## M.Sc. Zoology

# **Syllabus**

## **AFFILIATED COLLEGES**

**Program Code: 32F** 

2023 - 2024 onwards

## BHARATHIAR UNIVERSITY

(A State University, Accredited with "A++" Grade by NAAC, Ranked 21st among Indian Universities by MHRD-NIRF)

Coimbatore - 641 046, Tamil Nadu, India

| Program Educational Objectives (PEOs) |   |  |  |  |  |  |
|---------------------------------------|---|--|--|--|--|--|
|                                       | The <b>M. Sc. Zoology</b> program describe accomplishments that graduates are expected toattain within five to seven years after graduation   |  |  |  |  |  |
| PEO1                                  | M.Sc., graduates can take up teaching profession. They can teach biology to the undergraduates and school children  |  |  |  |  |  |
| PEO2                                  | They can involve in domestication of animals by keeping profitable petshops and they can become animal trainers too.  |  |  |  |  |  |
| PEO3                                  | They can equip themselves to work in the fields of aquaria, poultry, piggery, pisciculture, etc   |  |  |  |  |  |
| PEO4                                  | They can create public awareness on environment, pollutions and ecosystem through social media, industrial sectors and pollution control boards and seek jobs in public concerns and NGOs.          |  |  |  |  |  |
| PEO5                                  | They can find employment in farms, zoological parks, museums and zoos by developing personal skills to conserve the animals and nature.   |  |  |  |  |  |
| PEO6                                  | They can enter into biotechnology and microbiology companies by acquiring laboratory skills.  |  |  |  |  |  |
| PEO7                                  | They can earn and shine in agriculture and farming through 'Integrated farming management' where animal wastes could be turned into wealth.   |  |  |  |  |  |
| PEO8                                  | They can get opportunity to work in veterinary sector, wild life conservator and forestry jobs.   |  |  |  |  |  |
| PEO9                                  | They can become medical laboratory technicians and find jobs in clinical labs and hospitals as health workers.  |  |  |  |  |  |
| PEO10                                 | They can become scientists & researchers by doing Ph.D. and they can compete for competitive examinations like TNPSC, NET, SET, IAS, IFS and any equivalent exams with strong knowledge of biology. |  |  |  |  |  |
|                                       | EDUCATE TO ELEVATE  |  |  |  |  |  |

| Program   | Program Specific Outcomes (PSOs)   |  |  |  |  |  |  |
|-----------|--|--|--|--|--|--|--|
| After the | After the successful completion of <b>Zoology</b> program, the students are expected to  |  |  |  |  |  |  |
| PSO1      | Elucidate animal-animal, animal-plant, animal-microbe interactions and theirconsequences to animals, humans and the environment.   |  |  |  |  |  |  |
| PSO2      | Develop deeper understanding of key concepts of biology at biochemical, molecular and cellular level, physiology and reproduction at organismal level, and ecological impact on animal behavior. |  |  |  |  |  |  |
| PSO3      | Strengthen the genetics and cytogenetic principles in light of advancements byunderstanding human genome and genomes of other model organisms.   |  |  |  |  |  |  |
| PSO4      | Describe the expression of genome, revealing multiple levels of regulation and strategies to manipulate the same in the benefit of the mankind.  |  |  |  |  |  |  |
| PSO5      | Learn handling of DNA sequence, data and its analysis which equip students to get employed in R&D industry involved in DNA sequencing services, diagnostics, and micro biome analysis.           |  |  |  |  |  |  |
| PSO6      | Understand relationships of variations in phenotypic expression of genomes andtheir genome wide interaction with other organisms.  |  |  |  |  |  |  |
| PSO7      | Develop an understanding of zoological science for its application in medicalentomology, apiculture, aquaculture, agriculture and modern medicine.   |  |  |  |  |  |  |
| PSO8      | Develop theoretical and practical knowledge in handling the animals and using them as model organism.  |  |  |  |  |  |  |
| PSO9      | Maintain high standards of learning in animal sciences   |  |  |  |  |  |  |
| PSO10     | Focus to prepare them with research-oriented approach in frontierareas of research in Zoology and preparing them for advancements  |  |  |  |  |  |  |

| Program Outcomes (POs) |  |  |  |  |  |  |
|------------------------|--|--|--|--|--|--|
| On succe               | On successful completion of the M. Sc. Zoology program   |  |  |  |  |  |
| PO1                    | Expected to attain written skills via assignment, projects, reports & seminar  |  |  |  |  |  |
| PO2                    | To develop presentation & communication skills through research  |  |  |  |  |  |
| PO3                    | To attain analytical skills like understanding & interpreting the results  |  |  |  |  |  |
| PO4                    | To know the basics of instrumentation  |  |  |  |  |  |
| PO5                    | To develop taxonomical skills by identifying the animal species  |  |  |  |  |  |
| PO6                    | To learn about animal biodiversity, bioinformatics and ecosystem   |  |  |  |  |  |
| PO7                    | To understand human beings by studying biology, anatomy, physiology etc.,  |  |  |  |  |  |
| PO8                    | To create an awareness of the impact of Zoology on the environment, society, and development outside the scientific community.             |  |  |  |  |  |
| PO9                    | To study and understand the classification of whole phyla included in Non chordates and Chordates with the help of charts/models/pictures. |  |  |  |  |  |
| PO10                   | To inculcate the scientific temperament in the students and outside the Scientific community.  |  |  |  |  |  |

#### BHARATHIAR UNIVERSITY: COIMBATORE 641 046 M.Sc., ZOOLOGY DEGREE COURSE (COLLEGES - CBCS PATTERN) REVISED SCHEME OF EXAMINATION

(For the students admitted during the academic year 2023 – 24 onwards)

| Elective-II<br>Choose A or B | A       | 1. Elective II A: Microbiology— IIISemester 2. Bioinstrumentation, Biological Techniques, Biotechnology & Genetic Engineering - IV Semester |
|                              | В       | 1.Elective II B: Research Methodology– IIISemester 2. <b>Project work</b> – IV Semester   |

<sup>\*</sup> For Elective II, if \*B is opted,

#### **Project Guidelines:**

- 1. Internal and external examiners will evaluate the project work and award marks out of 160.
- 2. Internal and external examiners will conduct viva-voce examination and award marks out of 40.

<sup>\*</sup>Theory Paper – Research Methodology will carry 100 marks and

<sup>\*</sup>For Project 175 marks (Project work =125 marks and Viva-voce =50 marks).

The main objectives of this course are:

- 1. To understand about the procedures and trends in taxonomy.
- 2. To understand important physiological functions in various Invertebrate forms.
- 3. To know about the larval forms of Invertebrates.
- 4. To know about the organization of Minor Phyla and its characters.

#### **Expected Course Outcomes:**

On the successful completion of the course, student will be able to:

| on the succession compression of the course, student will be used to |  |    |  |  |  |  |  |  |
|--|--|----|--|--|--|--|--|--|
| 1  | Understand concepts of taxonomy, its procedures, methods in collection and                 | K2 |  |  |  |  |  |  |
|  | preservation of animals as well as classification of animals based on coelom.              |    |  |  |  |  |  |  |
| 2  | Categorize locomotory organs, methods of locomotion, feeding and digestion in various      |    |  |  |  |  |  |  |
|  | Invertebrates.   |    |  |  |  |  |  |  |
| 3  | Understand about organs of respiration, respiratory pigments, their mechanism, organs      |    |  |  |  |  |  |  |
|  | and products of excretion, mechanism and its relation to osmoregulation.                   |    |  |  |  |  |  |  |
| 4  | Discern the organization and function of nervous system in various Invertebrates and its   | K4 |  |  |  |  |  |  |
|  | evolutionary advances.   |    |  |  |  |  |  |  |
| 5  | Integrate the strategies and evolutionary significance of free living and parasitic larval | K5 |  |  |  |  |  |  |

#### Unit:1 PRINCIPLES OF ANIMAL TAXONOMY 15 hours

Species concept; International code of Zoological nomenclature - Taxonomic procedures. New trends in taxonomy - Animal collection, handling and preservation - Organization of coelom - Acoelomates - Pseudocoelomates - Coelomates: Protostomia and Deuterostomia.

#### Unit:2 LOCOMOTION, NUTRITION AND DIGESTION 15 hours

Locomotion: Pseudopodia - Flagella and ciliary movement in Protozoa - Hydrostatic movement in Coelenterata, Annelida and Echinodermata - Nutrition and Digestion: Patterns of feeding and digestion in lower Metazoan - Filter feeding in Polychaeta, Mollusca and Echinodermata

#### Unit:3 RESPIRATION AND EXCRETION 15 hours

Respiration: Organs of respiration: gills, lungs and trachea - Respiratory pigments - Mechanism of respiration - Excretion: Organs and products of excretion - coelom, coelomoducts, nephridia and Malphigian tubules - Mechanisms of Excretion - Excretion and Osmoregulation.

