

Coimbatore - 641 046, Tamil Nadu, India

Program	Educational Objectives (PEOs)
The M.S.	c. SS programdescribe accomplishments that graduates are expected to attain within
five to se	ven years after graduation
PEO1	Gradates would be software professionals deploying technical skills to solve industry related problems.
PEO2	Graduates will contribute towards the society with responsibility
PEO3	Graduates will work towards enhancing research, academics, industry and government.

Program	Program Specific Outcomes (PSOs)							
After the successful completion of M.Sc. SS program, the students are expected to								
PSO1	To apply knowledge gained to solve computational tasks related to various disciplines.							
PSO2	To design software solutions for developing complex software and hardware problems using advanced techniques.							
PSO3	To work as a effective leader and with team spirit with professional ethics and managerial skills to manage diverse projects.							

Program	n Outcomes (POs)
On succe	ssful completion of the M.Sc. SSprogram
PO1	Develop creativity and Problem Solving skills with the knowledge of Computing and Mathematics.
PO2	Ability to develop and carry out experiments, interpret and infer data
PO3	Design algorithms and develop software to aid solutions to industry and governments.
PO4	Review the latest technology and tool handling mechanism.
PO5	Analyses the outcome to solve global environment related issues.
PO6	Apply the knowledge in lifelong learning journey to equip themselves.
PO7	Identify the perspective of business practices, risks and limitations.
PO8	Work with professional and ethical values.
PO9	Formulate the responsibilities of human rights and entrepreneurial spirit.
PO10	Understand the methods to communicate effectively and work collectively.
	COLONDAR DALLAS LOS

BHARATHIAR UNIVERSITY:: COIMBATORE. M.Sc. SOFTWARE SYSTEM

(Affiliated Colleges - Effective For the candidates admitted during the academic year 2023 – 2024 & onwards)

Core/Elective/	Supportive	Core	4			4
Pre-requisit		This course requires that the students are familiar to solve the linear equations and to plot the points in graph.	Sylla Versi		2021	
Course Object						
The main object						
		to a linear problem.				
		is for planning of inventory needs. dealing with the waiting line, the arrival of units or p	person	s rec	luirin	g
		of Mathematics in industry, decision making and re- trol of projects.	al life.			
Expected Cou	rse Outcome	s:				
-		tion of the course, student will be able to:				
	1	o operational research models from the verbal descri	ption		K4,K	6
of the re	al system.	-	-		,	
2 Unders problem		nematical tools that are needed to solve optimization	1		K2,K	.5
		ake rational decision.			K3,K	6
4 Know	basic ideas of	project management techniques.			K1,K	3
5 Analyze	the problem,	and establish the maximization of profits.			K4,K	5
K1 - Remem	ber; K2 - Un	derstand; K3 - Apply; K4 - Analyze; K5 - Evaluate	; K6 –	Crea	ate	
Unit:1	I	INEAR PROGRAMMING PROBLEM		12	hou	rs
Linear program	nming - Gr	aphical method for Two Dimensional problems	- Ce	ntral		
problem of LP	- Various de	finitions - Statements of basic theorems and propert	ies - F	hase		
I and phase II o	-	IS TRATHIAD INNER S				
	-	al and Primal - Dual Simplex Method - Sensi its Solution - Assignment problem and its solution.	tivity	Ana	lysis	-
Unit:2		EUING AND REPLACEMENT THEORY		12	hou	rs
		tics of Queuing systems - Steady state M/M/l, MIM	11 1 K.	14	nou	15
and M/M/(Que			, , ,			
Replacement th Group Replace	• •	ement of items that deteriorate - Replacement of ite	ms tha	t fail	-	
Unit:3		INVENTORY THEORY		12	hou	rs
	ory: Costs in	volved in Inventory Problems - Single item deter	minist			
	•	vithout Shortages and With Shortages having produ				
and Finite.						
Unit:4		DECISION MAKING PROBLEM			hou	rs
	U	under uncertainty, under certainty and under risk - I formation and Imperfect Information.	Decisio	on tre	es-	
Unit:5		PERT AND CPM		11	hou	rc
	M : Arrow Ne	etworks - Time Estimates - Earliest Expected Time,	Lates			
occurrence tim of Projects - C	e and slack - Calculations of	Critical Path - Probability of meeting Scheduled day on CPM Networks - Various Floats for Activities on Time cost trace off curve - Project Time Cost	ate of - Cri	comj tical	pletic path	on -
Selection of Sc	heduled base	d on Cost Analysis.

