

Coimbatore - 641 046, Tamil Nadu, India

Program Educ	cational Objectives (PEOs)
The B. Sc. Mu	ultimedia and Web Technology program describe accomplishments that expected to attain within five to seven years after graduation
1	Acquire multiple skills that will enhance their employability in different segments of Animation, Gaming and Entertainment industry.
2	Understand the ongoing changing trends and keep them updated with the latest technology.
3	Use their critical thinking skills and problem solving strategies for overall development of the professional growth.
4	Graduates will have the expertise to be successful professionals in industry, government, academic research, entrepreneurial pursuit and consulting firms.
5	Graduates will excel in problem solving and programming skills in IT industries as well as in research institutions.

Program Spec	tific Outcomes (PSOs)
	essful completion of B.Sc. Multimedia and Web Technology program, the
students are ex	xpected to
1	students will be equipped with creative and technical skills in various
	domains of Animation, Gaming, VFX and Web technology
2	Apply the knowledge of mathematics, science, and web fundamentals and an engineering specialization to the solution of complex problems.
3	The ability to understand the evolutionary changes in computing, apply standard practices and strategies in software project development using open-ended programming environments to deliver a quality product for business success, real world problems and meet the challenges of the future.
4	Accept cross cultural, social, professional, legal and ethical issues prevailing in local and global industry.
5	Students will become expert in the specific domain of Computer Games and will be able to work in top computer games based web industries.

0	Outcomes (POs)
On succes	ssful completion of the B.Sc. Multimedia and Web Technology program
PO1	Disciplinary knowledge: Capable to apply the knowledge of mathematics, algorithmic principles and computing fundamentals in the modeling and design of computer based systems of varying complexity.
PO2	Scientific reasoning / Problem analysis : Ability to critically analyze, categorizes, formulate and solve the problems that emerges in the field of computer science.
PO3	Problem solving: Able to provide software solutions for complex scientific and business related problems or processes that meet the specified needs with appropriate consideration for the public health and safety and the cultural, societal and environmental considerations.
PO4	Environment and sustainability: Understand the impact of software solutions in environmental and societal context and strive for sustainable development.
PO5	Modern tool usage: Use contemporary techniques, skills and tools necessary for integrated solutions.
PO6	Ethics: Function effectively with social, cultural and ethical responsibility as an individual or as a team member with positive attitude.
PO7	Cooperation / Team Work: Function effectively as member or leader on multidisciplinary teams to accomplish a common objective.
PO8	Communication Skills: An ability to communicate effectively with diverse types of audience and also able to prepare and present technical documents to different groups.
PO9	Self-directed and Life-long Learning: Graduates will recognize the need for self-motivation to engage in lifelong learning to be in par with changing technology.
PO10	Enhance the research culture and uphold the scientific integrity and objectivity
	Bissiumong Quitight Foucate to ELEVATE

BHARATHIAR UNIVERSITY::COIMBATORE 641 046

B. Sc. <u>Multimedia and Web Technology</u> (CBCS PATTERN)

(For the students admitted from the academic year 2022-2023 and onwards)