#### Unit:4 NERVOUS SYSTEM 15 hours

Nervous system: Primitive nervous system: Coelenterata and Echinodermata - Advanced nervous system: Annelida, Arthropoda (Crustacea and Insecta) and Mollusca (Cephalopoda) - Trends in neural evolution.

#### Unit:5 LARVAL FORMS AND MINOR PHYLA 15 hours

Invertebrata larvae: Larval forms of free living invertebrates - Larval forms of parasites - Strategiesand evolutionary significance of larval forms - Minor Phyla - Organization and general characters, morphology, anatomy and affinities of Rotifera, Phoronida and Chaetognatha.

The main objectives of this course are

- 1. To understand about vertebrate morphology and itsorigin.
- 2. To study about structure and function of Protochordatetypes.
- 3. To study about vertebrate classification and development, structure and function of integument types.
- 4. To understand the flow of blood and evolution of circulatory organs and process of respiration.
- 5. To know about the various aspects of skeletal system and evolution of urinogenital system
- 6. To understand the working of nervous system and senseorgans.

#### **Expected Course Outcomes:**

On the successful completion of the course, student will be able to:

|   | the successful compression of the course, subscite will be used to:  |           |
|---|--|-----------|
| 1 | Understand the origin of Chordata, concept of Protochordata, importance of Vertebrate morphology and biology of some Protochordates.                                   | K2        |
| 2 | Comprehend about Vertebrate classification, as well as structure and function of integument and its derivatives.   | K2        |
| 3 | Analyze the evolution of heart, aortic arches and portal systems, blood components as well as respiratory mechanisms and organs in various Vertebrates.                | K4        |
| 4 | Distinguish the comparative form and function of skeletal system and its parts and analyze the evolution of urinogenital system in different Vertebrates.              | K2&<br>K5 |
| 5 | Analyze comparatively the anatomy of nervous system and its components in different Vertebrates as well as receptors of olfaction, taste and hearing and other organs. | K4        |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

#### Unit:1 PROTOCHORDATA AND CHORDATE MORPHOLOGY 15hours

Origin of Chordata: Concept of Protochordata - The nature of vertebrate morphology - Definition, scope and relation to other disciplines - Importance of the study of vertebrate morphology, Biology of Cephalochordata, Hemichordata and Urochordata.

#### Unit:2 VERTEBRATE CLASSIFICATION ANDINTEGUMENT 15hours

Origin and classification of vertebrates. Vertebrate integument and its derivatives - Development, general structure and functions of skin and its derivatives - Glands, scales, horns, claws, nail, hoofs, feathers and hairs.

#### Unit:3 CIRCULATION AND RESPIRATION 15hours

Blood - Evolution of heart - Evolution of aortic arches and portal systems - Respiratory system - Characters of respiratory tissue - Internal and external respiration - Comparative account of respiratory organs in Vertebrate classes.

| Unit:4 | SKELETAL SYSTEM AND URINOGENITAL | 15hours |
|--------|----------------------------------|---------|
|        | SYSTEM                           |         |

Skeletal system: Form, function, body size and skeletal elements of the body - Comparative account of jaw suspensorium, vertebral column - Limbs and girdles - Evolution of urinogenital system in different vertebrates (Pisces, Amphibians, Reptiles, Birds and Mammals).

| N.T.                            | Unit:5 NERVOUS SYSTEM AND SENSE ORGANS 15hours                         |  |  |  |  |  |  |  |  |  |

| Pre-requisite            |     | To know the distribution and about and abundance of organisms | Sylla<br>Versi |   | 202<br>202 |   |

The main objectives of this course are to:

- 1. Acquire the knowledge of biodiversity in different geographical areas.
- 2. Understand the strategies evolved to conserve biodiversities and their habitats.
- 3. Know the measures in vogue to restore the biodiversity and environment.
- 4. Levels of organization in animals.
- 5. Analyze the evolutionary affinities of vertebrates.
- 6. Create awareness against wildlife crimes and pollution in conserving biodiversity.

#### **Expected Course Outcomes:**

On the successful completion of the course, student will be able to:

| 1 | Understand the significance of conservation of biodiversity.                    | K2 |
|---|---|----|
| 2 | Appreciate the various conservation strategies to protect biodiversity.         | K4 |
| 3 | Know the comparative anatomy and evolutionary affinities of vertebrates.        | K2 |
| 4 | Admire the values of ethical committee in animal research                       | K3 |
| 5 | Develop awareness against wildlife crimes and wildlife degradation by pollution | K5 |

K1 - Remember; K2 - Undestand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6- Create

Unit:1 BIODIVERSITY 15 hours

Biodiversity – Types: Genetic, species and ecological diversities - Species – Endemic, Keystone, flagship and ecological indicator - Major Biomes of India and wildlife diversity - Tropical Humid Forests, Tropical Deciduous Forests, Tropical rain forests, Warm deserts and semi-deserts, Coniferous forests and Alpine meadows- Hotspots – significance of Western Ghats, Indo-Burma region and Gulf of Mannar - Biosphere reserves of India - Rare endemic and endangered species of India – IUCN Red list category.

#### Unit:2 CONSERVATION BIOLOGY 15 hours

In-situ and Ex-situ conservation - Project Tiger and Project Elephant - Population explosion - Deforestation, Human animal conflicts, Poaching, Forest fire and Afforestation - CITES - Convention on International Trade in Endangered Species of Wild Fauna and Flora - Animal ethics – Ethical committee Discontinuation of dissection in educational institutions - Biodiversity measurement – significance - Simpson's diversity index.

#### Unit:3 SYSTEMATIC ZOOLOGY 15 hours

Species concept - Levels of structural organization — Unicellular — Multicellular forms — Colonial - Levels of organization: Kingdom Animalia — salient features of all phylum — classification up to class for invertebrates and up to orders for vertebrates with examples

#### Unit:4 SCOPE AND IMPORTANCE OF WILDLIFE OF INDIA 15 hours

India - the country of mega wildlife biodiversity - Objectives of wildlife conservation - Biodiversity loss and causes of wildlife depletion - Biodiversity and climate change - Economic importance of wildlife.

The main objectives of this course are,

- 1. To explain the core concepts of ecology for a better understanding of the environment.
- 2. To motivate, identify and solve environmental problems.
- 3. To create awareness about the improvement and protection of the environment.
- 4. To understand the need for conservation of biodiversity and natural resources.
- 5. To help understand the concepts of exobiology.

#### **Expected Course Outcomes:**

On the successful completion of the course, student will be able to:

|   | i ,   |    |
|---|---|----|
| 1 | Understand the ecological dynamics and the significance of environmental            | K2 |
|   | integrity.  |    |
| 2 | Recognize various global and regional environmental concerns that affects the       | K1 |
|   | biosphere and analyze the impact of human activities on the environment.            |    |
| 3 | Appreciate the significance of the conservation of native biodiversity.             | K4 |
| 4 | Scrutinize specific cases of environmental pollution, challenges, and their impacts | K5 |
|   | on ecology.   |    |
| 5 | Apply knowledge of chemistry, biology, molecular biology and microbiology to        | К3 |
|   | arrive at innovative solutions to environment issues and extra-terrestrial habitats |    |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

#### Unit:1 THE ENVIRONMENT 15 hours

Scope of environmental biology - Physical and biotic components of environment and their interactions - Habitat and Niche - Concepts - niche width and overlap- fundamental and realized niche- resource partitioning; character displacement - Limiting factors: light and temperature - effect on organisms.

#### Unit:2 POPULATION ECOLOGY 15 hours

Characteristics of a population- population growth curves- population regulation - Life history strategies (r and K selection) - Concepts of metapopulation - demes and dispersal, interdemic extinctions and age structured populations - Species Interactions: Types of animal interactions - Neutralism, symbiosis and antagonism.

#### Unit:3 COMMUNITY ECOLOGY 15 hours

Nature of communities- community structure and attributes - Levels of species diversity and its measurement; edges and ecotones - Ecological Succession: Types- mechanisms- concept of climax - Animal migration: Fish, Bird and mammals.

