B.Sc. Interior Design

Syllabus

AFFILIATED COLLEGES

Program Code: 22U

2025 - 2026 onwards

BHARATHIAR UNIVERSITY

(A State University, Accredited with "A++" Grade by NAAC, Ranked 21st among Indian Universities by MHRD-NIRF)

Coimbatore - 641 046, Tamil Nadu, India

Program Educational Objectives (PEOs)

| Program Educational Objectives (PEOs) | | | | | | | | |
|---|--|--|--|--|--|--|--|--|
| The B. Sc. Interior Design program describe accomplishments that graduates are expected to | | | | | | | | |
| attain wit | attain within five to seven years after graduation | | | | | | | |
| PEO1 | Creatively solve problems for a wide range of physical interior environments, including residential and commercial, and for a diverse group of users. | | | | | | | |
| PEO2 | Design at different environmental scales from single rooms to more complex and even multi-storey facilities. | | | | | | | |
| PEO3 | Develop layout and details that integrate building services to ensure user comfort and efficient functioning of the interior space. | | | | | | | |
| PEO4 | Conduct detailed study of the context and different users and arrive at a clear Design Program providing both qualitative and quantitative guidelines for design. | | | | | | | |
| PEO5 | Use a wide range of materials and methods of interior construction and assembly in executing their interior design ideas effectively and develop detailed drawings for the same. | | | | | | | |
| PEO6 | Select appropriate materials, provide specifications for finish and materials and estimate the quantities and cost of the project. | | | | | | | |
| PEO7 | Start, organize and operate a professional interior design practice with knowledge of the processes of client interactions, contracts, ethics, code and legislation. | | | | | | | |
| PEO8 | Integrate plants and interior landscape into the design of interior spaces and detail and specify systems and materials for the same. | | | | | | | |
| PEO9 | Apply sustainable design practices in their design of interior spaces. | | | | | | | |

Program Specific Outcomes (PSOs)

| Program | Program Specific Outcomes (PSOs) | | | | | | | |
|---|---|--|--|--|--|--|--|--|
| | After the successful completion of the B. Sc. Interior Design program, the students are | | | | | | | |
| expected | to demonstrate, | | | | | | | |
| PSO1 Understand and apply design theories and practices in the field of Interior Design | | | | | | | | |
| PSO2 | Ability to identify social, economic, environmental and cultural issues that have bearing on the Interior Design Process | | | | | | | |
| PSO3 | Have a clear understanding of human needs and methods for researching user requirements, socio-economic factors and cultural context. | | | | | | | |
| PSO4 | Apply knowledge of latest developments in materials and interior construction and detailing practices to their design projects. | | | | | | | |
| PSO5 | Follow and inspire high ethical values in professional practice | | | | | | | |
| PSO6 | Demonstrate sharp creative, technical, technological and critical thinking skills. | | | | | | | |
| PSO7 | Ability to specialize and work in areas such as furniture design, branding, interior landscape, lighting design, interior component and product design. | | | | | | | |

Program Outcomes (POs)

| Program | n Outcomes (POs) | | | | | | | |
|----------|--|--|--|--|--|--|--|--|
| | On successful completion of the B. Sc. Interior Design program, the students should | | | | | | | |
| demonstr | demonstrate, | | | | | | | |
| PO1 | PO1 A basic knowledge of Arts & Culture and an understanding of its impact on the Design of Interiors. | | | | | | | |
| PO2 | Understanding of the Basic Elements and Principles of Design and its application in 2D, 3D and Interior Design. | | | | | | | |
| PO3 | Knowledge of the development of Interior and Furniture Design and Architecture through History, and an understanding of its implications for design today. | | | | | | | |
| PO4 | Ability to follow a Design Process; to manipulate Form, Space, Colour, Lighting and Texture; and apply theoretical knowledge gained to develop Interior Design Solutions for projects. | | | | | | | |
| PO5 | Ability to plan and organise the Building Services effectively within the interior environment to improve safety, comfort, performance, efficiency and sustainable functioning of the built space. | | | | | | | |
| PO6 | Practical Knowledge of Interior Material Selection & Specification, Assemblies, Construction detailing and execution. | | | | | | | |
| PO7 | Knowledge and Ability to use computer technology for developing and communicating Design solutions. | | | | | | | |
| PO8 | Ability to understand ethical and professional responsibilities. | | | | | | | |
| PO9 | Knowledge of Environmental friendly practices in interior design | | | | | | | |
| PO10 | Ability to communicate effectively and work in interdisciplinary groups | | | | | | | |

BHARATHIAR UNIVERSITY:: COIMBATORE 641 046 B. Sc., Interior Design (CBCS PATTERN)

(For the students admitted from the academic year 2025-2026 and onwards)

| Core | Practical I | | | - | 7 | 4 |
| Pre-requisite | | High School level Drawing and Craft Skills | Syllat Versi | | 2025-2026 | |

The main objectives of this course are to:

- 1. Provide a framework for understanding the role of design in creating meaning and function.
- 2. Sensitize students to the conceptual, visual and perceptual issues involved in the design process.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| On the successful completion of the course, student will be able to. | | | | | | | |
|--|---|----|--|--|--|--|--|
| CO1 | Remember to incorporate the basics of design, the elements and principles of design. | | | | | | |
| CO2 | Understand the fundamental design principles through visual composition and manipulation of design that can be later transferred to the context of interior design. | K2 | | | | | |
| CO3 | Apply the inspiration received from external sources to develop designs through process of abstraction. | | | | | | |
| CO4 | Analyze different hands on skills by experimenting 2d relief works and designs using various materials and colours. | K4 | | | | | |
| CO5 | Evaluate all the experiments through proper design development and communication. | K5 | | | | | |
| CO6 | Create a design process in creating 2D/3D designs. | K6 | | | | | |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 2D DESIGN 20 hours

Designs involving various elements such as point, line, shape, colour and texture – use principles of design, grids, Golden section – apply to pattern creation & compositions such as mural design, fabric design, mosaics, linocut printing, collage etc.

Unit:2 3D DESIGN 20 hours

Exploring form creation: from 2D to 3D -- platonic solids (boards, paper), structural frames /joints (wood/ misc), Solid and Void compositions, Organic or free flowing Forms, Enclosing Space, Light and Texture. Use different materials such as clay, POP, metal etc.

Unit:3 DESIGN BY ABSTRACTION 22 hours

Study and analysis of forms, patterns and colour schemes in nature. Abstraction of natural forms and design of three-dimensional objects and two-dimensional patterns inspired by them.