Scheme of Examination

Course code		Programming Lab – JAVA	L	Т	Р	C
Core/Elective/	Supportive	Core Lab: 4	0	0	5	4
		Students should know about the OOPs concept	bus	2021	-22	
Pre-requisite		and basic knowledge in java theory.	Versi	on	Onw	ards
Course Object	tives:					
The main objec	ctives of this c	course are to:				
3. The main	objective of J	AVA Programming Lab is to provide the students a s	strong	four	datio	on
on program	mming concep	ots and its applications through hands-on training.				
4. To practic	e the Basic co	oncepts, Branching and Looping Statements and Strin	igs in	С		
programm	ning					
5. To imple	ment and ga	in knowledge in Arrays, functions, Structures, F	ointe	rs ar	nd F	ïle
handling	U					
C						
Expected Cou	rse Outcome	S:				
		on of the course, student will be able to:				
1 Underst	and the basic	concepts of Java Programming with emphasis on ethic	ics an	d	K1	, Kź
	es of professio					
2 Demons	strate the crea	tion of objects, classes and methods and the			ŀ	Κ2
-		or, methods overloading, Arrays, branching				
and loop						
		Design a page using AWT controls and Mouse Events	s in Ja	va	K2	, К.
		ent the concepts of code reusability and debugging. using Strings, Interfaces and Packages and applets			Ľ	<u>X3</u>
-					_	<u>K3</u>
	on Handling	ms using Multithreaded Programming and			ſ	13
	0	erstand; <b>K3</b> - Apply; <b>K4</b> - Analyze; <b>K5</b> - Evaluate; <b>K</b>	<b>6</b> - C1	reate		
		Statiunor 2. White				
Programs		subcare to elevate		36	6 hou	irs
0	va Application	is to extract a portion of a character string and print the	extrac			
2. Write a Jay	va Program to	implement the concept of multiple inheritance using In	terfac	es.		
3. Write a J	lava Program	to create an Exception called payout-of-bounds	and	thro	w th	ıe
exception.						
		o implement the concept of multithreading with the	use of	f any	thre	e
<u> </u>		d assign three different priorities to them.				
		o draw several shapes in the created windows. o create a frame with four text fields name, street,	city a	nd n	in co	de
	0	lso add a button called my details. When the but	•	-		
		to be appeared in the text fields.		. 0110	neu	100
		demonstrate the Multiple Selection List-box.				
	•	create a frame with three text fields for name, age a	and qu	alifi	catio	n
and a text	field for mult	iple line for address	-			
		o create Menu Bars and pull down menus.				
	-	to create frames which respond to the mouse clicks				
		mouse up, mouse down, etc., the corresponding	g mes	sage	to	be
displayed.						

positions.		
12. Write a Ja	va Program which open an existing file and append text to that f	ïle.

Course code		Introduction to PHP Programming	L	Т	P	С			
Core/Elective/S	Supportive	Skill based Subject – 1	5	0	0	3			
Pre-requisite		Students should have basic knowledge on web	Syllab			1-22			
Course Objec		page, web server and browser	Versio	on	Onv	vards			
0		s course are to:							
		wledge of students in web programming and make th	em to d	lo ele	gant				
		using Array class, OOPs concepts, etc.			Sum				
		to develop data centric web application using PHP at	nd SQL	ite.					
Expected Cou									
	1	tion of the course, student will be able to:							
1 Unders	tand the bas	sics of PHP.			K	1			
2 Unders	tand the p	rogramming concepts in PHP and working with	Dates	and	K	1-K3			
Times.									
3 Knowle	wledge on Array object, storing data in Arrays, processing Arrays with loops, K3-K4								
functio	ns of Array	class and implementing applications.							
4 Unders	tand the OC	Ps concepts, Files and Directories			K	1-K3			
5 Knowle	edge on wor	king database centric application using SQL, SQLite	, XML		K	1-K4			
and DC		A BOORD LA C							
K1 - Remem	ber; <b>K2</b> – U	nderstand; K <mark>3 – Apply; K4 – Anal</mark> yze; K5 – Evaluat	e; <b>K6</b> –	Crea	ate				
	1								
Unit:1		Introduction to PHP			15 ho				
		c development Concepts – Creating first PHP Scrip							
-	-	Data in variable – Understanding Data types – S ing Constants – Manipulating Variables with Operato	-	and C	nec	King			
variables Data	<u>a types – Us</u>	ing constants – Maniputating variables with Operate	<i>л</i> s.						
Unit:2		Programming in PHP			12 h	ours			
	rogram Flo	ow: Writing Simple Conditional Statements - Writing	iting M						
-	-	- Repeating Action with Loops - Working with	-			-			
Functions.									
Unit:3		Working with Arrays, Dates and Times				ours			
0	•	toring Data in Arrays – Processing Arrays with Log - Working with Array Functions – Working with Da	1			s –			
USINg Arrays	with Forms	5 - WORKING WITH AFRAY FUNCTIONS – WORKING WITH Da	les and	1 11110	28.				
8 ··· j ~									
				1	5 h	ours			
Unit:4	OOPs Co	ncepts and Working with Files and Directories	ng Cla		1 <mark>5 h</mark> – U				
Unit:4 Using Functi	<b>OOPs Co</b> ons and C			sses	– U	sing			
Unit:4 Using Functi	OOPs Co ons and C OP Concep	ncepts and Working with Files and Directories lasses: Creating User-Defined Functions - Creati		sses	– U	sing			
Unit:4 Using Functi Advanced O Processing D	OOPs Co ons and C OP Concep	ncepts and Working with Files and Directories lasses: Creating User-Defined Functions - Creati ts. Working with Files and Directories: Reading		sses Vriti	– U ng F	sing iles-			
Unit:4 Using Functi Advanced O Processing D Unit:5	OOPs Co ons and C OP Concep irectories.	ncepts and Working with Files and Directories lasses: Creating User-Defined Functions - Creati ts. Working with Files and Directories: Reading Working with Database and SQL	Files, V	sses Vritin 1	– U ng F 5 ho	sing iles-

