 Completence

10.1 Incident handling and response, 10.2 Incident RACI, 10.3 Forensic package, critical incident package, 10.4 Malware incidents, 10.5 Email security and phishing incidents, 10.6 Threat reporting, 10.7 Third party incidents, 10.8 Feedback process, 10.9 TTX

- Case Study #21: What is Zero Day? Does it have any impact on any industry applications. Define process framework
- Case Study #22: How are Incidents managed for HealthCare, FinTech, SCADA and Automotive industries
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

Course 11 – Web and Mobile security Techniques: Broad Overview of web and mobile securitytechniques will cover the following topics:

- 11.1 Web environment setup for scan and tools, 11.2 Scan web application, 11.3 Exploit vulnerabilities, 11.4 Deep analysis, 11.5 Reporting
- 11.6 Mobile environment setup for scan and tools, 11.7 Scan mobile application, 11.8 Exploit vulnerabilities, 11.9 Deep analysis, 11.10 Reporting

Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:

- Cyber breach case study (Equifax, Uber, Target, Stuxnet, SWIFT)
- Case Study #23: What's the Top standard followed in Web Applications
- Case Study #24: What the Top standard followed in Mobile Applications
- Case Study #25: List secure frameworks used in Mobile App
 Development
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

Course 12 – Privacy and online rights: Broad Overview of privacy techniques will cover the

followingtopics:

• 12.1 Privacy concept, 12.2 Privacy regulations, 12.3 GDPR, 12.4 Online privacy challenges

12.5 Online marketing/ sales privacy challenges, 12.6 Privacy protection and penalties

- Cyber breach case study (Equifax, Uber, Target, Stuxnet, SWIFT)
- Case Study #26: What data is considered as Privacy issue in online ecommerce
- Case Study #27: Whats the impact if your company related data is available online?
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

Course 13 – Best Practices for keeping Systems and Data safe: Broad overview of Security best practices will cover the following topics:

- 13.1 Understand your data and risk, 13.2 Protect your systems, 13.3 Cyber Insurance, 13.4 AV, 13.5 Data leakage, 13.6 Security guidelines – NIST, ISO 27001, GDPR, 13.7 Risk Management Frameworks and Security Standards
 - NIST SP800-30: Evaluating security risks
 - ISO 27000 Information Security Management Standards (ISMS)
 - DO-178C Software Considerations in Airborne Systems and Equipment Certification
 - ISO/IEC 27034 Application security guidelines
 - SS 584 : Singapore Standard for Multi Tier Cloud Security

Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:

- Case Study #28: How can you assure your data is safe in Public network and corporatenetwork
- Case Study #29: List 3 simple methods to keep your system
 safe from malware
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

Course 14 – Cloud security engineering: Broad Overview of cloud security will cover the

followingtopics:

• 14.1 Cloud security fundamentals, 14.2 Cloud providers, 14.3 Tools for cloud security, 14.4 Cloud recovery, 14.5 Cloud Monitoring, 14.6 Cloud compliance, certification, audit and compliance, Pen test

Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:

- Case Study #30: How the Cloud services or applications can be targeted to hackers
- Case Study #31: What are the Different methods to store data safe
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

Page 86 of 90

Course 15 – Industry Infosec Governance: Broad Overview of Industry security governance will

coverthe following topics:

15.1 Industry roles and student skill identification, 15.2 Industry training, certification, 15.3 Industry career path, 15.4 How to become industry cybersecurity expert, 15.5 Job application process, 15.6 Salary / perks, 15.7 Working in healthcare industry

- Cyber breach case study (Equifax, Uber, Target, Stuxnet, SWIFT)
- Case Study #32: Abbreviated CIA and give one example for Healthcare industry
- Case Study #33: Are Policies, procedures and standards important to protect CIA for anIndustry
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

B.Sc. COMPUTER TECHNOLOGY

Syllabus (With effect from <u>2021 - 2022</u>)

DEPARTMENT OF <u>COMPUTER TECHNOLOGY</u>

Bharathiar University

(A State University, Accredited with "A" Grade by NAAC and 13th Rank among Indian Universities by MHRD-NIRF) Coimbatore 641 046, INDIA

BHARATHIAR UNIVERSITY :: COIMBATORE 641046 DEPARTMENT OF <u>COMPUTER TECHNOLOGY</u>

MISSION

- \checkmark To develop IT professionals with ethical and human values.
- ✓ To organize, connect, create and communicate mathematical ideas effectively, through industry 4.0.
- ✓ To provide a learning environment to enhance innovations, problem solving abilities, leadership potentials, team-spirit and moral tasks.
- ✓ To nurture the research values in the developing areas of Computer Science and interdisciplinary fields.
- ✓ Promote inter-disciplinary research among the faculty and the students to create state of art research facilities.
- \checkmark To promote quality and ethics among the students.
- \checkmark Motivate the students to acquire entrepreneurial skills to become global leaders.