Unit:4 OBJECT DESIGN 22 hours

Study and critical analysis of man-made objects – their purpose, functional suitability, formal appeal, etc – evolving suggestions for improvement of the same in light fixture, mobile, chair etc.

| Allied A | | Paper I | - | 4 | - | 4 |
| Pre-requisite | | English Reading & Writing, High School Level Indian and World History. | • | abus sion | 2025 | 5-2026 |

The main objectives of this course are to:

- 1. Develop knowledge of and appreciation for Art.
- 2. Analyze various art forms and understand its application in interiors.
- 3. Understand the socio-cultural influences on art and its reflection on interior design.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| On the | of the successful completion of the course, student will be able to. | | | | | | | |
|--------|---|----|--|--|--|--|--|--|
| CO1 | Remember the need for appreciation for Art in interior design | K1 | | | | | | |
| CO2 | Understand human culture and experience is grounded in the investigation of creativity, continuity and invention of art practices. | K2 | | | | | | |
| CO3 | Apply the knowledge of art and artifacts to study the objectives and ethosof each cultural period. | K3 | | | | | | |
| CO4 | Analyse various art forms to explore significant contributions to the development of cultural expression. | K4 | | | | | | |
| CO5 | Evaluate historical and contemporary expressive practices through critical encounters with visual and cultural productions. | K5 | | | | | | |
| CO6 | Create a comprehensive design solution with broader social and cultural contexts for design problems affecting the built environment. | K6 | | | | | | |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 INTRODUCTION 10 hours

What is Art? Purpose of Art; Art and Aesthetics; Essential Concepts in Context and Perspective; Why it matters; How we see; Critical Modalities.

Unit:2 ART THROUGH TIME 13 hours

Development of art: A survey of history of art forms: pre historic times to present times: changing nature of art through time in terms of content: form and material.

Unit:3 ART FORMS 13 hours

Exploration of art forms – study of traditional and contemporary art forms – painting, sculpture, architecture, decorative arts, design arts, digital art; Relationship between art and design from earliest time; Study of famous and influential Artists, Craftsmen and people who pioneered innovations in their own fields and their influence on design and other fields. For eg: Van Gogh, Dali, William Morris, etc.

Unit:4 ORNAMENT 12 hours

Study of ornament in Interior Design. Different types of ornamentation in the interiors. Study and evaluation of artifacts and historic examples and their applicability.

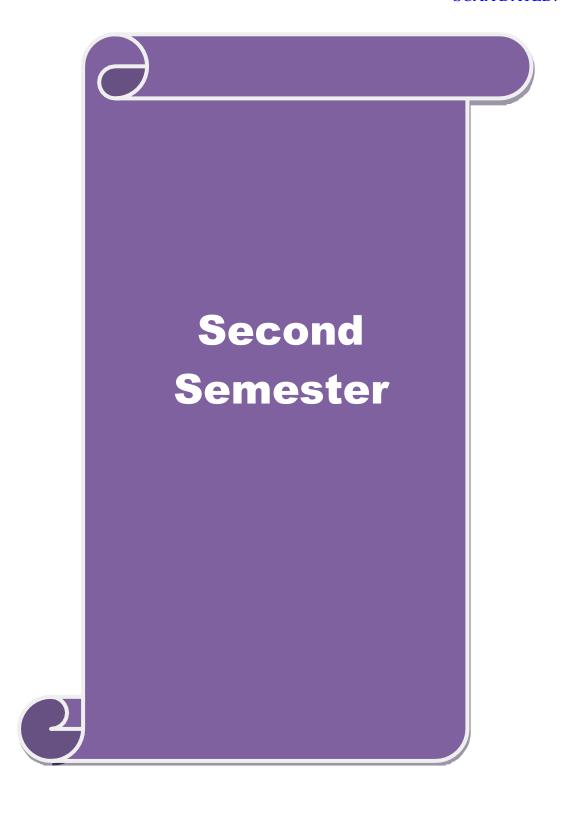

Unit:5 HERITAGE INTERIORS 12 hours

Introduction to Heritage Interiors: Evolution of Interiors in different regions of India wit examples. Heritage and identity at different spatial scales. Dimensions and scope of Heritag Interiors. Users and uses of Heritage interiors

Course Objectives: Awareness of Architecture through the ages, Material and Construction I, Basic Math & Physics concepts

The main objectives of this course are to:

- 1. Enable the students to gain an overview of Architectural History from ancient times to now.
- 2. Understand the Fundamentals of Architecture that guide design decisions.
- 3. Recognize the Elements of Design and Forms of Construction.
- 4. Identify features of modern architecture as modified by current cultural changes and material & construction technologies, and cultural implications.

| Expect | ted Course Outcomes: | | | | | |
|--------|---|----|--|--|--|--|
| On the | On the successful completion of the course, student will be able to: | | | | | |
| CO1 | Remember the development of architecture from pre historic time till now and the cultural and contextual determinants that produced that architecture. | K1 | | | | |
| CO2 | Understand architecture as evolving within specific cultural contexts including aspects of politics, society, religion, climate, the tools used and the different uses of building materials. | K2 | | | | |
| CO3 | Apply the knowledge of the development of architectural form with reference to Technology, Style and Character from the history of world architecture in creating specific designed impact. | К3 | | | | |
| CO4 | Analyze the spatial, structural and stylistic qualities associated with architecture and their contribution to the development of arches, post, lintel, truss, vaults, domes and orders. | K4 | | | | |
| CO5 | Evaluate how social, cultural, political, and geo-physical factors transform and affect the design of the built environment | K5 | | | | |
| CO6 | Examine the evolution of architects work and at the same time try to understand how they react to current challenges and opportunities in the profession and society. | | | | | |
| CO7 | Create knowledge for designing a space by understanding why a building was created a certain way in any given point in history. | K6 | | | | |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

| Unit:1 | INTRODUCTION – HISTORY | 12 hours | | | | | |
|---|------------------------|----------|--|--|--|--|--|
| Introduction – definition of Architecture; The Beginnings – Early History: Ajantha and Ello | | | | | | | |
| Caves. | | | | | | | |

Buddhist Architecture – Characteristic features- Sanchi stupa, Sthamba, Viharas and chaityas. Hindu Architecture (North) -Sun temple - Konark, (South) – Brihadeshwar temple, Meenakshi Amman Temple, Rock cut Temples – Mahabalipuram.

Islamic architecture – characteristic features. Taj Mahal, Charminar, Buland-Darwaza-Fatepur Sikri; Gateway of India, Victoria Memorial, The Open Hand, Lotus Temple-its architectural features.

| Unit:2 FUNDAMENTALS OF ARCHITECTURE | 12 hours |
|-------------------------------------|----------|
|-------------------------------------|----------|

Form; Space; Order; Elements of Architecture - Types, Systems and Components that inform design; Elementary forms of construction – arch, post, lintel, cantilever roofing techniques – truss, vaults and domes. The Design Process – Tools and Techniques for Generating Ideas. **BUILDING COMPONENTS** Unit:3 12 hours Drawings of the Components of a Building - indicating foundation, plinth, superstructure, lintel, slab; Different types of Structural systems: Load bearing walls – brick or stone masonry and Non Load bearing walls - Framed structure -- RCC construction, Steel framing with light roofing. Unit:4 **BUILDING MATERIALS** 12 hours Building Materials: Brick – Classification & Types, Clay products – clay tiles, terracotta, porcelain, stoneware, earthenware, Glazing and their uses - Glazed ceramic Tiles, Cementtypes and use, Sand, Timber -Classification, storage and use, Steel and Glass - types, properties and applications. STRUCTURAL SYSTEMS Unit:5 12 hours Structural Systems: Design Loads - Live load, Dead load, Wind load, Snow load, Earthquake loads. Framed structures- load bearing structural components- columns and beams- steel, concrete; Load bearing walls- Masonry structures, Prefabrication, cast-in site construction. Brief design concepts for earthquake loads. **Total Lecture hours** 60 hours Text Book(s) A History of Architecture, Sir Banister Fletcher, CBS Publications (Indian Edition), 20th A Global History of Architecture, Francis D.K. Ching, Mark M. Jarzombek, and Vikramaditya Prakash, 3rd Edition, John Wiley, 2013. Architecture-Form, Space and Order, Francis D.K.Ching, Van Nostrand Reinhold Company, New York, 2007. Art Students; Universities Press, 2012. **Reference Books** Introduction to Architecture, Francis D. K. Ching, James F. Eckler, Wiley; 1 edition, 2012. |---------------|------------------------------|--|---------------|---|---|---|
| Core | | Practical II | - | - | 7 | 4 |
| Pre-requisite | | BSc Interior Design, Semester 1 - Basic Design Studio, Theory of Interior Design. | Sylla Vers | | | |