### **Course 1** - Information Security Fundamentals : Broad Overview of Information Security will coverthe following topics:

### • 1.1 Information Security, 1.2 Computer Security, 1.3 CIA Triad/Principles, 1.4 Non-repudiation, 1.5 Risk

- 1.6 Cryptography Basics, 1.7 Authentication, 1.8 Authorization, 1.9 Access Control, 1.10Security Policies
- 1.11 Security Auditing, 1.12 Security Laws and Regulations, 1.13 Defense, 1.14 SecurityMonitoring, 1.15 ISO 27000 framework
- 1.16 Information Security use case demonstration as per industry verticals, 1.17 Policy, Process, Procedures, Standards, Guidelines, Baselines

### **Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:**

- Case structure Objectives, Target audience, Executive summary, Background, Yourevaluation, Proposed solution, Conclusion
- Case Study #1: List Foundations of HealthCare Industries

Management

- Patient medical records contain sensitive information that must be protected fromunauthorized access.
- Case Study #2: List Strong Foundations of Fintech Industries
  - Financial institutions handle large amounts of sensitive financial data, such as accountnumbers and

#### Page 79 of 89

transaction history, which must be protected from cyber threats

- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

_____

### **Course 2** - Cyber Security Introduction : Broad Overview of Cyber Security will cover the following topics:

• 2.1 Cybersecurity, 2.2 Cybers attacks, 2.3 Social Engineering, 2.4 Cybersecurity Defences (Firewall, AV, SIEM, Patch, Password etc), 2.5 Cloud security, 2.6 Endpoint security, 2.7 Mobile security, 2.8 Zero trust, 2.9 IOT, 2.10 Layers of cybersecurity, 2.11 Hacking, 2.12 Incident management, 2.13 Security operations

### **Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:**

- Case Study #3: Define cyber security governance structure for CISO in bank
- Case Study #4: Define cyber security structure for CISO in Auto manufacturing
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

### **Course 3** - Technologies in Cybersecurity eco-system: Broad Overview of Technologies will cover the following topics:

- 3.1 Network security Architecture and Standards, Wireless security, Network Vulnerabilities, Threats Password cracking, Spoofing, Packet sniffing, Port scanning, Poisoning
- 3.2 System security Asset classification, Asset accountability, Configuration management, Privilege access control, Virtualization security, System hardening, End-point security, System upgrades and patches, Backup and recovery, Systems Auditing, Threats Denial of Service (DOS), DHCP spoofing, Dictionary attack, Email spoofing
- 3.3 Software security Secure Design, Secure Coding, Static Security, Dynamic Security, Opensource governance, Software composition analysis, Log and audit trail, OWASP Top10 Threats

- SQL Injection, Cross Site Scripting (XSS), Cross Site Request Forgery (CSRF)