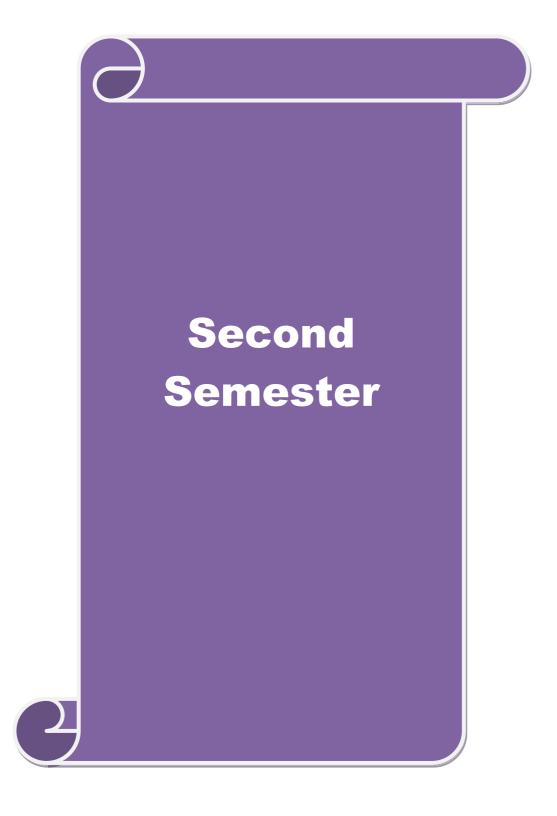

#### Unit:4 ECOLOGY OF ECOSYSTEM 15 hours

Ecosystem: Typical structure - functions- energy flow - Primary production and decomposition – Ecological pyramids - Biogeochemical cycles (C, N, P) - Indian ecosystems: Structure and function - terrestrial (forest, grassland) and aquatic (fresh water, marine, estuarine) - Biogeography: Major terrestrial biomes- theory of island biogeography- biogeographical zones of India.

|   | biology.  |    |
| 5 | The learner will be trained in preparing solutions and handling instruments at basic  | K4 |
|   | level.  |    |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

| Unit:1 BIOELECTRICITY AND RADIATION 15 | 5hours |
|--|--------|
|--|--------|

#### **Bioelectricity**

Membrane, Resting and action potential. Ionic distribution and membrane potential, recording of action potential.

#### Radiation

Electromagnetic radiation. Laws of light absorption - Beer Lamberts law, Biological applications of X-rays, Infra-red rays, and Ultra violet rays.

| Unit:2 | BIOENERGETICS | 15hours |
|--------|---------------|---------|
|        | ·             | •       |

Laws of thermodynamics, concept of free energy, oxidation reduction (redox) reactions. Energy coupling reactions, energy rich compounds, ATP cycle, standard free energy and negative entropy changes in living systems, enzyme catalysis.

| Unit:3 | BIOLOGICAL DATA, MEASUREMENTS AND | 15hours |
|--------|-----------------------------------|---------|
|        | VARIABLES                         |         |

#### **Biological data**

Source, Collection – Classification – Tabulation, Diagrammatic representation. Frequency curves, Frequency Polygon, Ogive

#### **Measurements and variables**

Central tendency - Arithmetic mean, Median and Mode Dispersions, Deviations, Co–efficient of variance. Standard Deviations and standard Error.

| Pre-requisite            |     | Basic knowledge about Biochemistry | Syllal<br>versi |   | 2023<br>2024 |   |

The main objectives of this course are to:

- 1. To understand the fundamental principles that governs complex biological systems.
- 2. To understand the molecular machinery of living cells and mechanisms of metabolic control.
- 3. To demonstrate knowledge and understanding basic biological and chemical facts and to be familiar in the concepts in biochemistry.
- 4.To gain knowledge about principles of chemical reactivity, bonding, thermodynamics and Kinetics.

| Expect | ed Course Outcomes:  |    |
|--------|--|----|
| On the | e successful completion of the course, student will be able to:                |    |
| 1      | The student will learn about structure of atoms, chemical bonds and get        | K2 |
|        | knowledge about principles of biophysical chemistry                            |    |
| 2      | Learn about the chemical nature of biomolecule, their structural and metabolic | K2 |
|        | role in cellular system.   |    |
| 3      | Gain knowledge about enzymes, mechanism of enzyme action and able to identify  | K3 |
|        | the enzyme kinetics.   |    |
| 4      | Understand the simple changes in molecules and interactions in biochemical     | K4 |
|        | process and cellular functions.  |    |
| 5      | Understand and analyze the structure and properties of Nucleosides and         | K4 |
|        | Nucleotides.   |    |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 BASIC PRINCIPLES 15hours

Structure of atoms, molecules and chemical bonds, Principles of biophysical chemistry (pH, buffer, reaction kinetics, thermodynamics, colligative properties).

Unit:2 STABILIZING INTERACTION 15hours

Stabilizing interactions (Van der Waals, electrostatic, hydrogen bonding, hydrophobic interaction, etc.). Composition, nature of bonds/linkages, structure of biomolecules (carbohydrates, lipids, proteins, nucleic acids and vitamins).

Unit:3 BIOENERGETICS 15hours

Bioenergetics, glycolysis, oxidative phosphorylation, coupled reaction, group transfer, biological energy transducers. Principles of catalysis, classification of enzymes and enzyme kinetics, enzyme regulation, inhibitors of enzymes - mechanism of enzyme catalysis, isozymes

Unit:4 CONFORMATION OF PROTEINS 15hours

Conformation of proteins (Ramachandran plot, primary, secondary, tertiary and quaternary structures, domains, motif and folds). Conformation of nucleic acids (helix (A, B, Z), t-RNA, micro-RNA).

Unit:5 METABOLISM 15hours

Stability of proteins and nucleic acids. Metabolism of amino acids, carbohydrates, lipids, nucleotides and vitamins.

| Unit:6                        | Contemporary Issues   | 2 hours                        |

- 1. To provide an overview of cell structure, basic components of cells and their function.
- 2. To learn the fundamental concepts of cell structure, dynamic character of cellularorganelles and relationshipbetween molecularlevels.
- 3. To make aware of how cellular components generate and utilize energy inside thecells.

#### **Expected Course Outcomes:**

On the successful completion of the course, student will be able to:

| On | the successful completion of the course, student will be use to.   |    |
|----|--|----|
| 1  | Understand and apply the principles and techniques of molecular biology in basic research, or in the health professions.           | К3 |
| 2  | Gain knowledge about molecular level regulation of cellular processes, cell signalling, transportation and proliferation in cells. | K2 |
|    | signaturing, transportation and prometation in eens.   |    |
| 3  | Analyze the picture of the cellular environment and regulation of cellular process   | K4 |
|    | at the molecular level.  |    |
| 4  | Students will learn about the mechanisms and regulation of cell communication, gene  | K4 |
|    | expression, genome maintenance and regulation involved in the flow of genetic  |    |
|    | information.   |    |
| 5  | Ensuring accurate macromolecular biosynthesis, unity and diversity at the  | K5 |
|    | molecular and cellular levels and the relationship.  |    |

**K1** - Remember; **K2** - Understand; **K3** - Apply; **K4** - Analyze; **K5** - Evaluate; **K6** - Create

#### Unit:1 INTRODUCTION OF BIOMEMBRANE

15 hours

Introduction – experimental systems in Cell Biology Biomembranes - Molecular composition and arrangement functional consequences - Transport across cell membrane- Diffusion, active transport and pumps and uniports, symports and antiport - Membrane potential - Co-transport by symports or antiporters - Transport across epithelia.

#### Unit:2 CYTOSKELETON 15 hours

Microfilaments and microtubules-structure and dynamics - Microtubules and mitosis - Cell movements-intracellular transport, role and kinesin and dynein, signal transduction mechanisms Cilia and flagella - Cell-cell signaling - Cell surface receptors - Second messenger system - MAP kinase pathways - Signaling from plasma membrane to nucleus.

#### Unit:3 CELL- CELL ADHESION AND COMMUNICATION 15 hours

Ca++ dependent homophilic cell-cell adhesion - Ca++ independent homophilic cell-cell adhesion, Gap junctions and connections - Cell matrix adhesion - Integrins - Collagen - Non-collagen components - Cell cycle - cyclins and cyclin dependent kinases - Regulation of CDK-cycline activity.

