B.Com.(BusinessAnalytics)

Syllabus

AFFILIATEDCOLLEGES

ProgramCode:2AQ

2025-2026 onwards

BHARATHIARUNIVERSITY

(AStateUniversity,Accreditedwith"A++"GradebyNAAC, Ranked 21st among Indian Universities by MHRD-NIRF)

Coimbatore-641046, Tamil Nadu, India

Program	Program Educational Objective (PEOs)					
The B.Co	The B.Com (Business Analytics) program describe accomplishments that graduates are					
expected	to attain within five to seven years after graduation					
PEO1	To develop the strong foundation of business analytical techniques and methods blended with commerce and computer related courses					
PEO2	By applying business analytical techniques which helps in problem solving and decision making for business concern					
PEO3	This program helps to explore wide knowledge in big data technologies and algorithms to give better inference for various business.					
PEO4	Hands on experience in differents of two are helps to resolve complex business analytical problem.					
PEO5	To identify and resolve practically relevant business analytic tools to handle data based on diversified commerce conjecture to build and sustain a competitive Advantage by expanding analytics capabilities for successful career.					

Program	Program Specific Outcomes(PSOs)					
After the	After the successful completion of B.Com(BusinessAnalytics) program, the students are					
expected	to					
PSO1	Hands-on learning of leading analytical tools.					
PSO2	To acquire the ortical knowledge of data science tools, but will also gain					
1302	exposure to business perspectives.					
	The Career opportunities after completionofB.Com(BA)degreeare Business					
PSO3	Analyst, Quantitative Analyst, Operations Research Analyst and Market research					
	Analyst.					
PSO4	Prospective career opportunities and growth in the field of big data analytics					
PSO5	Learning trending programming language for career advancements					

Program	Program Objectives (POs)					
	The B.Com(BusinessAnalytics) program describe accomplishments that graduates are					
expected	to attain within five to seven years after graduation					
PO1	Comprehensive knowledge about various too lsand technique so business Analytics					
PO2	Integrating research with business analytics					
PO3	Enhance career opportunities globally and nationally in the emerging field of business analytics					
PO4	Learn emerging programming language for professional purposes					
PO5	Applying business analytical tools in decision making and practical problems.					

BHARATHIAR UNIVERSITY: COIMBATORE 641046 BACHELOR OF COMMERCE WITH BUSINESS ANALYTICS (AFFILIATEDCOLLEGES)

(For the students admitted during the academic year 2023–24onwards)

Course code	TITLE OF THE COURSE	L	T	P	C
Core II	FUNDAMENTALS OF BUSINESS ANALYTICS	4			4
Pre-requisite	Basic In Business Analytics	Sylla Vers		2025	-2026

Course Objectives:

The main objectives of this course are to:

- To achieve and establish vital understanding of big data application in business intelligence.
- > To institute the concept of systematic transformation of process-oriented data into information of underlying business process.
- To exhibit knowledge of data analysis techniques and to apply principles of data sciences integrating enterprise reporting.

Expected Course Outcomes: On the successful completion of the course, student will be able to: Outline the business analytical role K2 2 K4 Examine the business view of information technology application 3 Explain the concepts of OLTP, OLAP and BI **K**3 4 Demonstrate the data integration and data modelling concepts K4 5 List the concepts of Enterprise reporting and BI in real world k4

K1-Remember; K2-Understand; K3-Apply; K4-Analyze; K5-Evaluate; K6-Create

Unit:1	INTRODUCTION TO THE BA	15hours
CIIICOI	II (IROD COITO) TO THE DIT	ic ilouis

Introduction to the BA Role: Business Analysis -Business Analyst - The evolving role of the Business Analyst - The BA roadmap: different levels of business analysis - The basic rules of Business &Business Analysis-Classical Requirements and Tasks performed by Business Analysts. **Project Definition and Scoping:** Aspects - Projects phases - Project approaches (Waterfall, Agile, Iterative, Incremental) - The role of the BA across the project lifecycle.

Unit:2 INFORMATION TECHNOLOGY APPLICATIONS 10--hours

Business view of Information Technology Applications: Core business process—Baldrige Business Excellence framework-Key purpose of using IT in business-Enterprise Applications

- Information users and their requirements. **Data Definition:** Types of Data – Attributes and Measurement – Types of data sets – Data quality – Types of Digital Data.

Unit:3 OLTP and OLAP 10--hours

Introduction to OLTP and OLAP-OLTP-OLAP-Different OLAP Architectures-OLTP and OLAP – Data models for OLTP and OLAP – Role of OLAP Tools in BI Architecture. Business Intelligence – Business Intelligence defined – Evolution of BI and Role of DSS, EIS, MIS and Digital Dashboards – Need for BI – BI value chain – Introduction to Business Analytics. BI Definitions and Concepts – BI Component Framework – Need for BI – BI Users

-Business Intelligence applications -BI roles and responsibilities.

Unit:4 DATAINTEGRATION 15--hours

Data Integration –Data Warehouse–Goals –Data sources–Extract –Transform, Load–Data Integration–Technologies–Data Quality maintenance–Data profiling. **Data Modelling**– Basics–Types–Techniques–Fact table –Dimension Table–Typical Dimensional Models–Dimensional modeling life cycle – Designing the Dimensional Model.

Uı	Unit:5 KPI and PERFORMANCE		8hours						
		MANAGEMENT							
M	leasures, M	Ietrics, KPI sand Performance Management — Definition - Management	Measurement system						
tei	terminology – Role of Metrics and metrics supply chain – fact based decision making and KPIS								
us	e of KPIs	 potential source for metrics. Enterprise Reporting – Report 	ort standardization –						
Ва	alanced sco	ore card – dashboards – scoreboards vs. dashboards. BI in R	eal world – BI and						
m	obility- BI	and cloud computing-BI for ERP systems-Social CRM and BI	[.