The main objectives of this course are to:

- 1. Familiarize students with spatial planning as pertaining to residential interior design.
- 2. Providing them a structured approach to the design process including study of the context, user, materials and construction, concept and design development.
- 3. Develop Design ideation and inspiration methods.
- 4. Develop design drawing and presentation skills.

Expected Course Outcomes:

On the successful completion of the course, student will be able to

| On the | successful completion of the course, student will be able to: | |
|--------|--|----|
| CO1 | Remember the basic design elements and principles and the results of their manipulation. | K1 |
| CO2 | Understand the Space Standards, Anthropometry, Ergonomics, Services and Systems as related to users and activities in the Residential environment. | K2 |
| CO3 | Apply knowledge of the design elements and principles, space standards and human factors, to the given design context to create desired impact on perception, comfort and use. | |
| CO4 | Analyze the various factors like culture, climate, material, technology, comfort, aesthetics and performance that influence design process, perception and impact. | |
| CO5 | Evaluate the design outcome with respect to criteria based on space, comfort and aesthetic requirements to accommodate function; response to environmental and socio-cultural context. | |
| CO6 | Create various typology of interior designs and their applications in the residential spaces | K6 |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 USER & TYPOLOGY STUDY 21 hours

Study of Residential Spaces: Component spaces; Activity Analysis & Space Standards; Climatic Cultural Associations – Symbols and Meaning; Access & Enclosure; Circulation, Openings & Articulation; Structure, Materials & Construction; Surface, Colour & Texture.

Unit:2 CASE STUDIES 21 hours

Book Case Studies, Real Life Case Studies – Documentation, Analysis, and Inference for Design.

Unit:3 SITE ANALYSIS – CONTEXTUAL STUDY 21 hours

Analysis of Project Context – Site Analysis; Geographic, Topographic, Soil, Climatic, Wind and Sun direction, Cultural, Landscape, Access, Services & Utilities, Existing views, structures, materials, colours, service lines, circulation, water body, special features, wildlife and vegetation.

Unit:4 **CONCEPTUAL & SCHEMATIC DESIGN** 21 hours Adjacency Matrix, Bubble Diagram – Showing Spaces, Circulation, Access etc. Concept Stage: Design Concept presented as sketches (ink & colour pencil) showing 2D and 3D versions of the idea evolution. Spatial distribution shall be to proportion and can be shown as single line drawing. Conceptual models are optional. Scheme Stage: Drawings to Scale - Detailed Plan with furniture layout & fixtures, circulation, flooring level & finishes, Elevations and Sections and detail sketches as needed to clarify design idea. Colour scheme, material choices. **DESIGN PRESENTATION** Unit:5 21 hours Detailed Drawings to include: Double line Detailed Plan showing Furniture and Fixture layouts, Flooring levels & Finishes, Elevations, Sections, Detail sketches – 3D perspective / isometrics. Final Presentation on Cartridge paper, rendered in Ink & Colour. Colour scheme, Mood board and model to be included. **Total Lecture hours** 105 hours Text Book(s) Time Saver Standards for Building Types, Joseph De Chiara, Michael J Crosbie, McGraw Hill Education; 4th edition, 2014. Time Saver Standards for Interior Design and Space Planning, Joseph De Chiara, Julius Panero, Martin Zelnik, McGraw Hill 2011. |---------------|-----|--|------------------|---|---------|-----|
| Allied A | | Paper II | - | 5 | - | 4 |
| Pre-requisite | | School level Drawing & Colouring skills; BSc Interior Design- Semester 1 - Basic Design Studio, Theory of Interior Design. | Syllab Versio | | 2025-20 | 026 |

The main objectives of this course are to:

- To improve sketching ability of students
- 2. Enable students to learn and understand techniques of various methods of drawing representation.
- 3. Develop ability to use colour and varied media effectively in design drawing presentations.

Expected Course Outcomes:

| On the | successful completion of the course, student will be able to: | |
|--------|---|------------|
| CO1 | Remember the need for understanding basic forms and compositions to create effective drawings. | K 1 |
| CO2 | Understand different drawing media and demonstrate skill in illustrating environmental spaces using different rendering techniques and to understand the basic of standers drawings | K2 |
| CO3 | Apply architectural representation techniques to represent the daily objects | К3 |
| CO4 | Analyze the sciography for basic shapes | K4 |
| CO5 | Create design drawing for architectural elements and furniture. | K6 |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 INTRODUCTION TO FREEHAND DRAWING 15 hours

Why we need to Draw – Seeing and Looking – Sketching to Scale; Introductory Pencil Exercises with different pencil point sizes and tone building exercises, Drawing what you see - Contour drawing, Shape and Proportion, Perspective, Tone, Detail, Texture and Shadow; Basic exercises - Compositions of Still life, Plant forms, Daily objects; Perspective Sketches: Types of perspective views using vanishing points, Exercise – single object from multiple views; Shading exercises- study of light and shadow; Textures - Represent different textures and surfaces such as glass, water, stone, wood, metal and fabric. Use pencil, pen and charcoal.

Unit:2 **SKETCHING** 15 hours

Outdoor Sketching including Landscape – trees, foliage (pen, colour pencil); Details such as stone carving, wood or metal work, ornament on furniture, gates, fixtures (pen, pencil, charcoal); Landscape, water bodies and built structures in different media (pen, colour pencil, water colour). Interiors Sketching - perspectives, lighting and composition, textures and details, material expressions, individual furniture, elevations & plans etc. (pen with colour pencils /markers/pastels) Drawing from Photograph.