#### Unit:4 GENOME ORGANIZATION 15 hours

Hierarchy in organization - Chromosomal organization of coding and non-coding DNA – Regulation of gene expression - Mobile DNA - Morphological and functional elements of eukaryotic chromosomes - Genetic analysis in Cell Biology.

| Unit:5 INTRACELLULAR PROTEIN TRAFFIC | 15 hours |
|--------------------------------------|----------|
|--------------------------------------|----------|

Protein synthesis on free and bound polysomes - Uptake into ER - Membrane proteins, Golgisorting, post-translational modifications - Trafficking mechanisms - Biology of cancer - Biology of aging - Apoptosis-definition, mechanism and significance.

| Pre-requisite  | <b>,</b>   | Basic information on animal embryology | Sylla<br>Versi |   | 202<br>202 |   |

The main objectives of this course are to:

- 1. To make aware of the students about the theories, concepts and basics of DevelopmentalBiology.
- 2. To provide students the idea of sex cells, fertilization, cleavage, differentiation and development oforgans.
- 3. To make aware of the induction, organizers and development of extra embryonic structures.

#### **Expected Course Outcomes:**

On the successful completion of the course, student will be able to:

| On | the successful completion of the course, student will be able to:                    |    |
|----|--|----|
| 1  | The learner will be able to understand methodological approaches to the study of     | K2 |
|    | embryonic development and the characteristics of the principle experimental models.  |    |
| 2  | The students will be able to identify embryonic structures in preparations,          | K5 |
|    | photographsand diagrams  |    |
| 3  | The students will able to develop an idea, how to arrange sequences in developmental | K4 |
|    | processes in order.  |    |
| 4  | The learner will be able to understand the derivatives of embryonic structures.      | K2 |
| 5  | The students will attain a basic conceptual knowledge of the principle cellular      | K4 |
|    | mechanisms of development and identify the genetic and molecular elements that are   |    |
|    | involved.  |    |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

| Unit:1 | BASIC CONCEPTS OF | 15hours |
|--------|-------------------|---------|
|        | DEVELOPMENT       |         |

Potency, commitment, specification, induction, competence, determination and differentiation; morphogenetic gradients; cell fate and cell lineages; stem cells; genomic equivalence and thecytoplasmic determinants; imprinting; mutants and transgenics in analysis of development

## Unit:2 GAMETOGENESIS, FERTILIZATION AND EARLY DEVELOPMENT 15hours

Production of gametes, cell surface molecules in sperm-egg recognition in animals; zygote formation, cleavage, blastula formation, embryonic fields, gastrulation and formation of germ layers animals; embryogenesis, establishment of symmetry.

#### Unit:3 MORPHOGENESIS AND ORGANOGENESIS IN ANIMALS 15hours

Cell aggregation and differentiation in *Dictyostelium*; axes and pattern formation in *Drosophila*, amphibia and chick; organogenesis – vulva formation in *Caenorhabditis elegans*, eye lens induction, limb development and regeneration in vertebrates; differentiation of neurons, post embryonicdevelopment- Metamorphosis; environmental regulation of normal development; sex determination.

#### Unit:4 NEOTENY AND REGENERATION 15hours

Neoteny: Occurrence and significance – Regeneration: Regenerative capacity in the Animal Kingdom – Factors influencing regeneration – Stimulation and Suppression – Polarity and Gradients– Development of immune system in vertebrates.

| Unit:5      | AGING AND ASSISTED REPRODUCTIVE TECHNOLO                           | OGY 15ho     | ours    |

The main objectives of this course are to:

- 1. To understand important physiological functions in various Invertebrateforms.
- 2. To understand the working of nervous system and senseorgans.
- 3. Acquire the knowledge of biodiversity in different geographical areas.

#### **Expected Course Outcomes:**

On the successful completion of the course, student will be able to:

| Oli ti | the successful completion of the course, student will be able to.                   |    |
|--------|---|----|
| 1      | Attain knowledge about locomotory organs, locomotion, feeding and digestion in      | K2 |
|        | various Invertebrates.  |    |
| 2      | Integrate the strategies and evolutionary significance of free living and parasitic | K5 |
|        | larval forms of Invertebrates as well as organization and characters of Minor       |    |
|        | Phyla groups.   |    |
| 3      | Understand the origin of Chordata, concept of Protochordata, importance of          | K1 |
|        | Vertebrate morphology and biology of some Protochordates.                           |    |
| 4      | Gain knowledge about Vertebrate classification, as well as structure and function   | K2 |
|        | of integument and its derivatives.  |    |
| 5      | Appreciate the various conservation strategies to protect biodiversity.             | K4 |

**K1** - Remember; **K2** - Understand; **K3** - Apply; **K4** - Analyze; **K5** - Evaluate; **K6** - Create

## STRUCTURE AND FUNCTIONS OF INVERTEBRATA

12 hours

- 1. Comparative study of system: Invertebrates (any twoanimals)
  Appendages, external morphology, digestive system, nervous system and reproductive system.
- 2. Culture of earthworm in laboratory to identify the stages.
- 3. Culture and identification of morphology of Drosophila.

#### **COMPARATIVE ANATOMY OF CHORDATES**

12 hours

- 1. Comparative study of system: chordate (any two animals) External morphology, digestive and reproductive system.
- 2. Identification of Beak and feet in different birds (any locally available birds) Photography of Beak and feet.
- 3. Comparative study of scales of any preserved fish Cycloid, ctenoid, placoid and ganoidscales.
- 4. Comparative study of different types of chordate bones (any four animals) Skull, fore limb, hind limb.
- 5. Morphological modification of limb in fish, amphibia, reptiles, birds and mammals.

#### ANIMAL BIODIVERSITY AND ORGANIZATION

12 hours

12 hours

- 1. Plankton identification of from fresh/marine water (5 slides preparation).
- 2. Quantitative estimation of plankton using haemocytometer.

| SPOTTERS (Non-chordate and chordate) (each any five specimens) |
|--|
|  |

- 1. Biological importance
- 2. Medical importance
- 3. Beneficial pests
- 4. Evolutionary significance
- **5.** Economic importance

FIELD STUDY AND FIELD TRIP – Zoological visit, biodiversity area SCAA DATED: 18.05.2023

#### **Submission at the time of Practical Examination**

- 1. Plankton: 5slides
- 2. Report on the Field study and Fieldtrip
- 3. Bonafide Record

The main objectives of this course are to:

- 1. Explain core concepts in ecology, and summarize our ecological understanding of environmental problems.
- 2. To train how the biological data are processed and interpretations are made.
- 3. To develop skill in understanding & handling molecular science & instrumentation.

#### **Expected Course Outcomes:**

On the successful completion of the course, student will be able to:

| On | the successful completion of the course, student will be use to.                               |    |
|----|--|----|
| 1  | Investigate specific cases of environmental pollution or natural challenges, and               | K5 |
|    | their impact   |    |
| 2  | Apply chemistry, biology, molecular biology and microbiology skill to environment issues       | К3 |
| 3  | The students will be capable of interpreting and understanding the basis of molecular biology. | K2 |
| 4  | The learner will be trained in preparing solutions and handling instruments at basic           | K4 |
|    | level.   |    |
| 5  | The course will develop the research aptitude of the students.                                 | K4 |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

#### I. ANALYSIS OF WATER

12 hours

#### **Determination of:**

- 1. pH
- 2. Total dissolved solids
- 3. Turbidity / light penetration
- 4. CO2 and O2
- 5. Hardness (Temporary andpermanent)
- 6. Calcium and Magnesium
- 7. BOD and COD (Demonstration only)
- 8. All the above parameters in a)Pond/pool water b)Canal/River water c)Sewagewater

#### II. ANALYSIS OF SOIL (ANY THREE)

12 hours

#### **Determination of:**

- 1. Soil Moisture
- 2. Chlorides
- 3. Sulphates
- 4. Nitrates
- 5. Total Phosphates
- 6. Total organic matter

All the above parameters in a)Clayey soil, b) Sandy soil, c)Garden soil / Red soil

# III. BIOLOGICAL ANALYSIS (SPOTTERS) 1. Qualitative analysis of organisms (Pollution indicator): (any Ten) BIOPHYSICS: 12 hours

- 1. Preparation of buffers (acetate, phosphate, citrate, boratebuffers)
- 2. Determination of pH titration curve of proteins and calculate the pI values.
- 3. Determination of Glucose content of a given sample. (Calorimetermethod)

#### **BIOSTATISTICS:**

- 1. Construction of (a) Frequency polygon (b) Histograms from the Data given (The basic datamay be from any material availablearound)
- 2. Calculation of (a) Standard deviation (b) Correlation and (c) Student's test from the givendata.

**FIELD TRIPS** 1. Visit to – Drinking water treatment plant; Industrial effluent treatment plant; Pollution control lab.

#### **Submission at the time of Practical Examination**

The main objectives of this course are to:

- 1. To elucidate its interaction of molecules.
- 2. To provide an overview of cell structure, basic components of cells and their function.
- 3. To provide students the idea of sex cells, fertilization, cleavage, differentiation and development of organs.