ALLIED I		BUSINESS STATISTICS-I	4			2
Pre-requisite		ALLIEDI:BUSINESS STATISTICS-I		Syllabus Version		2025- 2026
Course Objecti	ves:					
The main object		is course are to:				
To enrich	the knowl	edge in statistics and to solve the statistical problems	in analy	ysis		
of business pro	blems.					
		data collection, graphical presentation and classification				
To inculca	ite the kno	owledge of relationship between measures of variation	and va	lue de	eviati	ion.
	0.4					
Expected Cour						
		tion of the course, student will be able to:	· · · · · · · · · · · · · · · · · · ·		K1	
Produce appropriate graphical and numerical descriptive statistics for different types of data.						
	Apply statistical concepts to analyze the business problems.					
	Explain the concepts of average and range of data collection.				K2 K2	
1	Explain the concepts of average and range of data concerton. Examine the relationship between the variations.					
5 Outline the preparation of graph and table.						,
		stand; K3 -Apply; K4 -Analyze; K5 -Evaluate; K6 -Create			K2	
TT-Remember,	1X2-Ollder	INTRODUCTION OF BUSINESS STATISTICS		Hou	rc_ 1	2
UNIT–I		INTRODUCTION OF BEOMY ESS STATISTICS		1100	15- 1	.4
MeaningofData	andinform	Statistics-Functions, Scope, Importance and Limitatio nation-Classification and Collection of Primary and Second cols-Sampling & Sampling techniques.				ring
UNIT-II		PRESENTATION OF DATA		Hou	rs- 12	2
Presentation of Diagrammatic (curves – Ogive	1D, 2D) a	ormation of Frequency distribution table – Classifica and graphical presentation- Graphs of Frequency Dis	tion an tributio	d Tab on –fr	oulati eque	ion- ncy
UNIT-III		CENTRAL TENDENCY		Hou	rs- 1'	2.
	ntral tando	ency–Different methods of calculation of Mean, Media				
		n – Empirical Relation.	II,IVIOU		шеп	.IC
UNIT-IV		MEASURES OF DISPERSION		Hou	urs- 12	
Measures of Di Deviation,Stand	arddeviati	- Different methods of calculation of Range, Quart on (Grouped and Ungrouped data), Coefficient of Variation ation, Correcting incorrect values of standard deviation	ile dev 1–Relat	iation ionsh	ı, M	
UNIT-V		CORRELATION		Hou	rs- 12	2
Correlation- Me	eaning an	Measures of skewness- Pearson's and Bowley's cond Definition- scatter diagram, Karl Pearson's coefficient, and Methods of Least squares.

Course code	TITLE OF THE COURSE		T	P	C
Core III	COMPUTER APPLICATION PRACTICALS I – ANALYSIS WITH EXCEL	-	-	-	3
Pre-requisite	Basics knowledge in MS-Office	Sylla Vers		2025 2026	

Course Objectives:

The main objectives of this course are to:

- ➤ To inculcate the knowledge of MS Excel
- > To understand the basic statistics tools &methods

Exp	ected Course Outcomes:	
On	the successful completion of the course, student will be able to:	
1	To outline the Analytical commands in Excel	K2
2	To identify the statistical tools for problem solving	K2
3	To analyze a program using appropriate analytical tool	K3
K1	-Remember; K2 -Understand; K3 -Apply; K4 -Analyze; K5 -Evaluate; K6 -Create	
		(45Hours)

1. Suppose that at the beginning of May 2012 you purchased shares in Apple, Inc. (Nasdaq: AAPL). It is now five years later and you decide to evaluate your holdings to see if you have done well with this investment. The table below shows the market prices of AAPL.

DATE	PRICE
2012	59.77
2013	121.19
2014	188.75
2015	135.81
2016	256.88
2017	337.41

- a) Enter the data, as shown, into a worksheet and format the table as shown.
- b) Create a formula to calculate rate of return for each year. Format the results as percentages with two decimal places.
- c) Calculate the total return for the entire holding period. What is the compound average annual rate of return?
- d) Create a Line chart showing the stock price from May2006toMay2011. Make sure to title the chart and label the axes. Now, create an XY Scatter chart of the same data. What are the differences between these types of charts? Which type of chart is more appropriate for this data?
- e) Experiment with the formatting possibilities of the chart. For example,

you might try changing it to a 3-D Line chart and fill the plot area with a marble background. Is there any reason to use this type of chart to display this data? Do the "enhancements" help you to understand the data.

2. In your position as research assistant to a portfolio manager, you need to analyze the profitability of the companies in the portfolio. Using the data for Chevron Corporation below:

FiscalYear	2017	2016	2015	2014	2013
TotalRevenue	1,98,198	1,71,636	2,64,958	2,20,904	2,04,892
NetIncome	19,024	10,483	23,931	18,688	17,138

- a) Calculate the net profit margin for each year.
- b) Calculate the average annual growth rates for revenue and net income using the GEOMEAN function. Is net income growing more slowly or faster than total revenue? Is this a positive for your investment in the company?
- c) Calculate the average annual growth rate of total revenue using the **AVERAGE** function. Is this result more or less accurate than your result in the previous question? Why?
- d) Create a Column chart of total revenue and net income. Be sure to change the chart so that the x-axis labels contain the year numbers, and format the axis so that 2017 is on the far right side of the axis.
- 3. Repeat Problem 2 using the data below for Qualcomm Inc. However, this time you should create a copy of your worksheet to use as a template. Replace the data for Chevron with that of FQ_i su c^a al q o m m .

 2017 2016 2015 2014 2013

TotalRevenue	10,991	10,416	11,142	8,871	7,526
NetIncome	3,247	1,592	3,160	3,303	2,470

- a) Do you think that Qualcomm can maintain the current growth rates of sales and net income over the long run? Why or why not?
- b) Which company was more profitable in 2010? Which was more profitable if you take alonge rview? Would this affect your desire to invest in one company over the other?
- 4. Using the data for Paychex, Inc.(Nasdaq: PAYX), presented below:

Fiscal Year	2017	2016	2015	2014	2013
Sales	\$ 2000.82	\$ 2082.76	\$ 2066.32	\$ 1886.96	\$1674.60
EBIT	729.31	812.08	854.82	743.27	674.77
Total NetI ncome	477.00	533.54	576.14	515.45	464.91
Dividends Per	1.24	1.24	1.22	1.02	0.69
Share					
Basic EPS from total operations	1.32	1.48	1.56	1.35	1.23

Total assets	5,226.30	5,127.42	5,309.79	6,246.52	5,549.30
Accounts payable	37.3	37.33	40.25	46.96	46.67
Total liabilities	3,824.32	3785.94	4113.15	4294.27	3894.46
Retained earnings	856.29	829.50	745.35	1595.10	1380.97
Net cash from	610.92	688.77	724.67	631.23	569.23
operating activity					