- 3.4 Cryptography Basics Security by Obscurity, Cryptographic Keys, Asymmetric, Symmetric, Hashing, Public Key Infrastructure (PKI), Challenges in cryptography
- 3.5 Application of Cryptography Virtual Private Network (VPN), Secure Socket Layer (SSL), Digital Signature
- 3.6 Cloud security Identity and Access management (IAM), Key management, Governance, Risk and Compliance (GRC), Legal, Data sovereignty, Business continuity, Disaster recovery, Cloud security models
- 3.7 Block chain security, 3.8 Zero Trust, 3.9 XDR, 3.10 AI, 3.11 MUD, 3.12 Context aware

### Case Study / Demo / Role Play / Discussion / Quiz will cover the following Page 80 of 89

### topics:

- Case Study #5: What are the Fundamental Network protections used in Any Industry
  - Firewalls, IDS, IPS, VPN, Antivirus, SIEM
- Case Study #6: List methods to Secure Data in transit and Data at rest
  - Encryption, Hashing,
- Case Study #7: How many ways can you protect any user account in applications
  - 2FA, MFA, Password Management
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

------

### **Course 4** - Core Threat Intelligence Engineering: Broad Overview of threat intelligence will cover the

#### following topics:

4.1 Threat model, 4.2 Tactical, operations and strategic threat intelligence, 4.3 How to detect, respond and defeat threats, 4.4 Adversary data, 4.5 Reactive and proactive threat approach , 4.6 IOC, 4.7 Cyber kill chain,. 4.8 MITRE ATT@ACK

# Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:

- Case Study #8: How many Levels of User expertise are involved to form an Threat Intelteam
- Case Study #9: What are the roles included in Threat Intelligence at Industry level
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

#### _____

### **Course 5 -** Core Vulnerability Management Engineering: Broad Overview of Vulnerability management will cover the following topics:

 5.1 what is vulnerability, Threats, Risks, Exploitation, 5.2 Computer ports / protocols, 5.3 Ethical hack, Recon, Enumeration, Port Scanning, 5.4 Tools, 5.5 Attack Toolset – Metasploit, Nessus, nmap, Burpsuite, 5.6 Basic defence measures - Antivirus, Intrusion Detection / Prevention systems

# **Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:**

• Case Study #10: What are few examples of an Vulnerability as per Industry oriented applications

### Page 81 of 89

- Case Study #11: Explain RACI Matrix in banking environment
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

------

**Course 6 -** Core Penetration test techniques: Broad Overview of penetration test techniques will cover the following topics:

- 6.1 what is penetration testing, vulnerability, Threats, Risks, Exploitation, 6.2 Computer ports / protocols, 6.3 Port Scanning, 6.4 Tools, 6.5 Attack Toolset – Metasploit, Nessus, nmap, Burpsuite, 6.6 Basic defence measures -Antivirus, Intrusion Detection / Prevention systems,
- 6.7 Penetration test approach, tools, 6.8 Pen test reporting, 6.9 Pen test rules, 6.10 Gray box, White box, Black box , 6.11 Sniffing, 6.12 DOS, 6.12 Social engineering, 6.13 Session hijacking, SQL Injection

### Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:

- Case Study #12: How to do network scanning in banking industry
- Case Study #13: How to do social engineering (email phishing) in auto manufacturing
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

**Course 7** - Core Cyber Exploitations: Broad Overview of cyber exploitation will cover the following topics:

- 7.1 Exploitation, 7.2 Types of exploits, 7.3 Identify, Protect, Detect, Respond, Recover, 7.3 Honey pot, 7.4 Data collection, analytics 7.5 Proactive and reactive exploitation, 7.6 Red , blue team, and purple team, 7.7 Incident management, 7.8 Data breach, 7.9 Ransomware,
- 7.10 Zero day attack, 7.11 Man in the middle

# **Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:**

- Case Study #14: Difference between Vulnerability and Exploitations. How to identifyexploitation in banking industry
- Case Study #15: What Network vectors are considered for