Course code		E.2.1 GREEN COMPUTING	L	Τ	P	C		
Core/Elective/S	upportive	Elective II	4		-	4		
Pre-requisite		Students should know the use of Green IT Strategies and metrics for ICT development.	Sylla Vers		202			
			v er s	ion	202	1-22		
Course Objecti	ives:							
		his course are to:						
	-	use of cloud resources						
		gy optimization are implemented in operating system	throug	;h Gr	een			
	g technique							
	use of haz	zardous materials, maximize energy efficiency during t	the pro	oduct	'S			
lifetime	cc		1					
-		ent and environmentally sound components, computers	s and s	serve	rs			
		ciples and practices of Green IT.						
Expected Cour								
	÷	pletion of the course, student will be able to:						
		sic concepts to increase the product's life.				2		
2 Underst	and the co	ncepts and create applications and applets			K	.2		
3 Analyze en hardware l		ervation by application of different techniques at softw	vare ar	nd	K	[4		
4 Create C levels.	4 Create Optimizations for energy conservation can be made at hardware and software							
5 Apply th	ie concept	of Green computing in real time applications			K	3		
		Inderstand; K3 - Apply; K4 - Analyze; K5 - Evaluate;	K6 - (Crea	te			
Unit:1		Fundamentals of Green IT			hou	rc		
	f Green IT	:Business, IT, and the Environment – Green computin						
		n IT Strategies: Drivers, Dimensions, and Goals						
		olicies, Practices, and Metrics - Approaches to						
		ompiler Optimization - Product longevity - Softw						
consumption - it						0.		
Unit:2		Green Assets and Modeling		15	hou	rs		
Green Assets a	nd Modeli	ng : Green Assets: Buildings, Data Centers, Netwo	orks, a	nd I	Devic	es –		
			aborat					
Enterprise Arch	itecture –	Environmental Intelligence - Green Supply Chains -	- Gree	en In	form	ation		
Systems: Desigr	n and Deve	lopment Models.						
Unit:3		Grid Framework		15	hou	rs		
Grid Framewor	rk :Virtua	lizing of IT systems - Role of electric utilitie	es, Te	eleco	mmu	ting		
teleconferencing	g and telep	porting - Materials recycling - Best ways for Green	n PC	– Gi	reen	Data		
center – Green C	Grid frame	work.						
Unit:4		Green Compliance and Green Mobile		15	hour	rs		
-		Green Mobile :Socio-cultural aspects of Green IT						
	-	- Green Compliance: Protocols, Standards, and Audits		-				
	-	Future - Green mobile - optimizing for minimizing ba	attery	cons	umpt	ion -		
	and Spatia	1 Data Mining Materials recycling.						
Unit:5		Case Studies			hour			
		mentally Responsible Business Strategies (ERBS) – C		-				
		ies – Applying Green IT Strategies and Applications to	o a Ho	me,	Hosp	ital,		
Packaging Indus	stry and Te	lecom Sector.