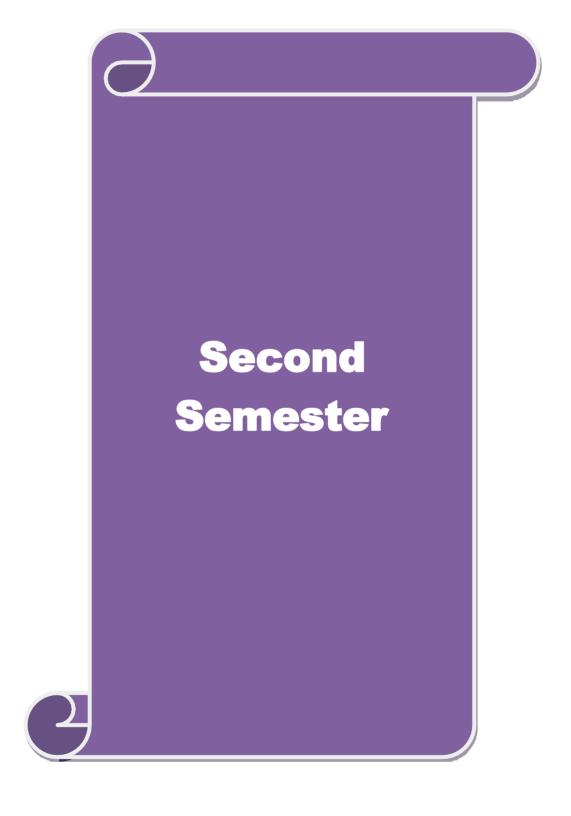

- a) Calculate the ratio of each year's data to the previous year for each of the above items for Pay chex,Inc. For example, for the year 2010, \$2,000.82/\$2,082.76 = 0.9607.
- From your calculations in part a, calculate each year strate of growth. Using the example in parta, the rat is 0.9607, so the percentage growth in sales for 2010 is 0.9607 1 or -3.93%.
- b) Calculate the average growth rate (using the **AVERAGE** function)of each of the above items using the results you calculated in part b. These averages are arithmetic averages.
- Use the **GEOMEAN** function to estimate the compound annual average growth rate (CAGR) for each of the above items using the results that you calculated in part a. Be sure to subtract 1 from the result of the **GEOMEAN** function to arrive at a percent change. These averages are geometric averages.
- d) Compare the results from part c (arithmetic averages using the **AVERAGE** function) to those for part d (geometric averages using the **GEOMEAN** function) for each item. Is it true that the arithmetic average growth rate is always greater than or equal to the geometric average (CAGR)?

Contrast the results for the geometric averages to those for the arithmetic average for the variables listed below. What do you observe about the differences in the two growth estimates for Sale and Accounts Payable? What do you observe about the differences in the two estimates for Total Assets and Retained Earnings? Hint: Look at the results from part b (the individual yearly growth rates) for each variable to draw some conclusions about the variation between the arithmetic and geometric averages

- 1. Sales
- 2. EBIT
- 3. Total Assets
- 4. Accounts Payable
- 5. Retained Earnings
- 2. Cashbudget using What If Analysis
- 3. Using Goal Seek to calculate Break Even Points
- 4. Sensitivity analysis of Capital Budgeting-Scenario Analysis, NPV Profile Charts
- 5. Financial Forecasting-Income Statement, Assets and Liabilities on Balance Sheet
- 6. Analysing Data sets with Tables and PivotTables.

Course code	TITLE OF THE COURSE	L	T	P	C
Core V	COMPUTER APPLICATION PRACTICAL II - C++			4	4
Pre-requisite		Sylla Versi			

Course Objectives:

The main objectives of this course are to:

- ➤ To in culcate C++programming ability among the students.
- > To provide knowledge about the implementation of C++concepts into programming

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

1	Demonstrate C++ Programming Structure	K1,K2
2	Apply operators and functions of C++	K3
3	Illustrate the object oriented concept in programming	K2

K1-Remember; K2-Understand; K3-Apply; K4-Analyze; K5-Evaluate; K6-Create

60--hours

Syllabus

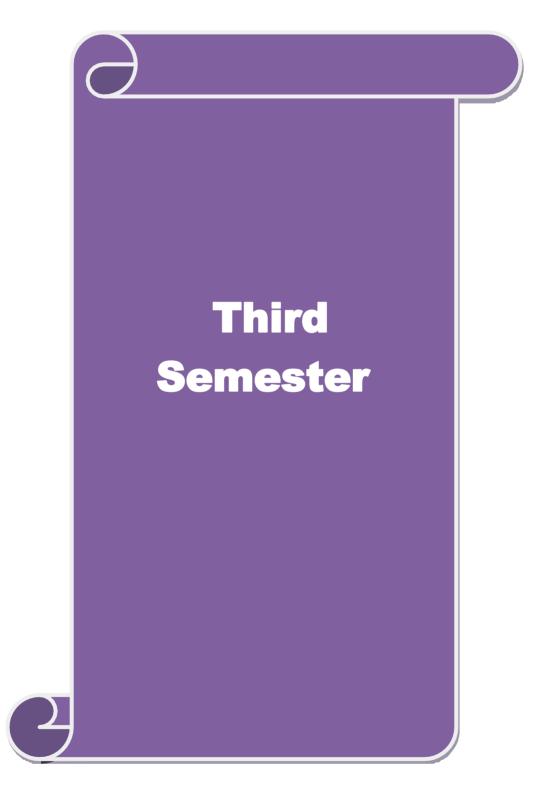

- 1. Odd and Even series
- 2. Maximum and Minimum Numbers
- 3. Arithmetic operations using member functions
- 4. Students details
- 5. Details of manager using array of objects
- 6. Computation of mean values using friend function
- 7. Swapping of two values using friend function
- 8. Static Member function using static data member
- 9. Sum of two complex numbers using constructors
- 10. String Manipulation using dynamic constructors
- 11. Destroy the object using Destructors
- 12. Simple and compound interest using Single Inheritance
- 13. Calculation of Depreciation
- 14. Hybrid Inheritance
- 15. Virtual Functions.