#### Page 82 of 89

### exploitation. How to implement in healthcare

- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

-----

#### Course 8 – Global attack trends: Broad Overview of cyber-attack trends will cover the followingtopics:

- 8.1 Past, present & future trends of cyber threat landscape (Worldwide)
- 8.2 Cybercrime landscape in Asia Pacific
- 8.3 Organizational processes, Security roles and responsibilities, Due care and Due diligence
- 8.4 Cybersecurity threats Malware, Viruses and Worms, Trojan horses, Botnets, Zero-dayexploits, Phishing, Spear phishing, Whaling, Social engineering, etc.
- 8.5 Risk management concepts, Personnel security policies, Information security training and awareness
- 8.6 Critical infrastructure protection, Privacy by design

### Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:

- Case Study #16: Explain Ransomware behaviour and impact within the industries.
- Case Study #17: What is a Malware and how to setup malware protection in hospital
- Case Study #18: Will Linux and Mac have any Attacks and Malware. Consider ecommerceservices
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

**Course 9** – Security Operations Management : Broad Overview of SOC will cover the following topics:

9.1 SOC security operations centre concept, 9.2 Logging, Attack methodology and monitoring,

9.3 Incident detection and Reporting, 9.4 SIEM, 9.5 Threat intelligence feed , 9.6 24x7monitoring

# **Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:**

• Case Study #19: What is Security posture for any healthcare industry

### • Case Study #20: What is SOC in food chain industry

- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion

#### Page 83 of 89

Quiz

-----

**Course 10 –** Security Incident Management and Overview of incident management will cover the

#### following topics:

 10.1 Incident handling and response, 10.2 Incident RACI, 10.3 Forensic package, critical incident package, 10.4 Malware incidents, 10.5 Email security and phishing incidents, 10.6 Threat reporting, 10.7 Third party incidents, 10.8 Feedback process, 10.9 TTX

### **Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:**

- Case Study #21: What is Zero Day? Does it have any impact on any industry applications. Define process framework
- Case Study #22: How are Incidents managed for HealthCare, FinTech, SCADA and Automotive industries
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

### **Course 11** – Web and Mobile security Techniques: Broad Overview of web and mobile security techniques will cover the following topics:

- 11.1 Web environment setup for scan and tools, 11.2 Scan web application, 11.3 Exploitvulnerabilities, 11.4 Deep analysis, 11.5 Reporting
- 11.6 Mobile environment setup for scan and tools, 11.7 Scan mobile application, 11.8 Exploitvulnerabilities, 11.9 Deep analysis, 11.10 Reporting

# **Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:**

- Cyber breach case study (Equifax, Uber, Target, Stuxnet, SWIFT)
- Case Study #23: What's the Top standard followed in Web Applications
- Case Study #24: What the Top standard followed in Mobile Applications
- Case Study #25: List secure frameworks used in Mobile App Development
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion

#### Page 84 of 89

Quiz

-----

Course 12 – Privacy and online rights: Broad Overview of privacy techniques will cover the following topics:

• 12.1 Privacy concept, 12.2 Privacy regulations, 12.3 GDPR, 12.4 Online privacy challenges

12.5 Online marketing/ sales privacy challenges, 12.6 Privacy protection and penalties

### **Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:**

- Cyber breach case study (Equifax, Uber, Target, Stuxnet, SWIFT)
- Case Study #26: What data is considered as Privacy issue in online ecommerce
- Case Study #27: Whats the impact if your company related data is available online?
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

**Course 13** – Best Practices for keeping Systems and Data safe: Broad overview of Security best practices will cover the following topics:

- 13.1 Understand your data and risk, 13.2 Protect your systems, 13.3 Cyber Insurance, 13.4 AV, 13.5 Data leakage , 13.6 Security guidelines NIST, ISO 27001, GDPR, 13.7 Risk Management Frameworks and Security Standards
  - NIST SP800-30: Evaluating security risks
  - ISO 27000 Information Security Management Standards (ISMS)
  - DO-178C Software Considerations in Airborne Systems and Equipment Certification
  - ISO/IEC 27034 Application security guidelines
  - SS 584 : Singapore Standard for Multi Tier Cloud Security

### **Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:**

- Case Study #28: How can you assure your data is safe in Public network and corporatenetwork
- Case Study #29: List 3 simple methods to keep your system safe from malware
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