#### **Expected Course Outcomes:**

On the successful completion of the course, student will be able to:

| On | the successful completion of the course, student will be able to:   |    |
|----|---|----|
| 1  | Understand the physical and chemical concepts in biology.   | K2 |
| 2  | Understand metabolism of nucleic acid, amino acid and lipid.  | K2 |
| 3  | Understand and apply the principles and techniques of molecular biology in basic research, or in the health professions.  | К3 |
| 4  | Ensuring accurate macromolecular biosynthesis, unity and diversity at the molecular and cellular levels and the relationship.                                     | K5 |
| 5  | The learner will able to understand methodological approaches to the study of embryonic development and the characteristics of the principle experimental models. | K4 |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

#### **BIOCHEMISTRY**

12 hours

- 1. Qualitative and quantitative estimation of Carbohydrates, Proteins and Lipids from the given samples.
- 2. Preparation of Haemin crystals.
- 3. Quantitative estimation of Haemoglobin.
- 4. Separation of plasma, serum and cells fromblood.
- 5. Colorimetric estimation of glucose fromblood
- 6. Estimation of cholesterol in the blood
- 7. Estimation of alkaline and acid phosphatases

## CELL AND MOLECULAR BIOLOGY

12 hours

- 1. Mounting of Polytene chromosome from the salivary gland of a *Chironomus*larva.
- 2. Squash preparation of onion root tip to study the stages of Mitosis.
- 3. Isolation of DNA and RNA from an animal tissue (Demonstrationonly)
- 4. Study of different cells from the vertebrate animal (Brain, Liver, Gonad, Kidney and Muscle)

#### **DEVELOPMENTAL BIOLOGY:**

12 hours

- 1. Regeneration study in Tadpole/Earth-worm
- 2. Study the life cycle of *Drosophila melanogaster*.
- 3. Patterning of the adult wing and *Drosophila* and demonstration of the effect of cell death on the pattering of the adult wing.
- 4. Effect of Thyroxin on the growth of tadpoles (Demonstration only)
- 5. Study of Embryonic developmental stages (Frog and Chick)
- 6. Blastoderm mounting of chick embryo using vital stains.

**Total Lecture hours** | **36hours**

The main objectives of this course are to:

- 1. To study about the adaptive characters in animals
- 2. To acquire knowledge on the physiological aspects about all organ systems.
- 3. To acquire knowledge on the osmo and thermo regulatory mechanisms.
- 4. Understand the concepts of hormonal activities
- 5. To understand the role of hormones in the biological activities such as pregnancy and lactation

#### **Expected Course Outcomes:**

On the successful completion of the course, student will be able to:

| Oll | the successful completion of the course, student will be able to:   |    |
|-----|---|----|
| 1   | Acquire the knowledge of organisms surviving in various environments.   | K4 |
| 2   | Learn the significance of osmo and thermo regulations to cope well with the ecological stress.  | К3 |
| 3   | Understand the physiological responses of the meditation practices in human   | K2 |
| 4   | Factors involved in the mechanism of respiratory, excretory physiology, neural and muscular physiology and the influence of hormones in reproduction. | K2 |
| 5   | Evaluate the various mode of life and adaptive modification of their organ systems in animals   | K6 |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

#### Unit: I ADAPTATION AND HOMEOSTASIS

15hours

Adaptation - Levels and Mechanism of adaptation - Significance of body size - Adaptation, acclimation and acclimatization - Concepts of homeostasis. Physiological adaptations of different environments: Marine - Shores and Estuaries - Freshwater - Extreme aquatic environments - Terrestrial life. Extreme terrestrial environments - Parasitic habitats. Stress Physiology - Basic concept of environmental stress and strain; concept of elastic and plastic strain; stress resistance, stress avoidance and stress tolerance.

| Unit: II | MECHANISM OF THERMO AND OSMO  | 15hours |
|----------|-------------------------------|---------|
|          | REGULATIONS & YOGIC PRACTICES |         |

Physiological mechanism of thermo regulation. Physiological adaptation to osmatic and ionic stress; mechanism of cell volume regulation. Osmoregulation in aquatic and terrestrial environments. Physiological response to oxygen deficient stress. Physiological effects of physical exercises and yogic practices – Meditation & Yoga

| Unit: III | RESPIRATORY PHYSIOLOGY | 15hours |
|-----------|------------------------|---------|
|           |                        |         |

Respiratory physiology – Respiratory organs - Structure and function.

Respiratory gases – uptake – respiratory pigments – O2 & CO2 dissociation curves – transport of respiratory gases.

#### **Unit: IV** EXCRETORY PHYSIOLOGY AND ENDOCRINOLOGY 15hours Excretory physiology – Excretory organs – mechanism of excretion – physiology – adaptations of excretion to environment – Excretory products: synthesis and elimination. Endocrine glands Feedback regulation – Pituitary – gonadal axis. Role of reproductive hormones - gamete formation - fertilization - embryonic development - parturition - lactation - neuroendocrine regulation Unit: V NEURAL AND MUSCULAR PHYSIOLOGY 15hours Neural physiology - Neurons structure and types. Nerve impulse transmission - resting and action potential — neurotransmitters – mechanism of neural transmission. Neuro-degenerative diseases. Muscular physiology - Muscle contraction – theories – molecular mechanism of muscle contraction. Unit: VI **Contemporary Issues** 2 hours Expert lectures, online seminars – webinars **Total Lecture hours** 77hours Text Book(s) Animal Physiology Vol I &II by Chatterjee Animal Physiology by Verma & Agarwal 3 Essential of ANIMAL Physiology by Rastogi 4 Principles of Animal Physiology by Christopher Moyes and Patricia Schulte **Reference Books** Comparative Animal physiology by Philip C Withers Comparative Physiology: Primitive Mammals" by Knut Schmidt-Nielsen and Liana Bolis "Advances in Comparative and Environmental Physiology: Animal Adaptation to Cold" by J A Boulant and R J Brooks "Advances in Comparative and Environmental Physiology" by J Machin and S H Wright

| Pre-requisite            |     | Basic knowledge about the immunology | Syllabus |     |     |   |
|                          |     |                                      | versi    | ion | 202 | 4 |

The main objectives of this course are to:

- 1. To provide the basic knowledge of different elements of immune system and describe the role of immune system in both maintaining health and contributing todiseases.
- 2. To identify the cellular and molecular basis of immune responsiveness.
- 3. To explain immunological response and how it is triggered and regulated.

#### **Expected Course Outcomes:**

On the successful completion of the course, student will be able to:

| On | the successful completion of the course, student will be able to.                  |    |
|----|--|----|
| 1  | Understanding the multiple interaction between different components of the immune  | K2 |
|    | system during the normal immune response.  |    |
| 2  | Apply basic techniques for identifying antigen antibody reaction, familiarize with | K3 |
|    | the terminology related with Immunology.   |    |
| 3  | Apply basic techniques for identifying antigen antibody interactions               | К3 |
| 4  | Make clear the stages of immune responses, uptake and antigen presentation, cell   | K4 |
|    | activation, effector and memory cell and apoptosis mechanisms.                     |    |
| 5  | Elucidate the reasons for immunization and the effect of immune system including   | K5 |
|    | Allergy, hypersensitivity and autoimmunity.  |    |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

#### Unit:1 INNATE AND ACQUIRED IMMUNITY

15hours

Phylogeny and Ontogeny of immune system - Organization and structure of lymphoid organs Cells of the immune system and their differentiation - Lymphocyte traffic - Nature of immune response.

#### Unit:2 NATURE OF ANTIGENS 15hours

Antigenicity and immunogenicity - Factors influencing immunogenicity - Epitopes and haptens Super antigens - Structure and Functions of Antibodies - Classes and subclasses - Gross and fine structure - Antibody mediated effector functions - Antigen- Ab interactions in vitro and in vivo.

#### Unit:3 COMPLEMENT SYSTEM 15hours

Components, control proteins and activation pathways Major Histocompatibility Complex in mouse and HLA system in human MHC haplotypes - Class I and class II molecules - Cellular distribution — Peptide binding - Expression and diversity - Disease susceptibility and MHC/HLA Organization and expression of Ig genes - Models for Ig gene structure - Multigene organization of Ig genes - DNA rearrangements and mechanisms - Generation of antibody diversity - Differential expression of Ig genes.