Course code		TITLE OF THECOURSE	L	Т	P	C
Core IX		COMPUTER APPLICATION PRACTICAL III – DATABASE PROGRAMMING			4	3
Pre-requisite		Basic application knowledge in SQL	Syllabus 2 Version 2			
Course Object	tives:					
The main object	ctives of thi	s course are to:				•
To provide comprehensive knowledge about relational and nosql database						

To provide comprehensive knowledge about relational and nosql database management system

Expected Course Outcomes:

On	On the successful completion of the course, student will be able to:					
1	Interpret relational database management concepts	K1				
2	Develop the tables using normalization	K2				
3	Illustrate SQL operators and keys	K3				

K1-Remember; **K2**-Undestand; **K3**-Apply; **K4**-Analyze; **K5**-Evaluate; **K6**-Create

60--hours

Syllabus

- 1. Normalize the following dataset:
 - a) Employee database
 - b) Students database
 - c) Hospital database
- 2. Data Definition Language and Data manipulation Language Table:

Student Reg no number(5) primary key

Studt name varchar2(15)

Gender char (6)

Dept name char(15)

Address char(25)

Percentage number(4,

2)Queries:

- a) To create a table, describe a table, alter a table, drop a table, and trun catea table
- b) To insert values, retrieve records, update records, delete records
- 3. Create an Employee table with following field.

Eno number (5) primary key

Enamevarchar2(20)not null Dept no

number (2) not null

Desigchar(10)not null

Sal number(9, 2)not null

- a) Insert values and display the records
- b) Display sum, maximum amount of basic pay
- c) List the name of the clerks working in the department 20
- d) Display name that begins with "G"
- e) List the names having,, I"as the second character
- f) List the names of employees whose designation are,, Analyst" and,, Salesman"
- g) List the different designation available in the Employee table without duplication (distinct)
- 4. Create a student table with the

following fields S tuno number (5)

primary key

StunmVarchar2(20)

Age number(2)

Mark1 number(3)

Mark2 number(3)

Mar 3 number

(3) Oueries:

- a) Insert values and display there cords
- b) List the names and age of the student whose age is more than 12
- c) Display total and average of marks
- d) Display the names of the maximum total &minimum total student
- e) List the names of the student that ends with, A"
- f) List the names of student whose name shave exactly 5 characters
- 5. Create the table PAYROLL with the following fields and insert the values:

Empl no	number(8)
Empl name	varchar2(8)
Dept	varchar2(10)
Bas pay	number(8,2)
HRA	number(6,2)
DA	number(6,2)
Pf	number(6,2)
Net pay	number(8,2)
Queries:	

- a) Update the records to calculate the net pay.
- b) Arrange the records of the employees in ascending order of their net pay.
- c) Display the details of the employees whose department is" Sales".
- d) Select the details of employees whose HRA>=1000andDA<=900.
- e) Select the records in descending order.

Create a Table Publisher and Book with the following fields: Table: publisher

Pub code Varchar2 (5)
Pub name Varchar2 (10)
Pub city Varchar2 (12)

Pub State Varchar2 (10) Bookcode Varchar2(5)Table:

Book BooktitleVarchar2(15) Book code Varchar2(5) Book price Varchar2(5)

Oueries:

- f) Insert the records into the table publisher and book.
- g) Describe the structure of the tables.
- h) Show the details of the book with the title "DBMS".
- i) Show the details of the book with price>300.
- j) Show the details of the book with publisher name "Kalyani".
- k) Select the book code, book title; publisher city is "Delhi".
- l) Select the book code, book title and sort by book price.
- m) Count the number of books of publisher starts with "Sultanchand".
- n) Find the name of the publisher starting with "S".
- 6. CreateOrderstableandcustomerstablewithfollowingfields:Table:order

Order id number (10)

Customer id number(5)

Order date date Table: customers

Customer id number(5)
Cust name varchar2(10)
Contactname varchar2(10)

Country varchar2(10)

- a) Perform INNERJOIN, that selects records that have matching values in both tables
- b) Perform LEFTJOIN, that selects records that have matching values in both tables
- c) Perform RIGHTJOIN, that selects records that have matching values in both tables.
- 7. Create Customer Table and supplier table with following fields: Table: Customer

Cus id number(10) First Name varchar2(10) Last Name varchar2(10) varchar2(10) City Country varchar2(10) Phone number(10)Table: Supplier Supid number(10)Company Name varchar2(10) Contact Name varchar2(10) City varchar2(10) Country varchar2(10) Phone number(10)Fax number(10)

- a) Insert the records into the table customer and supplier.
- b) Describe the structure of the tables.
- c) List details of customer table and supplier table.
- d) Perform full outer join from customer on supplier table order by country

MONGODB:

- 9. Create a Student Database in Mongo DB using "use" Command.
- 10. Create program using crud operation using MongoDB.
- 11. Create program text search and indexes using MongoDB.
- 12. Create the replicasetin the mongo shell and test the configuration

WEKA:

- 13. Demonstration of preprocessing on data set student .arff
- 14. Demonstration of classification rule process on dataset employee.arffusingid3 algorithm
- 15. Demonstration of clustering rule process on data set student.arffusing simplek- means
- 16. Demonstration of preprocessing on data set labor .arff.

	HEALTH & WELLNESS				
AUDIT		0	0	2	1

'(First four digits in the subject code is branch code and Seventh digit is Semester)

** Health & Wellness has one credit for the third semester only and it has no credits for other semesters.

Skill Areas:

Physical Fitness, Nutrition, Mental Health. Awareness on Drug addiction and its effects

Purpose:

The Health & Wellness course focuses on teaching the elements of physical. Mental, Emotional, social, Intellectual, Environmental well-being which are essential for overall development of an individual. The course also addresses the dangers of substance abuse and online risks to promote emotional and mental health.

Learning Outcomes:

Upon completion of the Health & Wellness course, students will be able to:

- 1. Demonstrate proficiency in sports training and physical fitness practices.
- 2. Improve their mental and emotional well-being. Fostering a positive outlook on health and life.
- 3. Develop competence and commitment as professionals in the field of health wellness.
- 4. Awareness on drug addiction and its ill effects

Focus:

During the conduct of the Health & Wellness course, the students will benefit from the following focus areas:

- 1. Stress Management.
- 2. Breaking Bad Habits.
- 3. Improving Interpersonal Relationships.
- 4. Building Physical Strength & Inner Strength

Role of the Facilitator:

The faculty plays a crucial role in effectively engaging with students and towards achieving learning outcomes Faculty participation involves the following areas:

Mentorship & Motivation: The Facilitator mentors students in wellness and self-discipline
while inspiring a positive outlook on health. Faculty teach stress management, fitness, and
daily well-being.

- **2. Promoting a safe and Inclusive Environment:** The facilitator ensures a safe, inclusive, and respectful learning environment for active student participation and benefit
- **3. Individualised Support and Monitoring Progress:** The facilitator plays a crucial role in providing personalized support, monitoring and guidance to students.