Course 14 – Cloud security engineering: Broad Overview of cloud security will cover the following

topics:

 14.1 Cloud security fundamentals, 14.2 Cloud providers, 14.3 Tools for cloud security, 14.4 Cloud recovery, 14.5 Cloud Monitoring, 14.6 Cloud compliance, certification, audit and compliance, Pen test

### **Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:**

- Case Study #30: How the Cloud services or applications can be targeted to hackers
- Case Study #31: What are the Different methods to store data safe
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

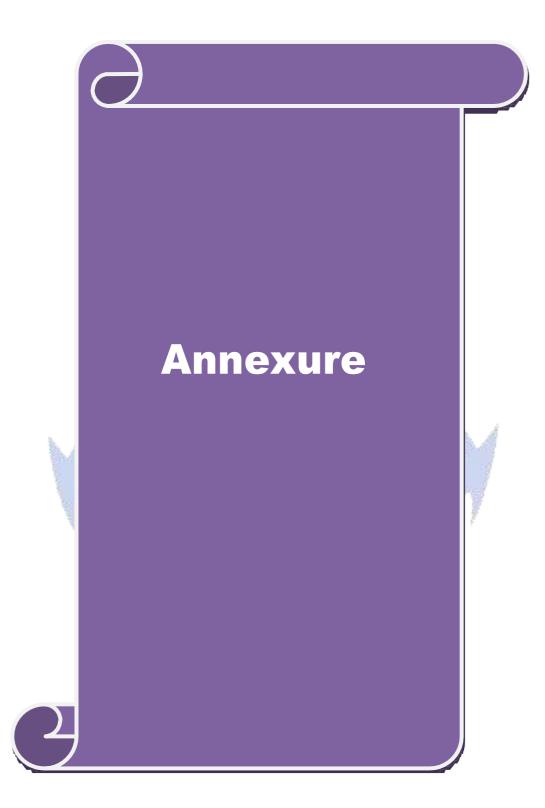

Course 15 – Industry Infosec Governance: Broad Overview of Industry security governance will coverthe

#### following topics:

15.1 Industry roles and student skill identification, 15.2 Industry training, certification, 15.3 Industry career path, 15.4 How to become industry cybersecurity expert, 15.5 Job application process, 15.6 Salary / perks, 15.7 Working in healthcare industry

# **Case Study / Demo / Role Play / Discussion / Quiz will cover the following topics:**

- Cyber breach case study (Equifax, Uber, Target, Stuxnet, SWIFT)
- Case Study #32: Abbreviated CIA and give one example for Healthcare industry
- Case Study #33: Are Policies, procedures and standards important to protect CIA for anIndustry
- Demo
- Scenario based role play (Cybersecurity strategy development, Incident response plan)
- Group discussion
- Quiz

### **B.Sc.** MULTIMEDIA AND WEB TECHNOLOGY

### Syllabus (With effect from <u>2021 -2022</u>)

### DEPARTMENT OF <u>COMPUTER TECHNOLOGY</u>

Bharathiar University (A State University, Accredited with "A" Grade by NAAC and 13th Rank among Indian Universities by MHRD-NIRF) Coimbatore 641 046, INDIA

### **BHARATHIAR UNIVERSITY :: COIMBATORE 641046 DEPARTMENT OF** <u>MULTIMEDIA AND WEB TECHNOLOGY</u>

### MISSION

- $\checkmark$  To develop IT professionals with ethical and human values.
- ✓ To organize, connect, create and communicate mathematical ideas effectively, through industry 4.0.
- ✓ To provide a learning environment to enhance innovations, problem solving abilities, leadership potentials, team-spirit and moral tasks.
- ✓ To nurture the research values in the developing areas of Computer Science and interdisciplinary fields.
- ✓ Promote inter-disciplinary research among the faculty and the students to create state of art research facilities.
- $\checkmark$  To promote quality and ethics among the students.
- $\checkmark$  Motivate the students to acquire entrepreneurial skills to become global leaders.