Course code		DIGITAL IMAGE PROCESSING	L	Т	P	C			
Core/Elective/	Supportive	Elective III	4			4			
Pre-requisit		Students to learn the fundamentals of Digital Image Processing, image compression and segmentation	Syllat Versi		2021	-22			
Course Object									
 The main objectives of this course are to: 1. Learn basic image processing techniques for solving real problems. 2. Gain knowledge in image transformation and Image enhancement techniques. 3. Learn Image compression and Segmentation procedures. 									
Expected Cou									
On the succe	ssful comple	etion of the course, student will be able to:							
1 Understand the fundamentals of Digital Image Processing									
² image a	equisition, ir	athematical foundations for digital image repre- mage transformation, and image enhancement		-	K2,	K3			
3 Apply, problem		Implement and get solutions for digital image p	process	ing	K3,	K4			
4 Apply t	he concepts	of filtering and segmentation for digital image ret	rieval		K4,	K5			
ר <u>ר</u>	the concep ent manner	ts of Multi-resolution process and recognize the	objects	s in	K5,	K6			
K1 - Remem	ber; K2 - U	nderstand; K3 - Apply; K4 - An alyze; K5 - Evalu	iate; K	6 - C	reate				
Unit:1		INTRODUCTION			15 ho				
	quisition – l	f Visual perception – Light and the electromagne Image sampling and Quantization – Some Basic ar operations.							
		Que Coimbatore Co							
Unit:2	· ·	IMAGE ENHANCEMENT			<u>15 ho</u>				
Transformation	as – Histogra al filtering	the spatial domain:- Background – some am Processing – Enhancement using Arithmetic – Smoothing spatial filters – Sharpening spatial ds.	/ Logi	c op	eration	18 –			
Unit:3		IMAGE RESTORATION			15 ho	ours			
Unit:3IMAGE RESTORATION15 hoursImage Restoration: A model of the Image Degradation / Restoration Process – Noise models – Restoration is the process of noise only – Spatial Filtering – Periodic Noise reduction by frequency domain filtering – Linear, Portion – Invariant Degradations – Estimating the degradation function – Inverse filtering – Minimum mean square Error Filtering – Constrained least squares filtering – Geometric mean filter – Geometric Transformations.									
Unit:4		IMAGE COMPRESSION			13 ho	ours			
Image Compre		lamentals – Image compression models – Eleression – Lossy compression – Image compression		of In					
Unit:5		IMAGE SEGMENTATION			15 ho	ours			
	tation: Dete	ction and Discontinuities – Edge Linking and B	ounda						
		sed segmentation – Segmentation by Morphologi							

use	of motion ir	n segmentation.

Course code		BLOCK CHAIN TECHNOLOGY	L	Т	Р	C		
Core/Elective/S	upportive	Elective			4			
Pre-requisit		This course requires that the students are familiar about the block chain technologySyllabus Version						
Course Object								
The main object	ctives of thi	s course are to:						
		mentals of block chain and cryptocurrency.						
		ence and role of block chain in various other fi	elds.					
	•	es and its significance.						
4. Identify p	roblems &c	hallenges posed by Block Chain.						
Expected Cou	rse Outcor	nes:						
		letion of the course, student will be able to:						
		hain technology and crypto currency			K1,	K2		
		ng mechanism in block chain				K2		
A pply ap		ecurity measures, and various types of service	e that allo	XX 7		<u>K</u> 2		
1	-	ransact with bitcoins	s that and	vv	K3,	K4		
		Block chain in health care industry			K4,	K5		
	-	ivacy, and efficiency of a given Block chain s	vstem		K5,			
		Jnderstand; K3 - Apply; K4 - Analyze; K5 - E		<u> </u>

M.Sc. SOFTWARE SYSTEM

Syllabus (With effect from 2021 -2022)

Program Code

DEPARTMENT OF COMPUTER SCIENCE MISSION

To educate, articulate students to apply knowledge in software systems and make them a successful, effective problem solvers and continuous learners who would contribute to the society.

ELECTIVE- I (VISEMESTER)

- 1.1 Principles of Programming Languages
- 1.2 PCTestingandTrouble Shooting
- 1.3 E-Commerce

ELECTIVE- II (VIIISEMESTER)

- 2.1 Green Computing
- 2.2 Embedded Systems
- 2.3 Cloud Computing

ELECTIVE-III (IXSEMESTER)

- 3.1 SoftwareProject Management
- 3.2Internet of Things
- 3.3 DigitalImageProcessing
- 3.4 Critical Thinking, Design Thinking and Problem Solving

ELECTIVE-IV (IX-SEMESTER)

- 4.1 Mobile Application Development
- 4.2 Soft Computing
- 4.3 BigDataAnalytics
- 4.4 Block Chain Technology