Guided Activities:

In this course, several general guided activities have been suggested to facilitate the achievement of desired learning outcomes. They are as follows:

- 1. Introduction to Holistic Well-being.
- 2. Holistic Wellness Program- Nurturing Body and Mind
- 3. Breaking Bad Habits Workshop.
- 4. Improving the elements of physical, emotional, social, intellectual, environmental and mental well-being.
- 5. Creating situational awareness, digital awareness.
- 6. Understanding substance abuse, consequences and the way out.

Period Distribution

The following are the guided activities suggested for this Audit course.

The Physical Director should plan the activities by the students.

Arrange the suitable Mentor / Guide for the wellness activities.

Additional activities and programs can be planned for Health and Wellness.

S.NO	GUIDED ACTIVITIES	Period								
1.	Introduction to Holistic Well-being									
	1. Introduce the core components of Health & Well-being namely Physical,									
	mental and emotional well-being									
	2. Provide worksheets on all the four components individually and explain the									
	interconnectedness to give an overall understanding.									
2.	Wellness Wheel Exercise (Overall Analysis)									
	• Guide students to assess them well-being in various life dimensions									
	through exercises on various aspects of well -being, and explain the									
	benefits of applying wellness wheel.									
	• Introduce Tech Tools:									
	• Explore the use of technology to support well-being.									
	Introduce students to apps for meditation, sleep tracking, or healthy recipe									
	inspiration.									
3	Breaking Bad Habits (Overall Analysis)									

- Open a discussion on bad habits and their harmful effects.
- Provide a worksheet to the students to identify their personal bad habits.
- Discuss the trigger, cause, consequence and solution with examples.
- Guide them to replace the bad habits with good ones through worksheets.

4 Physical Well-being

1. Fitness

Introduce the different types of fitness activities such as basic exercises, cardiovascular exercises, strength training exercises, flexibility exercises, so on and so forth. (Include theoretical explanations and outdoor activity).

2. Nutrition

Facilitate students to reflect on their eating habits, their body type, and to test their knowledge on nutrition, its sources and the benefits.

3. Yoga & Meditation

Discuss the benefits of Yoga and Meditation for one's overall health. Demonstrate different yoga postures and their benefits on the body through visuals (pictures or videos)

4. Brain Health

Discuss the importance of bran health for daily life. Habits that affect brain health (irregular sleep, eating, screen time) Habits that help for healthy brains (reading, proper sleep, exercises). Benefits of breathing exercises and meditation for healthy lungs.

5. Healthy Lungs

Discuss the Importance of lung health for daily life. Habits that affect lung health (smoking, lack of exercises). Benefits of breathing exercises for healthy lungs.

6. Hygiene and Grooming

Discuss the importance of hygienic habits for good oral, vision, hearing and skin health Discuss the positive effects of grooming on one's confidence level and professional growth.

Suggested Activities (sample):

Nutrition:

Invite a nutritionist to talk among the students on the importance of nutrition to the body or show similar videos shared by

SCAA DATED
experts on social media. Organize a 'Stove less/fireless
cooking competition' for students where they are expected to
prepare a nutritious dish and explain the nutritive values in
parallel.
Emotional Well-being
1. Stress Management
Trigger a conversation or provide self-reflective worksheets to identify the
stress factors in daily life and their impact on students' performance. Introduce
different relaxation techniques like deep breathing, progressive muscle
relaxation, or guided imagery. (use audio recordings or visuals to guide them
through these techniques). After practicing the techniques, have them reflect
on how these methods can help manage stress in daily life.
2. Importance of saying 'NO'
Explain the students that saying NO' important for their Physical and mental
wen-being. Performance Growth and Future. Confidence, Self-respect, Strong
and Healthy Relationships, budding reputation for self and their family (avoid
earning a bad name)
Factors that prevent them from saying 'NO'
How to practice saying"NO"
3. Body positivity and self- acceptance
Discuss the following with the students
What is body positivity and self- acceptance
Why is it important
Be kind to yourself
Understand that everyone's unique.
Suggested activities (sample)
(Importance of saying "NO")
Provide worksheets to self- reflect on,
, and the second

- ...how they feel when others say "no" to them
- ...the situations where they should say "no"

Challenge students to write a song or rap about the importance of saying no and how to do it effectively.

Students can perform their creations for the class.

6 Social Well-Being

1. Practicing gratitude

Discuss the importance of practicing gratitude for building relationships with family, friends, relatives, mentors and colleagues.

Discuss how one can show gratitude through words and deeds.

Explain how practicing gratitude can create "ripple effect".

2. Cultivating kindness and compassion

Define and differentiate between kindness and compassion.

Explore practices that cultivate these positive emotions.

Self-compassion as the foundation.

The power of small gestures.

Understanding another's perspective

The fruits of compassion

3. Practising Forgiveness

Discuss the concept of forgiveness and its benefits Forgiveness What is it? and

What It isn't?

Benefits of forgiveness.

Finding forgiveness practices.

4. Celebrating Differences

Appreciate the value or individual differences and foster inclusivity The World A Tapestry of Differences (cultures. beliefs. abilities. and appearances)

Finding strength In differences (diverse perspectives and experiences lead to better problem-solving and innovation). Celebrating differences. not ignoring them (respecting and appreciating the unique qualities)

Activities for celebrating differences (share culture, learn about others, embrace new experiences)

5. Digital Detox

Introduce the students to:

The concept of a digital detox and its benefits for social well-being How to disconnect from devices more often to strengthen real-world connections

Suggested Activities (sample):

(Practicing Gratitude)

Provide worksheets to choose the right ways to express gratitude.

Celebrate 'gratitude day' in the college and encourage the students to honour the house keeping staff in some way to express gratitude for their service.

7 Intellectual Well-being

1. Being a lifelong Learner

Give students an understanding on:

The relevance of intellectual well-being in this 21st — century to meet the expectations in personal and professional well-boing

The Importance of enhancing skills.

Cultivating habits to enhance the intellectual well-being (using the library extensively, participating in extra-curricular activities, reading newspaper etc.)

2. Digital Literacy

Discuss:

The key aspect of digital literacy and its importance in today's world.

It is more than just liking and sharing on social media.

The four major components of digital literacy (critical thinking, communication, problem-solving, digital citizenship).

Why is digital literacy Important?

Boosting one's digital skills.

3. Transfer of Learning

Connections between different subject- how knowledge gained in one area can be applied to others.