## Unit:4 T-CELL GENERATION, ACTIVATION AND DIFFERENTIATION 15hours

Isolation, molecular components and structure of T-cell receptor complex-T-cell maturation and thymus -  $T_{H-}$  cell activation mechanism - T- cell differentiation - Cell death and T- cell population-B-cell generation, activation and differentiation-B-cell receptors- Selection of immature self-reactive B-cells - B-cell activation and proliferation -  $T_{H-}$  B- Cell interactions

Definition and salient functional features - Cytokine receptors - Cytokines and immune response - Cell-mediated effector functions - Cell adhesion molecules - Effectors cells and molecules - CTL and NK cells- mechanism of action - Immunological tolerance and Anti-immunity - Delayed type hypersensitivity - Hypersensitivity: Types and immunological reactions and and anti-immunity in the companion of the companion

The main objectives of this course are to:

- 1. The course is intended to make aware of the students about the classification, diversity, organization, application and pathogenicity of the microorganisms existing the ecosystem.
- 2. The course will help the students to learn about the various microbial culture techniques and its handling.
- 3. The course will give an idea that how microbes are used in various industries for generation of various products related to day to daylife.

# Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| 1 | The students will be able to explain the taxonomy, diversity and general structure of   | K4 |
|---|---|----|
|   | micro-organisms.  |    |
| 2 | They will develop knowledge about the culture, sterilization, handling, identification  | K4 |
|   | and assessing growth characters of microorganisms.                                      |    |
| 3 | The students will develop knowledge about the general microbial techniques for          | K2 |
|   | isolation of pure cultures of bacteria, fungi and algae and will master the aseptic     |    |
|   | techniques to perform routine culture handling tasks safely and effectively.            |    |
| 4 | The students will get idea about the microbial spoilage and the potentials in the usage | K5 |
|   | of microbes in agriculture.   |    |
| 5 | The students will develop an awareness about the various microbial diseases and the     | К3 |
|   | causative organisms.  |    |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

| Unit:1 | INTRODUCTI <mark>ON-SCOPE AND HIST</mark> ORY OF   | 15hours |
|--------|--|---------|
|        | MICROBIOLOGY OF THE PROPERTY O |         |

**Introduction**—**Scope and History of microbiology**—Classification of bacteria, fungi, yeastand virus. Structure and functions of bacteria and virus. Reproduction in bacteria — Transformation, conjugation, transduction.

#### Unit:2 CULTIVATION AND CONTROL OF MICROORGANISM 15hours

**Cultivation and control of microorganism** – Methods of collection of sample – methods of estimation of microorganism in soil, water and air – Isolation and identification of bacteria. Methods of sterilization and disinfection – Microbial control – Physical and chemical – techniques of pure culture.

| Unit:3                                  | MICROBIAL ECOLOGY | 15hours     |
|---|-------------------|-------------|
| U / I I I I I I I I I I I I I I I I I I |                   | 1.3110111.8 |

**Microbial Ecology:** Distribution of microorganism in soil, water and air – Environmental factors influencing the distribution of microorganism – Role of microorganisms in the cycling of nutrients – Carbon and Nitrogen cycle.

Unit:4 FOOD MICROBIOLOGY 15 hours

**Food Microbiology:** Sources, types, incidence of microorganism in vegetables, meats, milk and dairy products – spoilage of food, fruits, vegetables, cereals, meat, caned products – Factors influencing spoilage – Principles of food preservation.

The main objectives of this course are to:

- 1. To study the nature and function of Genes and Chromosomes
- 2. To acquire knowledge on the structure of Mendelian principles, Gene mapping methods, Microbial genetics, Human genetics, Mutation and Molecular Genetics.
- 3. To acquire knowledge on the Gene concepts and their role in inheritance.
- 4. Understand the Chromosomes and their nature.
- 5. To understand the role of DNA.RNA and Nucleotides and their functions.

#### **Expected Course Outcomes:**

On the successful completion of the course, student will be able to:

| 011 | the successful completion of the course, student will be use to.                |    |
|-----|---|----|
| 1   | Acquire knowledge on the Nature and functions of Genes and learn the            | K4 |
|     | mechanism of their action   |    |
| 2   | Learn the structure and functions of Gene mapping and Mutations and familiarize | К3 |
|     | on their functions  |    |
| 3   | Understand the Microbial genetics and Molecular Genetics and their rolein       | K2 |
|     | molecular biology   |    |
| 4   | Able to learn the Structure and functions of the Nucleotides                    | K2 |
| 5   | Know the factors about genes and their role in the development of an organism   | K6 |

**K1** - Remember; **K2** - Understand; **K3** - Apply; **K4** - Analyze; **K5** - Evaluate; **K6** - Create

#### Unit:1 BASIC CONCEPTS OF GENETICS

15hours

Mendelian principles: Dominance, segregation, independent assortment. Concept of gene: Allele, multiple alleles, pseudoallele, complementation tests Extensions of Mendelian principles: Co-dominance, incomplete dominance, gene interactions, pleiotropy, genomic imprinting, penetrance and expressivity, phenocopy, linkage and crossing over, sex linkage, sex limited and sex influenced characters.

#### Unit:2 GENE MAPPING METHODS 15hours

Linkage maps, tetrad analysis, mapping with molecular markers, mapping by using somatic cell hybrids, DNA foot printing. Extra chromosomal inheritance: Inheritance of Mitochondrial genes, maternal inheritance

#### Unit:3 MICROBIAL GENETICS AND HUMAN GENETICS 15hours

Methods of genetic transfers – transformation, conjugation, transduction and sexduction, mapping genes by interrupted mating, fine structure analysis of genes Pedigree analysis, karyotypes, genetic disorders - Human Genome Project. Quantitative genetics: Polygenic inheritance, heritability and its measurements,

#### Unit:4 MUTATION, POPULATION GENETICS 15hours

Types, causes and detection, mutant types – lethal, conditional, biochemical, loss of function, gain of function, germinal verses somatic mutants, insertional mutagenesis. Structural and numerical alterations of chromosomes: Deletion, duplication, inversion, translocation, ploidy and their genetic implications;Recombination: Homologous and non-homologous recombination including transposition. Population Genetics: Genetic equilibrium – distinguishing forces – natural selection – mutation and genetic drift.

The main objectives of this course are to:

- 1. The objective of this course is to give a firm foundation in the fundamentals of modern Molecular techniques.
- 2. The course will give idea various protocols followed in Biotechnology in relation to animal science.

#### **Expected Course Outcomes:**

On the successful completion of the course, student will be able to:

| 1 | To develop an idea about the various techniques used in modern biotechnology. | K1 |
|---|---|----|
| 2 | To understand the basic principles of all techniques                          | K2 |
| 3 | To analyze the latest techniques and its implication                          | K4 |
| 4 | To know how to isolate & sequence a gene                                      | K5 |
| 5 | To apply the knowledge in purifying the environment.                          | K6 |

### K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 BIOINSTRUMENTATION 15hours

Microscopy – Fluorescence Microscope, Phase Contrast Microscope, Electron Microscope (TEM& SEM). Centrifugation – Principle and applications, types, pH meter. Spectrophotometry – Visible and UV spectrophotometry. Spectrophotometer. Chromatographic techniques – Principle and applications of chromatography – Paper and TLC. Electrophoresis Principles and applications.

| Unit:2 | BIOLOGICAL TECHNIQUES | 15hours |
|--------|-----------------------|---------|

Southern Blotting, Western Blotting, DNA finger printing techniques. Hybridoma technologyproduction and applications of monoclonal antibodies. Geiger Muller counter – Principles and applications. Liquid Scintillation counter – principle and applications. Applications of radio isotopes in biological sciences. Autoradiography. Applications of Flow cytometry, Cell separation and culture techniques.

| Unit:3 | GENE TRANSFER METHODS AND TRANSGENIC | 15hours |
|--------|--------------------------------------|---------|
|        | ORGANISMS                            |         |

Gene Transfer Methods in Animals – Transgenic animals. Somatic cell hybrization – mechanism and applications. Recombinant DNA Techniques Recombinant DNA – PCR, Restriction enzymes for cloning – Techniques used in recombinant DNA technology – Cloning vectors for rDNA – Construction of Chimeric DNA – Molecular Probes – Construction and screening of genomic libraries.

| Unit:4 | ISOLATION, SYNTHESES AND SEQUENCING OF GENES | 15hours |
|--------|--|---------|

Isolation, Syntheses and Sequencing Genes Isolation of genes – using DNA and RNA probes; Gene therapy- types of gene therapy. Industrial Biotechnology Fermentation – Designing of bioreactors – stages of fermentation and fermentation products conversion of waste into biogas – conversion of waste into ethanol

The main objectives of this course are to:

- 1. To make them understand physiology through practical's
- To equip them to do the experiments individually
- To understand the basics of immunology

#### **Expected Course Outcomes:**

On the successful completion of the course, student will be able to:

| 1 | To understand the physiological mechanisms  | K2 |
|---|---|----|
| 2 | To evaluate the experimental design         | K5 |
| 3 | To interact their results                   | K6 |
| 4 | To present their findings and discuss on it | K2 |
| 5 | To handle the instruments                   | К3 |

**K1** – Remember; **K2** – Understand; **K3** – Apply; **K4** – Analyze; **K5** – Evaluate; **K6** – Create

#### COMPARATIVE ANIMAL PHYSIOLOGY

12 hours

(Use any two cultured species which are not in endangered list)

- 1. Determination of the rate of activity of salivary amylase (Humansaliva).
  - i) Ptyalin activity in relation to temperature and calculation of Q10.
  - ii) Ptyalin activity in relation to pH and calculation of Q10.
- 2. Recording of diastolic and systolic pressure during, standing, sitting & lyingposture.
- 3. Biological responses of animals to various osmotic concentrations and their effects i) Change in weight of Earthworm in heteroosmotic media ii) Pattern of osmotic responses of crab in hetero osmotic media iii) Active uptake of Na+ and Cl- of a fish from the environmental water and change insalinity.
- 4. Determination of the specific gravity of the blood of a vertebrate animal-by copper sulphate method.
- 5. Effect of temperature on the opercular movement of fish and calculation of Q10.
- 6. Determination of the median threshold concentration of sucrose for houseflypopulation.
- 7. Effect of drugs on the heartbeat of cockroach (Result with graphical representation corresponding to different concentration and time intervalsexpected)
- 8. Determination of the rate of ammonia and urea excretion infish.
- 9. Determination of the haemoglobin content in fish blood.

**IMMUNOLOGY:** 12 hours

- 1. Study of Antigen and Antibody reaction through the study of Bloodgrouping.
- 2. Study of Rh factor through the study of Bloodgrouping.
- 3. Estimation of protein by Lowry's method
- 4. Widal Test
- 5. Western blotting (Demonstrationonly)
- 6. ELISA (Demonstration only)

| 7. Separation of lymphocytes from wholeblood |                     |          |

The main objectives of this course are to:

- 1. To study the nature and function of Genes and Chromosomes
- 2. To acquire knowledge on the structure of Mendelian principles, Gene mapping methods, Microbial genetics, Human genetics, Mutation and MolecularGenetics.
- 3. To realize the current working of evolution.

#### **Expected Course Outcomes:**

On the successful completion of the course, student will be able to:

| Oli | On the successful completion of the course, student will be able to.            |    |  |  |  |
|-----|---|----|--|--|--|
| 1   | Acquire knowledge on the Nature and functions of Genes and learn the            | K4 |  |  |  |
|     | mechanism of their action   |    |  |  |  |
| 2   | Learn the structure and functions of Gene mapping and Mutations and familiarize | K3 |  |  |  |
|     | on their functions  |    |  |  |  |
| 3   | Able to learn the Structure and functions of the Nucleotides                    | K2 |  |  |  |
| 4   | To analyze how the higher animals evolved.                                      | K5 |  |  |  |
| 5   | To understand the evolution of genes.   | K2 |  |  |  |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

GENETICS: 20 hours

- 1. Genetic characteristics of a class roomsample.
  - i) Dermatoglyphic patterns (Fingerprint),
  - ii) Earlobe,
  - iii) Rolling of tongue,
  - iv) Mid digital hairs,
  - v) Widow'speak,
  - vi) Inward bending of little finger.
- 2. Study of morphology of Drosophila melanogaster
- 3. Culture of Drosophila melanogaster
- 4. Identification of sex and mutant characters Drosophila melanogaster
- 5. Demonstration of dosage compensation in Drosophila males and females.
- 6. Preparation of genital plate of Drosophilamelanogaster
- 7. Estimation of allelic Frequency based on ABO BloodGroup.
- 8. Identification of Rh factor in bloodgroups
- 9. Preparation of buccal smear to show squamous epithelial cells.
- 10. Study of Barr body using buccal smear of volunteers
- 11. Study of stages of mitosis and meiotic chromosomes of grasshopper by observation of permanent slides and calculation of chiasma frequency

EVOLUTION: 10 hours

- 1. Evolutionary significances: Fossils of each any five from non-chordate and chordate.
- 2. Analogous and homologous organs of vertebrate animals (Frog, *Calotes*, Pigeon and Rabbit)
- 3. Mimicry and colouration of animals.

The main objectives of this course are to:

- 1. The objective of this course is to give a firm foundation in the fundamentals of modern Molecular techniques.
- 2. The course is intended to make aware of the students about the classification, diversity, organization, application and pathogenicity of the microorganisms existing the ecosystem.
- 3. The course will give an idea that how microbes are used in various industries for generation of various products related to day to day life.

#### **Expected Course Outcomes:**

On the successful completion of the course, student will be able to:

| On | On the successful completion of the course, student will be able to:  |    |  |  |  |  |
|----|---|----|--|--|--|--|
| 1  | To develop an idea about the various techniques used in modern biotechnology.                                       |    |  |  |  |  |
| 2  | To analyze the latest techniques and its implication  |    |  |  |  |  |
| 3  | The students will develop an awareness about the various microbial diseases and the causative organisms             | К3 |  |  |  |  |
| 4  | The students will be able to explain the taxonomy, diversity and general structure of microorganisms.               | K4 |  |  |  |  |
| 5  | The students will get idea about the microbial spoilage and the potentials in the usage of microbes in agriculture. | K5 |  |  |  |  |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

#### **MICROBIOLOGY:**

15 hours

- 1. Sterilization Principles and methods
- 2. Media Preparation Liquid and Solid media, Agar deep, slant and plate
- 3. Pure culture techniques Streak plate, pour plate, spread plate
- 4. Identification of Gram positive and Gram negative bacterial strains
- 5. Water quality analysis MPN
- 6. Isolation of microorganisms from Spoiled foods Meat, milk, cereals and bread
- 7. Milk quality dye reduction test
- 8. Antibiotic sensitivity: oxidase test
- 9. Identification of Symbiotic bacterioids from rood nodules of leguminous plants

#### BIOINSTRUMENTATION & BIOLOGICAL TECHNIQUES:

10 hours

- 1. Separation technique of amino acids using paper chromatography.
- 2. Separation of Proteins on gel electrophoresis
- 3. Study on the Principles of the Instruments and their uses.
- 1. pHMeter
- 2. Colorimeter
- 3. Spectrophotometer
- 4. Electrophoresisapparatus
- 5. Microtome
- 6. Centrifuge

SCAADATED: 18.05.2023

#### BIOTECHNOLOGY & GENETIC ENGINEERING

- 1. Fermenter design and working principle
- 2. Wine production
- 3. Antibacterial Sensitivity disc test
- 4. Isolation and estimation of DNA & RNA
- 5. Preparation of Tissue culture medium
- 6. PCR Working Principle

## Field Study and Visit: Visits to instrumentation lab in university or any research institute

## Total Lecture hours 30 hours

#### **General Instructions:**

- 1. Elective Courses: Minimum Two for Each Semester.
- **2. Supportive Courses:** Minimum One for first three Semesters.
- **3.** Value Added Courses: Minimum 2 and maximum 5 for Each Department for Entire Program
- **4. Job Oriented Certificate Courses:** Two Courses (Each one on First and Second Year)
- **5.** All the Board of Studies are requested to follow the same template and use the TIMES NEW ROMAN FONT with the Size of 12.
- **6.** The Course Designer should be mentioned in each of the corses.

# BHARATHIAR UNIVERSITY: COINBATORE SCAA DATED: 18.05.2023

#### In CBCS pattern with effect from 2010-2011

#### Definition:

#### **Programme:**

"Programme" means a course of study leading to the award of a degree in a discipline.

#### Course:

"Course" refers to a subject offered under the degree programme.

#### Core Papers:

"Core Papers" means "the core courses" related to the programme concerned including practicals and project work offered under the programme.

#### Electives:

"Electives" means the courses offered under the programme related to the major or non major but are to be selected by the students.

A detailed explanation of the above with relevant credits are given under "Scheme of Examinations along with Distribution of Marks and Credits"

#### 1. Eligibility for Admission to the Course

A candidate who has passed the Degree Examination as main subject of study of this University or an examination of some other University accepted by the Syndicate as equivalent thereto shall be eligible for admission to the Master Degree of this University.