DRAFTING BASICS Unit:3 15 hours

Drafting Tools – Sheet types & sizes, Layout and Scale. Simple exercises in drafting, point and line, line types, line weights, straight and curvilinear lines, Hierarchy of lines in Multi-view drawings, dimensioning, lettering, borders, title panels, using pencil & ink and different types of sheets. Architectural symbols – representation of building elements, openings, materials, accessories etc., terminology and abbreviations used in architectural presentation.

| Unit:4 | MEASURED DRAWING | 15 hours | |
|--------|------------------|----------|--|
| | | | |

2D drafting - Orthographic Projection of simple objects, furniture: Multi-view Drawings - Plan, Elevations, the Cross Section; Measuring and drawing to scale – scales and construction of scales, simple objects, furniture, doors and windows etc. in plan, elevation and section etc. reduction and enlargement of drawings.

| Unit:5 | 3D PROJECTIONS & ARCHITECTURAL | 15 hours |
|--------|--------------------------------|----------|
| | REPRESENTATIONS | |

Isometric Views of Tables, Chairs, Cylindrical & Spherical elements, interior space etc. using simple isometric grid; Axonometric Construction of interior space or arrangement of objects. Sketching: Representation of landscape elements such as trees, indoor plants, planters, hedges, foliage, human figures in different postures, vehicles, street furniture and material textures, to scale; and their integration in 3D drawings. Sciography: Principles of Shade and Shadow- Shade and Shadows of Architectural Elements in Interiors. Shadows of Circular/ Cylindrical/ Spherical elements.

The main objectives of this course are to:

- 1. Develop a thorough knowledge of materials used for construction and finishing of interior wall, floor and ceiling surfaces and for door, window and ventilator openings.
- 2. Create efficient and elegant detailing for interior material junctions
- 3. Choose appropriate materials for different components of the interior structure based on aesthetics, functionality and cost.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| On the | On the successful completion of the course, student will be able to. | | | | | |
|--------|---|----|--|--|--|--|
| CO1 | Create a comprehensive list of materials and structures for a commercial or residential establishment. | K6 | | | | |
| CO2 | Create a comprehensive list of materials and structures for a commercial or residential establishment. | K6 | | | | |
| CO3 | Evaluate different types of wall systems and apply the correct choice of materials used in wall systems | K5 | | | | |
| CO4 | Analyze various types of flooring and floor finishes and make the right choice | K4 | | | | |
| CO5 | Evaluate different openings and ceiling systems and their functions in a Structure | K5 | | | | |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 MATERIALS IN INTERIOR I 12 hours

Wood and Wood-Based Materials -Properties and characteristics of wood and wood-based materials -Different types of wood species and their applications

Understanding wood veneers, laminates, and engineered wood products - Joinery techniques and finishes for wood-based materials. Metals and Metal Alloys-Introduction to various metals and metal alloys used in interior construction-Properties and characteristics of common metals and alloys- Applications of metals in interior design and construction-Metal finishes, treatments, and maintenance considerations.

Unit:2 MATERIALS IN INTERIOR II 12 hours

Glass and Glass Products - Properties and characteristics of glass -Different types of glass and their applications in interior design. Understanding glass products like mirrors, glass partitions, and decorative glass -Glass installation methods, safety considerations, and maintenance.

Unit:3 WALL SYSTEM 12 hours

Interior Wall materials, construction – framing (steel, wood), paneling (Plywood, MDF, Gypboard, Cement particle boards, HPL boards), Filling (insulation, air), Surface finish – Plaster, Paint, tile, Wood, glass, metal, stone, brick, Plywood, wall paper, fabric, - texturing marble, granite, white wash, color wash. Exterior Wall finishes - Stone, rubble, tiles, fresco, murals, glass and metals, paints. Alternative partitions - Free standing walls, Floating walls, glazed partitions.

Unit:4FLOORING SYSTEM12 hoursPlanning new structures- Installing mezzanines, Raising the floor, Openings in floors. Interior

floor finishes - Hard floor finishes, Resilient – asphalt tile, linoleum, cork, rubber, Soft floors – carpets and rugs, Exterior floors – Concrete slabs, tiles, mosaic, terrazzo and terracotta, Selection and characteristics of exterior floor finishes.

Unit:5 CEILING SYSTEMS 12 hours

Ceilings - Basic Principles, Types - Suspended ceilings, Angled and curved ceilings, Proprietary ceiling systems- hanging methods, Timber/steel and clay tile ceilings, other Considerations. Materials - Gyp-board, Acoustical tile, Metal, Glass, Wood, Clay tile - FinishTreatment- plastering, embossing, fresco, plaster of Paris.

| Course code | 33P | INTERIOR DESIGN STUDIO II | L | T | P | C |
|---------------|-----|--|---------------|---|---|---------------|
| Core | | Practical – III | - | | 7 | 5 |
| Pre-requisite | | BSc Interior Design- Semester 2- Interior Design Studio I, Design communication I | Sylla Vers | | | 2025- 2026 |

The main objectives of this course are to:

- 1. Become familiar with Activities and related Space Standards, Anthropometry, Ergonomics, Furniture, Fixtures, Services and Systems as pertaining to Commercial Spaces such as Offices, Clinics, Kindergarten, Classrooms, etc.
- 2. Understand wall, ceiling and floor finish options for these spaces including coverings.
- 3. Develop Design ideation and development ability
- 4. Develop design drawing and presentation skills

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| CO1 | Remember the standards, anthropometrical data, ergonomics andProxemics | K1 |
|-----|--|----|
| CO2 | Understand all the Elements and Principles of Design, their variations, application in different contexts and its impact on perception, comfort and use. | K2 |
| CO3 | Apply the composition of colours and create major impact in interiors | К3 |
| CO4 | Analyse the various services like acoustics, lighting and ventilation | K4 |
| CO5 | Evaluate how the elements of interior environments are modulated and organised by following the above-mentioned criteria | K5 |
| CO6 | Create various typology of interior designs and their applications in thespaces | K6 |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 TYPOLOGY, USER & CASE STUDIES 21 hours

Study of Commercial Spaces; Activity Analysis & Space Standards; Designing for Action, Connection and Awareness; Collective Symbols and Meaning; Designing for Choice and Autonomy, for physical comfort, Safety, Accessibility and connection to nature. Book Case Studies, Real Life Case Studies – Documentation, Analysis, and Inference for Design.

Unit:2 CONTEXT AND SITE ANALYSIS 21 hours

Analysis of Project Context – Site Analysis; Geographic, Topographic, Soil, Climatic, Wind and Sun direction, Cultural, Landscape, Access, Services & Utilities, Existing views, structures, materials, colours, service lines, circulation, water body, special features, wildlife and vegetation. – Inference for Design. Design Program, Bubble Diagram, Adjacency Matrix, Program Analysis Graphics.

| Unit:3 | CONCEPTUAL DESIGN | 21 hours |
|--------|-------------------|----------|

Development of Design Concept presented as sketches with colours showing 2D and 3D versions of the idea evolution. Mood and Inspiration Board. Spatial distribution shall be to proportion and can be shown as single line drawing along with a Conceptual model

| Unit | t:4 | SCHEMATIC DESIGN | 21 hours | | | |

|---------------|-----|---|---|---|------|--------|
| Skill Based | | Practical I | - | - | 6 | 3 |
| Pre-requisite | | BSc Interior Design – Semester 1- Basic Design Studio, Semester 2 – Design Communication I. | • | | 2025 | 5-2026 |

The main objectives of this course are to:

- 1. To effectively and accurately communicate design details through drawings for client approval and site execution.
- 2. Use CAD software for effective Design Communication
- 3. Use Word and Image processing software for office communication and presentation purposes.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| On the | successful completion of the course, student will be able to. | |
|--------|--|----|
| CO1 | Remember drawing as a medium to visualize and communicate design ideas. | K1 |
| CO2 | Demonstrate understanding and ability to draw orthographic views of a given building component. | K2 |
| CO3 | Apply the skill in geometric constructions and develop into more complex forms. | K3 |
| CO4 | Prepare pictorial drawings using the principles of isometric and perspective projections to visualize objects in three dimensions. | K6 |
| CO5 | Understand and analyse the AutoCAD interface and foundational concepts. | K4 |
| CO6 | Create design representation in the form of Orthographic Multi-view Drawings using CAD. | K6 |
| CO7 | Explore the fundamentals of word & image processing techniques using digital software. | K5 |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 DIAGRAMS AND 2D DRAWING 18 hours

Diagrams and Programming Analysis Graphics - Bubble Diagram, Blocking Diagrams, Fit and Stacking Plans, Conceptual Design, Mood – Inspiration Boards, Schematic Presentation Graphics, 2D drafting - Orthographic Projection Drawings for Interiors: Plans, Elevations, Sections, Reflected Ceiling Plans, Dimensions, Lettering. Paraline and Perspective Drawings; Rendering for 2D drawings – Material representations, Use of different Media – Colour pencils, Water colours or pen & ink.

Unit:2 PARALINE & PERSPECTIVE DRAWING 18 hours

3D representations - Isometric drawing, Plan Oblique drawing of Interiors and Objects drawn to scale; Interior Perspective Drawings - One point, Two-point and Three-point Perspective views using grid method. Drawing Ellipses. Rendering of 3D Drawings - Material representations, colour, light and objects; use of hybrid or composite presentation techniques.

| Unit:3 | SOFTWARE BASICS | 18 hours |
|--------|--|----------|
| C | 8011 ((111111111111111111111111111111111 | |

Photoshop Basics: Getting to know the work area, Painting tools, Brush Settings, Making selections, Filling and stroking, Colour Basics, Layers, Text, Basic image manipulation.

CAD Basics: Simple Exercises in 2D CAD software (AutoCAD/ArchiCAD) specifically or proficiency in drawing/ editing objects, texts, dimensioning, making and inserting blocks. understanding of units settings, scale, limits, line type, line weight, layers, colours and print commands. Complete design representation in the form of Orthographic Multi-view Drawings using CAD.

MS WORD AND EXCEL BASICS Unit:4 18 hours

Word Processing: Basic templates for creating text documents, editing, formatting, spelling/ grammar check, dictionary and thesaurus, page layout, fonts, indentation, inserting tables and images, document review and annotation in software like MSWord. Image Processing: Basic image Sourcing, editing and insertion for desktop publishing in Adobe Photoshop or similar software.

Numerical Processing: Preparing and editing spreadsheets in software like MS Excel, Collating raw data into numbers for analytical use. Presentation of data as tables charts and graphs. Inserting tables, texts and images in drawings for print and projection formats.

| Un | it:5 | 18 hours | | | | | | | | | |
|--------------|---|---|--|--|--|--|--|--|--|--|--|
| | Slide Presentations: Using software like MS PowerPoint to create effective presentations, | | | | | | | | | | |
| inse | insertion of drawings, video clips, formatting and setting up presentation. | | | | | | | | | | |
| | Total Lecture hours | | | | | | | | | | |
| Text Book(s) | | | | | | | | | | | |

| Allied B | | Paper II | - | 3 | - | 2 |
| Pre-requisite | | BSc Interior Design – Semester 1- Theory of Interior Design, Semester 2 - Basics in Architecture | Sylla Vers | | 202 202 | _ |
| Course Objecti | *** | | | | | |

The main objectives of this course are to:

- 1. Select colour of specific hue, tint, shade to create desired ambience in an interior space.
- 2. Combine colours effectively to vary the mood and feel of an interior space by the type of colour composition chosen, the level of contrasts and intensity and extent of the same.
- 3. Design lighting layouts, select light fittings, luminaries and light colours depending on the degree illumination, direction and nature of light desired for the task.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| On the s | successful completion of the course, student will be able to: | |
|----------|---|----|
| CO1 | Remember recent trends in use of colour and lighting in functional contexts. | K1 |
| CO2 | Understand the qualities of colour and lighting as design elements | K2 |
| CO3 | Apply a combination of colours effectively to vary the mood and feel of an interior space by the type of colour composition chosen, the level of contrasts and intensity and extent of the same | К3 |
| CO4 | Analyze colours to specific hue, tint and shade to create desired ambience in an interior space. | K4 |
| CO5 | Evaluate theoretical knowledge gained on colour and lighting to practical situations in interior design | K5 |
| CO6 | Create or design lighting layouts by selecting light fittings, luminaries and light colours depending on the degree illumination, direction and nature of light desired for the task. | K6 |

K1 - Remember; **K2** - Understand; **K3** - Apply; **K4** - Analyze; **K5** - Evaluate; **K6** – Create

Unit:1 COLOUR 9 hours

Concept of colour - Colour in the interiors and exteriors; Dimensions of colour—Hue, value and intensity; Effects of hue, value and intensity; Colour systems—Prang, Munsell and Ostwald; Colour harmonies- Factors considered in selecting colour harmonies. Effect of light on colour; Psychology of colour.

Unit:2 LIGHT FUNDAMENTALS 9 hours

Physics of light - Reflection, Transparency, Filters, Lens, Refraction, Shadows, Luminance, Candela, Lumen, Flux, Lux, Illuminance. Human factors - sensing light, adaption, light and psychology. Natural light - direction, intensity, colour - daylight control.

Unit:3 LIGHTING BASICS 9 hours

Importance of lighting; Artificial lighting–Light sources; Types–based on material, reflection, uses; Specific factors in lighting– measurement of lighting, location and direction, size and shape and colour - Economy in lighting - Psychological aspects of lighting. Glare-its types, causes and prevention.

| Unit:4 LIGHT FIXTURES | | 9 hours |
|---|--------------|----------------------|
| Accessories-Meaning, Types-functional, decorative, both function | | |
| accessories -fixtures, Lighting for areas and specific activities | | |
| dispersive, concealed, directional, visualising patterns of light, light | ing control | systems. |
| | | |
| Unit:5 LIGHTING DESIGN | | 9 hours |
| Lighting principles - change and variation, visual hierarchy, | • | , , |
| controlling light, Application of lighting design concepts and co | | |
| study analysis. Selection of colour and light to create specif | ic moods, | effects, and work |
| conditions. | | |

| Skill Based | | Practical 2 | - | • | 5 | 3 |
| Pre-requisite | | BSc Interior Design, Semester 2- Design communication I, Semester 3 – Design Communication II | | | 202 202 | |

The main objectives of this course are to:

- 1. To improves basic proficiency in architectural office software; transposing textual, numerical and graphic information across software platforms and devices to describe concepts holistically
- 2. To covers fundamentals in 3D Visualization (SketchUp)
- 3. Develop advanced perspective rendering techniques and to use in the expression of conceptual ideas and images

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| | r | |
|-----|---|----|
| CO1 | Remember basics of SketchUp for 3D modelling and MS Excel for data analysis | K1 |
| CO2 | Understanding of basic working knowledge of Basic 3D modelling in SketchUp and presentation software | K2 |
| CO3 | Apply the learnt architecture knowledge in digital for to have a good presentation skill | К3 |
| CO4 | Analysis analytical data"s like BOQ using the MS Excel | K4 |
| CO5 | Evaluating the realistic experience of the material in design | K5 |
| CO6 | Create 3D modelling form advanced 2D work with emphasis on integration of design project presentation and documentation standard. | K6 |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 ADVANCED CAD 15 hours

Advanced CAD features for operational efficiency: 2D Isometric drawing, Isometric dimensioning, creating tool palettes, External reference drawing files, creating and using Dynamic Blocks, Viewports- controlling layers, colour, line weight.