Suggested Activities(sample):

Intellectual Well-being

Provide worksheets to students for teaching them how to boost intellectual well-being.

Ask the students to identify a long-standing problem in their locality, and come up with a solution and present it in the classroom. Also organize an event like 'Idea Expo' to display the designs, ideas, and suggestions. to motivate the students to improve their intellectual well-being.

8 Environmental Well-being

1. The Importance of initiating a change in the environment.

The session could be around:

Defining Environmental well-being (physical, chemical, biological, social and psychosocial factors) — People's behaviour, crime, pollution, Political activities, infra-structure, family situation etc.

Suggesting different ways of initiating changes in the environment responsibility,

Creating, awareness, Volunteering.

Approaching administration).

Suggested activities (sample).

Providing worksheets to self-reflect on how the environment affects their life, and the ways to initiate a change.

Dedicate a bulletin board or wall space (or chart work) in the classroom for students to share their ideas for improving environmental well-being

Creating a volunteers' club in the college and carrying out monthly activities like campus cleaning, awareness campaigns against noise pollution, (loud speakers in public places), addressing antisocial behaviour on the campus or in their locality

9 Mental Well-being

1. Importance of self-reflection

Discuss:

Steps involved in achieving mental well-being (self-reflection, self- awareness, applying actions, achieving mental well-being).

Different ways to achieve mental well-being (finding purpose, coping with stress, moral compass, connecting for a common cause).

The role of journaling in mental well-being.

2. Mindfulness and Meditation Practices

Benefits of practicing mindful habits and meditation for overall wellbeing.

1. Connecting with nature

Practising to be in the present moment — Nature walk, feeling the sun, listening to the natural sounds.

Exploring with intention — Hiking, gardening to observe the nature.

Reflecting on the emotions, and feeling kindled by nature.

2. Serving people

Identifying the needs of others.

Helping others.

Volunteering your time, skills and listening ear.

Finding joy in giving.

3. Creative Expressions

Indulging in writing poems, stones, music making/listening. creating visual arts to connect With inner selves.

Suggested Activities(Sample):

(Mindfulness and Meditation) — Conducting guided meditation every day for 10 minutes and directing the students to record the changes they observe.

10 Situational Awareness (Developing Life skills)

1. Being street smart

Discuss:

Who are street smarts?

Why is it important to be street smart?

Characteristics of a street smart person: Importance of acquiring life skills to become street smart - (General First-aid procedure, CPR Procedure. Handling emergency situations like fire, flood etc).

2. Digital Awareness

Discuss:

Cyber Security

Information Literacy

Digital Privacy

Fraud Detection

Suggested Activities (sample):

(Street Smart) Inviting professionals to demonstrate the CPR Procedure

Conducting a quiz on Emergency Numbers.

11 Understating addiction

Plan this session around:

Identifying the environmental cues, triggers that lead to picking up this habit.

Knowing the impact of substance abuse- adverse health conditions, social isolation, ruined future, hidden financial loss and damaging the family reputation. Seeking help to get out of this addiction.

Suggested activities:

Provide Worksheets to check the students' level of understanding about substance addiction and their impacts.

Share case studies with students from real-life.

Play/share awareness videos on addiction/de-addiction, experts talk

*Conduct awareness programmes on Drugs and its ill effects.

(Arrange Experts from the concerned government departments and NGOs working in drug addiction issues) and maintain the documents of the program.

Closure:

Each student should submit a Handwritten Summary of their Learnings & Action Plan for the future.

Assessments:

- Use Self-reflective worksheets to assess their understanding
- Submit the worksheets to internal audit/external audit.
- Every student's activities report should be documented and the same have to be assessed by the Physical Director with the mentor. The evaluation should be for 100 marks. No examination is required.

Part	Description	Marks
A	Report	40
В	Attendance	20
С	Activities (Observation During Practice)	40
	Total	100

References/Resource Materials:

The course acknowledges that individual needs and resources may vary However, here are some general that may be helpful,

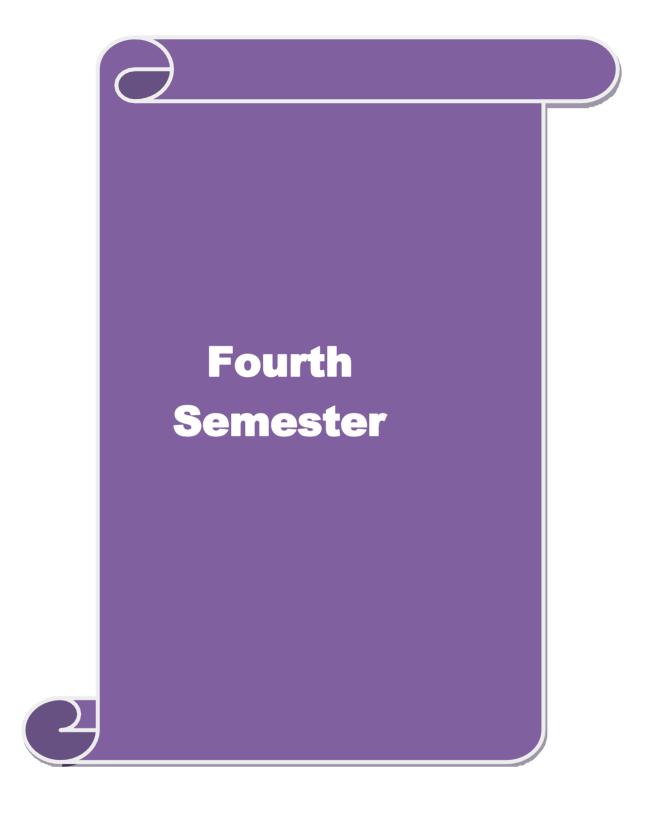

1. The Well-Being Wheel

2. Facilities & Spaces: Some activities may require access to specific facilities, resources or spaces. Students may need to coordinate with the college administration to reserve these as required.