#### **2.** Duration of the Course

This Course of Study shall be based on Semester System. This Course shall consist of four Semesters covering a total of two Academic Years. For this purpose, each academic year shall be divided into two Semesters; the first and third Semesters; July to November and the second and the fourth Semesters; December to April. The Practical Examinations shall be conducted at the end of even Semester.

Each semester have 90 working days consists of 5 teaching hours per working day. Thus, each semester has 450 teaching hours and the whole programme has **1800 teaching hours**.

#### 3. Course of Study

The Course of the Degree of Master of Science/Arts/Commerce shall be under the Semester System according to the Syllabus to be prescribed from time to time. This Course consists of Core Subjects and Elective Subjects.

#### 4. Scheme of Examinations

As given in the respective Board.

#### **5.** Requirement to appear for the Examinations

a) A candidate will be permitted to take the University Examination for any Semester, if he/she secures not less than 75% of attendance out of the 90 instructional days during the Semester.

- b) A candidate who has secured attendance less than 75% but 65% and above shall be permitted to take the Examination on the recommendation of the Head of the Institution to condone the lack of attendance as well as on the payment of the prescribed fee to the University.
- c) A candidate who has secured attendance less than 65% but 55% and above in any Semester, has to compensate the shortage of attendance in the subsequent Semester besides, earning the required percentage of attendance in that Semester and take the Examination of both the Semester papers together at the end of the latter Semester.
- d) A candidate who has secured less than 55% of attendance in any Semester will not be permitted to take the regular Examinations and to continue the study in the subsequent Semester. He/she has to re-do the Course by rejoining the Semester in which the attendance is less than 55%.
- e) A candidate who has secured less than 65% of attendance in the final Semester has to compensate his / her attendance shortage in a manner to be decided by the Head of the Department concerned after rejoining the Course.
  - **6.** Restriction to take the Examinations
- a) Any candidate having arrear paper(s) shall have the option to take the Examinations in any arrear paper(s) along with the subsequent regular Semester papers.
- b) Candidates who fail in any of the papers shall pass the paper(s) concerned within 5 years from the date of admission to the said programme. If they fail to do so, they shall take the Examination in the revised Text / Syllabus, if any, prescribed for the immediate next batch of candidates. If there is no change in the Text / Syllabus they shall take the Examination in that paper with the Syllabus in vogue, until there is a change in the Text or Syllabus.

In the event of removal of that paper consequent to the change of Regulations and / or Curriculum after a 5 year period, the candidates shall have to take up on equivalent paper in the revised syllabus as suggested by the Chairman and fulfill the requirements as per Regulations/Curriculum for the award of the Degree.

**7.** The Medium of Instruction and Examinations

The medium of instruction and Examinations shall be in English, except languages. However, as per directives of the government, if the candidates answer in Tamil, their answer scripts will also be evaluated.

8. Submission of Record Notebooks for Practical Examinations
Candidates taking the Practical Examinations should submit bonafide Record Note Books prescribed for the Practical Examinations. Otherwise the candidates will not be permitted to take the Practical Examinations.

#### 9. The Minimum (Pass)Marks

A candidate shall be declared to have passed in a paper if a student obtains not less than 50% of marks in that paper. A candidate shall be declared to have passed the whole Examination if the student passes in all the papers.

#### 10. Distribution of marks

Table–1(A): The following are the distribution of marks for external and internal for **theory papers** of PG courses.

Table – 1(A): Distribution of marks for External and Internal for University (external examination 0.05.2023 and Continuous Internal Assessment and passing minimum marks for Theory Papers.

| TOTALMARKS | E  | XTERNAL                                  | INTERNAL   | Overall Passing Minimum for total marks (Internal + External) |
|------------|----|--|------------|---|
|            |    | Passing<br>Minimum for<br>external alone | Max. marks |   |
| 100        | 75 | 38                                       | 25         | 50  |
| 75         | 55 | 28                                       | 20         | 38  |

Table -1(B): Distribution of marks for the Continuous Internal Assessment in the Theory Papers of PG programmes.

#### BHARATHIAR UNIVERSITY:: COIMBATORE 641 406

#### GUIDELINES FOR CONDUCTING VALUE ADDED COURSES

#### **Course Structure**

- 1. The request for approval of syllabus by the concerned authorities is mandatory atleast15 days before the date of commencement of the course. The Syllabus (15/30 hours), Schedule and the Details of Faculty handling the course approved by the Departmental Committee and forwarded by Head of the Department should be enclosed.
  - a. The course of fered should not be the same as any course list ed in the curriculum of the respective programme e/or any other programme of fered in University / Colleges.
  - b. The value added courses may be also conducted during weekends/ vacation period.
  - c. The course can be offered any semester in the PG Programmes.
  - d. Industry experts/eminent academicians from other Institutes are also eligible to offer the value added course.
  - e. The course can be offered only if there are atleast 10 students opting for it.
  - f. The students may be allowed to take value added courses offered by other departments after obtaining permission from Head of the Department offering the course.

#### Duration

2. The duration of value added courses is 15(30) periods of theory or a maximum of theory and Laboratory courses and the course can have a maximum of three hours per day.

For the one (two) credit courses either 15(30) periods of theory or a combination of theory and Laboratory may be offered.

Where, **2** periods of laboratory = **1** period of theory Evaluation

- 3. The value added courses shall carry 100 marks and shall be evaluated through internal assessments only.
  - a. Two Assessments shall be conducted preferably one in the middle and the other at the end of the course by the Department concerned.
  - b. The duration of assessment is one hour each.
  - c. The total marks obtained in the tests shall be reduced to 100 marks and rounded to the nearest integer.
  - d. The Head of the Department may identify a faculty member as coordinator for the course. A committee consisting of the Head of the Department, staff handling the course (if available), coordinator and a senior Faculty member nominated by the Head of the Department

- shall monitor the evaluation process. The grades shall be assigned to the Astudents by the 5abox committee based on their relative performance.
- **e.** The coordinator for the course is responsible for maintaining and processing the records with regard to assessment marks and results.

#### Passing Requirement and Grading

- **4.** The passing requirement for value added courses shall be 50% of the marks prescribed for the course(**Internal assessment only**)
  - a. The grades O,A+,A,B+,B obtained for the one/ two credit shall figure in the Mark sheet under the title 'Value Added Courses'. The other grades RA, SA will not figure in the mark sheet.
  - b. The credits earned through value added courses shall not be considered for calculating GPA and CGPA.
  - c. The credits earned through value added courses shall not be considered for classification of degree.
  - d. If the course is offered during any semester, it will appear in that semester's marksheet. However if the course is offered in summer/ winter vacations, the course will be included in the gradesheet of the sub sequent semester.

#### Maximum Number of Courses

5. A student can earn a maximum of 3 credits during the entire programme of study by attending value added courses which would be over and above the required maximum number of credits for the award of the degrees.

#### Financial Commitment

6. The expenditure to be incurred for the conduct of value added courses should be met from nominal fees collected from the students at a rate fixed by the University. However any additional expenditure may be supported by the funds of the Department.

# APPLICATION FOR CONDUCTING VALUE ADDED COURSES ATED: 18.05.2023

- 1. Name of the Department:
- 2. PG programme:
- **3.** Details of the Value Added Courses:
  - a. Name of the Value Added Courses

b. Type of Value Added Courses (Theory/ Lab/ Lab integrated

Theory/others)

c. Short Description Enclosure1 enclosed -YES / NO

d. Syllabus including Reference Enclosure 2 enclosed - YES / NO

**4.** Target audience:

Semester (indicate if more than one) Others

- **5.** Details of Faculty handling the course:
  - a. Name of the Faculty handling the Value Added course

b. Details including designation and expertise Enclosure3enclosed-YES / NO

c. Contact details

Email ID : Phone No :

6. **Tentative Time Table** including dates

of internal assessments : Enclosure 4 enclosed - YES / NO

7. Number of students opting for the course:

8. Department Consultative Committee -

Minutes : Enclosure 5 enclosed - YES / NO

9. Name and Designation of the Coordinator:

Head of the Department (with date & seal)

Note:

\* Fees if any

#### Vision

To make the students biologically, socially, environmentally and ethically aware of current scientific issues by imparting zoological knowledge through the curriculum and equip them to care the welfare of the society.

#### Mission

To create the zoology students as bio-socially responsible citizens through laboratory works, field trips, study tour, visit to biodiversity spots, zoos and museums and research projects works.

To make them talented multi- visionary, and future oriented through various community activities, competitions, and celebrations of National & International days.

#### **Objectives**

To inculcate the values of life science, research oriented education has been focussed through seminars, presentations and publications and make them responsible future scientists.