Unit:2 SKETCHUP 1 15 hours

Interface basics, Creating Scenes, Manipulating Objects, Advanced selection tools, Drawing shapes and altering 3D text, Measuring and Labeling, Creating sections, Working with Components, Working with the Solid Tools, Using Boolean operations. Exercises- furniture, fixtures and artifacts.

Unit:3 SKETCHUP 2 15 hours

Introducing the 3D Warehouse, Organizing Scenes, Creating Textures and Materials, Material Editor, Mapping textures on straight and curved objects, Creating and sculpting Terrain, Using Photo Match and Google Earth, Introduction to animation. Exercises -- interior spaces.

Unit:4 RENDERING AND ANIMATION 15 hours

Rendering 3D views using material palettes, colours, textures, shades and shadows. Inserting objects from digital libraries and other sources, using software such as Lumion/ Blender/ Vray; Rendering 3D models: Material Browser, Assigning materials, material mapping, creating your own material - reflectivity, transparency, cut-outs, environment settings, Using render plugins in various software.

Animation: Setting the Scene, Camera move/pan/ tilt animation, 3D animation, walk-through sequence, superimposing animated videos over base images. Unit:5 **PORTFOLIO** 15 hours Compiling of Portfolio. **Total Lecture hours** 75 hours Text Book(s) MS-Office 2010 Training Guide by Prof. Satish Jain, M. Geetha Microsoft PowerPoint 2016 Step By Step Paperback – 2016 by Lambert Joan The Sketchup Workflow for Architecture by Michael Brightman **Reference Books** Illustrated Microsoft Office 365 & Excel 2016 – 17, Elizabeth Eisner Reding (Author), Lynn Wermers (Author), 2016. The main objectives of this course are to:

- 1. Understand the engineering behind all services systems in built environment.
- 2. Ability to incorporate effective service systems in the building interiors.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| CO1 | Understand the fundamentals of environmental factors affects building system. | K2 |
|-----|---|----|
| CO2 | Understand the water supply and sanitation engineering. | K2 |
| CO3 | Remember to design electrical, communication and acoustical systems in variousbuilt environment. | K1 |
| CO4 | Analyze knowledge in various air- conditioning systems and fire safety design. | K4 |
| CO5 | Apply knowledge on the basic design principles of vertical distributions systems within a building. | К3 |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 BUILDING AND ENVIRONMENT 15 hours

Building and Enclosure- Environmental Factors- Environment control—importance of environment control advantages, elements to be controlled in the interiors — Temperature, Humidity and moisture, wind, air movement and quality, Day lighting and illumination, sound and Acoustics, sanitation, movement and accessibility.

Unit:2 WATER SUPPLY AND DRAINAGE SYSTEMS 15 hours

Water supply systems – quality and distribution – protecting the water supply – hot water–retaining rainwater–waste piping and vent piping – waste water treatment– plumbing systems, piping layouts, sanitary fixtures, fittings and standards for kitchen, toilet and bath, appliances and equipment.

| Unit:3 | FUNDAMENTALS OF ELECTRICAL & ELECTRONIC | 15 hours |
|--------|---|----------|
| | SYSTEMS | |

Electricity: Electrical distribution and safety systems in buildings; fixtures, equipment, and appliances; electrical circuitry and internal wiring; electrical loads, peak demand, operational costs; Communication: Intercoms, Wi-Fi, broad band data cabling, and CCTV systems.

| Unit:4 | DESIGN ASPECTS OF AIR-CONDITIONING, | 15 hours |
|--------|-------------------------------------|----------|
| | ACOUSTICS AND FIRE SAFETY SYSTEMS | |

Air-conditioning: Principles and components of mechanical ventilation and air- conditioning systems; calculation based on design conditions and system sizing, design considerations for chiller rooms, cooling plants, AHUs; integration with natural ventilation, and other energy conserving technologies.

Acoustics: Basics; acoustical requirements for different space types and design planning; site planning for noise control; exposure to acoustics design software.

Fire Safety: Fire sources, spreading and growth decay curve; fire resistant rating of materials and fire retardant materials; fire hydrants, fire escapes, fire zones, fire escape staircase, fire lifts, refuge areas, fire tender access; smoke detector, alarm, and sprinkler systems; representation of fire considerations in drawings.

| Course code | 53C | ESTIMATION AND COSTING L T | | | | |
|---------------|-----|---|---------------|---|----------|-----------|
| Core | | Paper VII | - | 5 | - | 3 |
| Pre-requisite | | BSc Interior Design- Semester 3, 4 – Interior Materials and Construction I and II | Sylla Vers | | 20 20 | 25- 26 |

The main objectives of this course are to:

- 1. Estimate quantity of each individual type of interior work to be done within the larger project
- 2. Calculate the materials needed for each work for purchase of the same
- 3. Arrive at an estimate of the Project Cost from agreed unit rates for each work involved and material selected.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| | on the succession completion of the course, student with security | | | | | | |
|-----|---|----|--|--|--|--|--|
| CO1 | Remember the importance of estimation while planning for a building project. | K1 | | | | | |
| CO2 | Understand to calculate the materials needed for each work – for purchase of the | K2 | | | | | |
| CO2 | same. | | | | | | |
| CO3 | Apply the estimation quantity of each individual type of interior work to be done | K3 | | | | | |
| CO3 | within the larger project. | | | | | | |
| CO4 | Analyze the difference in quality and quantity of materials utilised in Interior | K4 | | | | | |
| CO4 | Design | | | | | | |
| CO5 | Evaluate to arrive at an estimate of the Project Cost from agreed unit rates for each | K5 | | | | | |
| 203 | work involved and material selected. | | | | | | |
| CO6 | Create a detailed estimation and costing for a particular interior project | K6 | | | | | |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 INTRODUCTION 15 hours

Estimation – definition, purpose, types of estimate, and procedure for Estimating the cost of work in order to implement an interior design project or to make products related to interior design like furniture, artifacts etc.

Specification – Definition, purpose, procedure for writing specification for the purpose of calling tenders, types of specification. Specification for different item related to interior design project

Unit:2 WALL AND CEILING 15 hours

Estimation for Wall Construction, Estimation for Partitions, Doors, Fixed Glass/ Windows. Estimation for Wall and Ceiling Treatments, Paint –Calculation of prices for Wall coverings – Introduction to other wall materials such as wall tiles and paneling - Estimation and costing of Suspended Ceilings.