Core XIII		COMPUTER APPLICATION PRACTICAL IV – ANALYSIS WITH SPSS & R			4	3	
Pre-requisite		Basic application knowledge in research	Syllal Versi	, Cab	2025-2	026	
Course Object	tives:						
The main obje	ctives of this	course are to:					
> To explore	and acquire sl	kills in SPSS and R Programming.					
Expected Con	rse Outcome	es:					
On the succe	sful completi	on of the course, student will be able to:					
1 Under	stand the fund	amental programming concepts of R			K1		
2 Applio	ation of SPSS	S and R Statistical tools to problems			K2		
3 Relate analysis techniques to datasets K3							
K1-Remembe	r; K2 -Underst	and; K3 -Apply; K4 -Analyze; K5 -Evaluate; K6 -Crea	te				
				- (1	1 1		
				Ot)hou	IS	

Syllabus

- 1. Find Factorial of a number using recursion
- 2. Write program to calculate Multiplication Table using R
- 3. Check If a Number is Positive, Negative or Zero
- 4. Creating vector and matrices using R program.
- 5. Import and Visualize data using scatterplots
- 6. Logical statements, c bind/r bind command in R and Create data set using data frames and factors and plot a graph.

Rand SPSS

7) Create an SPSS and R Dataset and determine the number of 18-22 year old population in 2000, 2004 and 2005

PARTICULARS	2000	2004	2005
UNIVERSITY STUDENT	47498	66309	70153
NUMBEROF TEACHERS	17302	19103	18098
NUMBEROF INSTITUTIONS	77	91	90
NUMBEROF STUDENTSINTHE%OFTHE 18-22YEAR-OLDPOPULATION	10.4	13.9	15

8) The data below are about the number of tourists in Hungary between 1988and1994.

Year	Quarters	Number of tourists (thousand persons)	Year	Quarters	Number of tourists (thousand persons)
1988	1	687.5	1990	4	1061.2
1988	2	944.7	1991	1	839
1988	3	1212.8	1991	2	1446
1988	4	999.4	1991	3	2274.7
1989	1	839.8	1991	4	1281.5
1989	2	1126.6	1992	1	868.1
1989	3	1423.4	1992	2	1374
1989	4	1164.8	1992	3	1823.9
1990	1	896.2	1992	4	1319.3
1990	2	1307.8	1993	1	854
1990	3	1887.8			

- a) Is there any trend in this model? (Normality test)
- b) Create a graph from the time series!
- c) Which seasonal decomposition should you use? Why?
- d) Do a seasonal decomposition! Analyze the parameters and the seasonal factors!
- e) Create graphs from the seasonal factors(saf_1,sas_1,stc_1)!
- f) Determine the number of tourists for the 2nd, 3rd and 4th quarter of 1993!

9)Open the Employee _data .save file! and analyse the following in SPSS and R Transform/Select Data

- g) What is the proportion of custodials?
- h) What is the proportion of women within managers?

Graphs

Create a column diagram about the proportion of employees grouped by gender! Embellish the graph! Put the value of proportions into the chart!

- a) Transform this column diagram in to a pie chart!
 - b) Create as catter plot about month since hire and beginning salary if you set markers by gender! Embellish the graph!
 - c) Create as catter plot about months incehire and previous experience if you set markers by employment category! Embellish the graph!
- d) Define simple box plot about previous experience! Embellish the graph!
 - e) Defines imple box plot about the month since hire categorized by the employment category! Embellish the graph!
- f) Define boxplot about the previous experience categorized by the employment category clustered by gender! Embellish the graph!
- g) Create a graph to test the normal distribution of beginning salary!

Central Tendencies, Measures of Distribution, Measures of Asymmetry

- a) Define the central tendencies of month since hire!
- b) Define the characteristics of distribution of previous experience!
- c) What is the average salary of employees belonging to the minority?

Correlation and Linear Regression

Is there any relation between previous experience and month since hire?

- b) Determine a linear relation between the months in hire and previous experience of employees!
- c) Definea 90% confidence interval for its b0 and b1 parameters!
- d) Definea90% confidence interval for they variable!
- e) Open the Cars. Save file!

Transform/Select Data

- a) How old are the cars? Create a new variable as age!
 - b) What is the ratio of American ,European and Japanese cars within cars with higher consumption than 20 miles per gallon?
- c) What is the ratio of those American cars which have 4-6-8 cylinders?

10. Estimation and Hypothesis Testing

- a) Definea95% confidence interval for the vehicle weight!
- b) Definea 90% confidence interval for the horse power!
- c) Definea 98% confidence interval for the time to accelerate!
- d) Test the hypothesis that the average consumption of carsis20miles per gallon!($\alpha = 5\%$)
 - e) Use One Sample T Test to determine whether or not the average miles per gallon significantly differ from 24 at 10% significance level!
- f) Test the hypothesis that the average horse power of cars is $100!(\alpha=5\%)$
 - g) Test the hypothesis that the average consumption of Japanese and American cars is the same! ($\alpha = 5\%$)
 - h) Test the hypothesis that the average consumption of European and American cars is the same! ($\alpha = 10\%$)
- i) Check if the horsepower follows a normal distribution or not!

Statistical Dependence

- a) Create across tabs from the model year and the country of origin!
- b) Create acros stabs from the number of cylinders and the country of origin!
- c) Is there any relationship between the country of origin and engine displacement?
- d) Is there any relationship between the country of origin and horsepower?
- e) Is there any relationship between the country of origin and vehicle weight?

3 Apply plotting graphs K3								
K1-l				K6-Cre	ate			
		<u> </u>				61	n_bou	1300

1. Word frequency analysis

Exercise 1.1. Write a program that reads a file, breaks each line into words, strips whitespace and punctuation from the words, and converts them to lowercase.

Exercise 1.2. Go to Project Gutenberg (http://gutenberg.org) and download your favorite out-of-copyright book in plain text format. Modify your program from the previous exercise to read the book you downloaded, skip over the header in formation at the beginning of the file, and process the rest of the words as before.

Then modify the program to count the total number of words in the book, and the number of time seach word is used. Print the number of different words used in the book. Compare different books by different authors, written in different eras. Which author uses the most extensive vocabulary?

Exercise 1.3. Modify the program from the previous exercise to print the 20 most frequently- used words in the book.

Exercise 1.4. Modify the previous program to read a word list (seeSection 9.1) and then print all the words in the book that are not in the word list. How many of them are typos? How many of them are common words that should be in the word list, and how many of them are really obscure?

2. Random numbers

Exercise 2.1. Write a function named choose_ from_ his that takes a histogram as defined in and returns a random value from the histogram, chosen with probability in proportion to frequency.

3. Word histogram

Exercise3.1.reads a file and builds a histogram of the words in the file **Exercise 3.2.**reads emma.txt, which contains the text of Emma by Jane Austen.

Exercise 3.3. updates the histogram by creating a new item or incrementing an existing one. **Exercise 3.4.** count the total number of words in the file by add up the frequencies in the histogram.