Unit:3 FLOOR 15 hours

Flooring Estimation - Plank and Tile Flooring –Resilient Flooring and Soft Flooring, Area Rugs–Explanation of product, product sizing and packaging – Commonly used flooring products and their estimation and costing.

Unit:4 CABINETRY & FURNITURE 15 hours

Introduction to Built-In work, Discussion of Countertops and Cabinetry – Product sizing and packaging. Pricing of Cabinetry using pricing grids, Construction and Finish Costing of all components of Countertops and Cabinetry.

| Uni | Unit:5 SOFT FURNISHINGS AND TREATMENTS 15 | | | | | | | | | |

| Core | | Practical V | - | - | 7 | 6 |
| Pre-requisite | | BSc Interior Design - Semester 1- Theory of Design, Semester 2, 3, 4 - Interior Design Studio I, II, III, Semester 3, 4- Interior Materials and Construction I and II, Semester 3, 4 - Design Communication II and III | | | 202 202 | _ |

This hands-on Design Studio course explores the intersection of architecture, art, and design. Students will work in groups of two and three, combining methods of the hand, machine and computer to develop a family of design pieces building a clear understanding of ergonomics, anthropometrics, materials and processes that are involved.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| r · · · · · · · · · · · · · · · · · · · | | | | | | | |
|---|--|----|--|--|--|--|--|
| CO1 | Analyse a material and its industrial production technology | | | | | | |
| CO2 | Understanding the industrial production processes to design an effective product that can be produced efficiently. | | | | | | |
| CO3 | Manipulate material in a manner that is expressive of its essential characteristics. | K3 | | | | | |
| CO4 | Analyze Ergonomic data and activity requirements to arrive at optimal form. | K4 | | | | | |
| CO5 | Evaluate the concept under varied conditions to develop design details | | | | | | |
| CO6 | Create detailed design presentation drawings and model | K6 | | | | | |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyse; K5 - Evaluate; K6 - Create

Unit:1 RESEARCH 15 hours

Furniture Design- Form and Structure for similar functional need; Materials and their suitability for use as components of the furniture; Processes of making – jointing, bending, cutting, mold casting etc. and consider suitability - Material science and Fabrication process-both historical and contemporary material and fabrication processes. From this collective research and discussions, students will work together to develop a line of inquiry regarding material form and process.

| Unit:2 | CASE STUDIES | 20 hours | | | | | | | |
|--|--------------|----------|--|--|--|--|--|--|--|
| Book Case Studies, Real Life Case Studies – Documentation, Analysis, and Inference for | | | | | | | | | |
| Design | | | | | | | | | |
| Unit:3 | 25 hours | | | | | | | | |

Contextual Study can be User Study – Flexible designs can accommodate potential user variation, or special features can be added to accommodate a special need by a user; Study the Physical context in which furniture will be used – select materials and construction appropriate to the context; The selections will also influence visual impact, luxury, comfort, maintenance or flexibility– priorities deliberately.

Unit:4 CONCEPTUAL AND SCHEMATIC DESIGN 30 hours Conceptual Design Creative process: Material, process, user and context study will lead to their individual design concept. Show 2D and 3D versions of the idea evolution and present development of Design Concept as colored sketches. Submission: Line sketches with Concept Model Schematic Design Detailing: The design concept is further developed and detailed to include material, jointing, finishing, color and texture - with sketches, part models, and detailed drawings. Submission: Detailed Plan, Elevations, and Section with connection details. Double line plan with elevations/ sections as needed to clarify design idea. Unit:5 **DESIGN PRESENTATION** 15 hours Construction: Scaled Prototype model of furniture is constructed using identical or similar material and processes. It is supported with a detailed set of drawings for the final presentation and review. Submission for the Viva Voce Presentation: Prototype model, Final detailed set of Drawings – completed, formatted, dimensioned and rendered. (Sheets: Plan, Elevations, Sections and Jointing Details as needed to communicate the design unambiguously) **Total Lecture hours** 105 hours Text Book(s) Interior design principles and practice, Pratap R.M, Standard Publishers distribution, Delhi, 1988. "Interior design", Chaudhari, S. N. Jaipur: Aavishkar Publishers, India, 2005. 2 **Reference Books** Time-Saver Standards for Interior Design and Space Planning, Julius Panero, Martin Zelnik, McGraw-Hill Professional; 2nd edition, 2001. | Pre-requisite | | BSc Interior Design- Semester 1 – Theory of Interior Design, Semester 2 – Basics in Architecture. Semester 4 – Design Communication III. | Vers | ous ion | 202 202 | _ |

The main objectives of this course are to:

- 1. Present a vivid scenario of the need and importance of interiorscaping.
- 2. Identification of plants, propagation methods, creation of different styles of flowe arrangements and drawing landscape design layouts.
- 3. Understand the plant kingdom, developing, drawing and designing landscape both indoor and outdoor and uplifting the aesthetic value of any kind of building.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| On the | successful completion of the course, student will be able to. | |
|--------|---|----|
| CO1 | Remember a variety of interior plants and ornamental flowers that can be used to enhance the quality of the interior environment. | K1 |
| CO2 | Understand the methods of cultivation of plants and flowers | K2 |
| CO3 | Apply knowledge of design theory and hands on interior design experience to create an Interior garden layout or flower arrangement. | К3 |
| CO4 | Analyze the basic knowledge on selection of Indoor plants and enumerate the conditions of plant growth. | K4 |
| CO5 | Evaluate the importance of flower arrangement to improve the aesthetics | K5 |
| CO6 | Create a compiled portfolio to exhibit your understanding and ideas on Floriculture | K6 |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 ORNAMENTAL PLANTS AND LAWN

14 hours

Selection of plants based on location, purpose, design effect and maintenance. Principles of pot culture. Indoor plants display and placement, upkeep and maintenance.

Lawn- importance, types, preparation of lawn, methods of cultivation, use and maintenance.

Unit:2 LANDSCAPE DESIGN

14 hours

Softscape—Meaning and importance; Types of garden- formal and Informal layout, garder components, principles of landscape design; Factors affecting design of landscape in interiors Landscape design concepts across cultures - the English garden, the Japanese garden, the Mughal garden.

Unit:3 PHYSICAL REQUIREMENTS OF PLANTS

14 hours

Physical requirements of plants – light, temperature, water, planting medium, soil separator, weight of plants, acclimatization and maintenance. Techniques to meet physical requirements.

Protection of the integrity of the roof and structure, Provision of drainage, light weight planting medium, irrigation, selection of materials, water proofing, provision for utilities and maintenance.