4. Most common words

Exercise 4.1. Find the most common words by applying the DSU pattern; most _common takes a histogram and returns a list of word- frequency tuples, sorted in reverse order by frequency.

Exercise4.2. Prints the ten most common words.

5. Optional parameters

Exercise5.1. Prints the most common words in a histogram.

6. Dictionary subtraction

Exercise6.1.Python provides a data structure called set that provides many common set operations. Read the documentation at http://docs.python.org/2/library/std types.html#types -set and

Exercise 6.2. Write a program that uses set subtraction to find words in the book that are not in the word list.

Solution:http://thinkpython.com/code/analyze_book2.py.

7. Random words

Exercise7.2:Use keys to get a list of the words in the book, Build a list that contains the cumulative sum of the word frequencies. The last item in this list is the total number of words in the book, n, Choose a random number from 1 to n. Use a bi section search to find the index where the random number would be inserted in the cumulative sum, Use the index to find the corresponding word in the word list.

Exercise 7.2. Write a program that uses this algorithm to choose a random word from the book. Solution: http://think.python.com/code/analyze_book3.py.

8. Markov analysis

Read a text from a file and perform Markov analysis

Add a function to the previous program to generate random text based on the Markov analysis. Finally mashup:

Solution: http://thinkpython.com/code/markov.py. You will also need http://thinkpython.com/code/emma.txt.

9. Doc strings for polygon, arc and circle.

Draw a stack diagram that shows the state of the program while executing circle(bob,radius). Solution: http://thinkpython.com/code/polygon.py.

10. Draws an Archimedian spiral.

Read about spirals at http://en.wikipedia.org/wiki/Spiral,then(orone of the other kinds).Solution: http:// think python. com/ code/ spiral. py.

Syllabus

- 1. Perform File Management in Hadoop.
- 2. Perform Health Care Analysis using Map Reduce.
- 3. Perform Word Count in Map Reduce using Politics data set.
- 4. Find Maximum temperature using Map Reduce.
- 5. Perform Inner joins in PIG using Human Resource data set.
- 6. Program to perform job tracker, word count using Travel dataset.
- 7. Perform PIG operations using Telecom dataset.
- 8. Perform HIVE operations using Politics dataset.
- 9. Cross Operation in PIG using Logistics dataset.
- 10. Order the data by Ascending and Descending operations Retail Dataset.

Core XX -SAS&		Basic knowledge in statistics	-	-	4	2
SCILAB-Practic Pre-requisite				;	2025-2026	
Course Objective	ves:					
	ighten Progra	analyse using tools in business analytics. amming and graphing capabilities to solve busines.	ess probler	ns.		
On the successf	ful completio	n of the course, student will be able to:				
1 Statistical Ar	nalytical Softv	vare	K	1		
2 Import and generate CSV files K ₂						
3 Analyze the data with different statical measures K_3						
4Perform cond	ogical operations	K	4			

	60hours

SAS

1.Student database:

Writing a Basic SAS Program Accessing Data in SAS Libraries

Create as a program by getting input from user for name, age, phone,

K1-Remember; K2-Understand; K3-Apply; K4-Analyze; K5-Evaluate; K6-Create

address .Give datelines with required variables.

Enter print command to display result of student.

2. Cardatabase:

Reading and Generating CSV Files Using Snippets & Using the Import Data Utility in SAS Studio Import a car database from permanent database from using snippets

Rename the file name and generate same csv file.

By using import utility option, import an excel file into sas and display the result.

- 3. Car Database:
 - a) Creating a New Column in SAS, Performing Conditional Log icin SAS from permanent database take car dataset
 - b) Add new column called Mark up by subtracting MDRP with Invoice
- 4. Heart Database:
 - a) Pickout heart dataset from permanent database
 - b) Give appropriate values to filterad at a and display the result
 - c) By using Air Dataset
 - d) Format the date column
- 5. Baseball Database:
 - a) Pickout Baseball dataset from permanent database
 - b) Select scatter plot and series plot
 - c) Change the settings in tab, option with necessary arguments
- 6. Iris Database:
 - a) Transform the dataset and set analysis variable, categorical variable.
 - b) Apply necessary arguments for selected graph and display the result.

7. Fish Dataset:

Summary Statistics, Distribution Analysis Using SAS Studio

- a) Perform summary & distribution analysis on fish dataset.
- b) Setrequired variable and give statistic measure top lot the graph
- 8. Class Database:
 - a) Assignsing le variable to analyse.
 - b) Apply necessary arguments for selected graph and display the result. Cars Database:
 - c) Perform Correlation Analysis ,One-Way ANOVA
 - d) Setrequired variable and give statistic measure top lot the graph
- 9. Fish Databse:

Analysis of Covariance & Forecasting Using SAS Studio

- a) Assignsing le variable to analyse.
- b) Apply necessary arguments for selected graph and display the result.

SciLab

- 10. Matrix manipulation using Scilab
- 11. Celsius temperatures can be converted to Fahrenheit by multiplying by9, dividing by 5, and adding 32. Assign a variable called C the value 37, and implement this formul at oassign a variable F the Fahrenheit equivalent of 37 Celsius.
- 12. Least Square Curve Fitting and plotting in scilab
- 13. Solvean ODE using Scilab
- 14. Write a program to input2 strings from the user and to printout (i)the concatenation of the two strings with a space between them, (ii) a line of aste risks the same length as the concatenated strings, and (iii) the reversed concatenation. For example:
 - i.Enterstring1:Markii.Enterstring2: Huckvaleiii. MarkHuckvale iv. elavkcuHkraM

Core		PROJECT AND VIVA VOCE	6			4
Pre-requisite		Knowledge in Core, Research Methods and Analytical Tools	Sylla Vers	bus sion	2025-20	026

Course Objectives:

The main objectives of this course are to:

- 1. The students will get on-the-job training and experience.
- 2. The students will gain knowledge on problem identification and solutions.
- 3. The students will gain a complete knowledge on the program and the course outcome.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

011	on the successful completion of the course, student will be usic to.					
1	Explain about how to collect literature.	K2				
2	Implement problem identification and will frame tool for collecting data	K3				
3	Evaluate and get practical exposure on the framed objective.	K5				
4	Execute and generate the procedure of compiling the collected data by using Analysis	K5				
5	Summarize and execute report writing, and will get complete knowledge of the course.	К3				

K1-Remember; K2-Understand; K3-Apply; K4-Analyse; K5-Evaluate; K6-Create