Unit:4 TRENDS IN INTERIOR GARDEN

10 hours

Modern trends in gardening- Terrace garden, Rock garden, Water garden, Bonsai culture, Terrarium, Roof garden, Hanging garden, Kitchen garden. Flower arrangement as an

| ornamentation. | | |

The main objectives of this course are to:

- 1. Enable the students to gain a clear idea of the processes involved in setting up an independent professional practice.
- 2. Understand the opportunities and responsibilities associated with the profession.
- 3. Make ethical and informed decisions in organizing themselves for success in their professional lives.
- 4. Understand the duties and liabilities of an Interior designer along with knowledge of bye-laws that relate to the building & the environment in the Indian context.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| On the | successful completion of the course, student will be able to. | |
|--------|---|----|
| CO1 | Remember the role and responsibilities of interior design profession and the role of professional bodies and statutory bodies as well as ethics of the profession. | K1 |
| CO2 | Understand the basic aspects of running an interior design practice. | K2 |
| CO3 | Apply the processes involved in taking up and completing an interior project | K3 |
| CO4 | Apply knowledge of preparation of tenders, quotations and contracts. | К3 |
| CO5 | Analyze the legal aspects and legislations associated with the profession. | K4 |
| CO6 | Evaluate the importance of fire safety standards, accessibility and stability requirements. | K5 |
| CO7 | Create the ability to develop work ready skills in the areas of written and oral communication, intercultural communication, client service, problem solving and self-management. | |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 PROFESSIONAL BODIES 12 hours

Defining the Profession; The Business of Interior Design; Familiarization with different Professional Bodies directly and In directly related to Interior Design profession such as The Indian Institute of Interior Designers – History, rules and regulations, membership procedure and category, IIID elections, Functions and formalities of the IIID Council, importance, professional and trade practices and ethics; Intellectual Property – Copyright.

Unit:2 GROUNDWORK STRATEGIES 12 hours

Creating and Managing an Interior Design Practice - Business formations - Sole Proprietorship, Partnership, LLC, Pvt. Ltd Corporation; Strategic Planning - basics, mission statements, business analysis, goals-objectives-strategies, budgeting, measuring performance, benchmarking - Money Management - maintain records, control overheads - Marketing - Branding, Marketing Plan; Portfolio, Competitions, Website, Publications

| Unit:3 OPERATIONS 12 | 2 hours |
|----------------------|---------|
|----------------------|---------|

Types, details of a tender document, procedure to be followed for calling tenders, tender analysis, selection of contractor and award of the work. Important terms – Earnest Money Deposit, Security

Deposit, Defect liability, Insurance etc.

Types of Contracts, legality of the contracts, important clauses of the contract, role of owner, interior designer and the contractor in fulfillment of the contract.

Unit:4 SETTING UP THE PRACTICE 12 hours

Size of the office, location, infrastructure requirement, staff requirement etc, Procurement of the works. Important activities in a professional office. Employee Management – Contracts, Compensation and Benefits, Job classifications, descriptions, Performance Evaluation, Employee Handbook.

Unit:5 CODES 12 hours

Codes For Electrical Layout: Typical electrical layout for a building – location requirement for switch rooms and distribution panels – codes for fan points, power points and light points – PVC sheathed wiring system – protective earthing – earth electrode;

Codes For Lighting: Measurement of illumination and luminous intensity – day light factor – sky luminance – ERC, IRC – light output ratio – recommended illumination levels for various spaces such as library, class room, garment factory, etc. Energy conservation in lighting.

Codes For Ventilation: Ventilation rates – air changes per hour – relative humidity – cross ventilation, stack effect, recommended ventilationrates for kitchen, toilet, etc.

60 hours **Total Lecture hours** Text Book(s) Professional Practice for Interior Designers, 5th ed, Piotrowski, Christine M., Wiley Publications, 2014. | Pre-requisite | | BSc Interior Design, Semester 1 – Theory of Design, Art in Interior Design; Semester 2 – Basics in Architecture, Semester 3 - History of Interior Design | Sylla Versi | bus | 2029 2020 | |

The main objectives of this course are to:

- 1. Understand the process of making involved in the creating of various arts & craft products and customized materials used in interior design.
- 2. Develop an appreciation for the art and craft and promote the same through selective sensitive application.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| On the | successful completion of the course, student will be able to: | |
|--------|--|----|
| CO1 | Remember the different tools and techniques used in varied forms of applied | K1 |
| CO1 | arts. | |
| CO2 | Understand the processes of making involved in the creation of different forms | K2 |
| CO2 | of applied arts. | |
| CO3 | Apply clear knowledge in the process of creating objects of Art and Ornament for | К3 |
| CO3 | Interiors. | |
| CO4 | Create art and craft forms as design elements and their relevant application in | K6 |
| CO4 | Interiors. | |
| CO5 | Evaluate the awareness of the historic and cultural significance of various forms of | K5 |
| CO3 | art and craft, and their use in Interiors. | |
| CO6 | Analyze uses and maintenance of art and artifacts based on the material, method | K4 |
| CO6 | of making and environment. | |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 WOOD AND METAL WORKING 12 hours

Wood working - tools and techniques for shaping, carving, turning, bending, Materials for frames, Sawn curves, bending, panels, Methods of cutting shapes - straight edged, curved, complex, decorative. Decorating -Painting, Varnish, shellac, lacquer. Metals and Alloys - Tools for cold cutting metal, Shaping with Power tools, Solder joints, Forging, Welding and Cutting with Oxyacetylene torch, Surface finishes and repairs.

Unit:2 CERAMIC AND GLASS DESIGN 12 hours

Ceramics Design and ornamentation - earthenware, stoneware, china, porcelain and terracottal Processes - Coiling, slab building, throwing, profiling, turning, slip casting. Materials and glazes. Glass - glass etching, engraving, cutting, enameling, stained glass techniques, and use of glass in homes.

Unit:3 SCULPTURE 12 hours

Ceramic Sculpture - Making Faces essential steps, Modeling and Sculpting Animals Symbolism in cultural representation of animals, general principles and method - use of sculpture - Care and maintenance.

Unit:4 FABRIC PRINTING AND DYEING 12 hours Fabric Aesthetics - Texture, Colour, Pattern. Application - Windows, Furniture, Walls, Ceilings. Properties - Cloth, Fiber, Yarn, Construction, Finishing, Dyeing and Printing- Dyeing-Definition and classification - Printing - Hand, Block printing, Tie and Dye, Screen; Machine - Discharge, Resist, Stenciling, Fabric painting tools and techniques. Unit:5 MACRAME, DECOUPAGE AND GLASS PAINT 12 hours Crafts - Macramé - , Decoupage - Design and Process, Decorating with decoupage, Decorative Mosaic - materials and tools, Planning and Designing, Working Methods -Direct techniques, Double direct techniques, Glass painting. **Total Lecture hours** 60 hours Text Book(s) A Text Book of Applied Art, Borkar, S. Himalaya Publishing House, Karnataka, 2003. Introduction to Art: Design, Context and Meaning, Sachant. P., University of North Georgia Press, 2016. Reference Books Basic Pottery Making: All the Skills and Tools You Need to Get Started, Linda Franz (Editor), Stack pole Books; Spi edition, 2009. | Core | | Practical Project VI | - | - | 10 | 7 |
| Pre-requisite | | BSc Interior Design - Semester 1 to 5 – All papers. | Syllabı Versio | | 2025 - 2026 | - |

The main objectives of this course are to develop student ability to

- 1. Identify a Need for design in the environment around them and define the purpose of Design.
- 2. Follow a structured, self-initiated process of research in identifying the user needs, functional requirements, contextual factor and all influences that would inform design decisions.
- 3. Develop design solutions for a real life situation and developing details accordingly.
- 4. Communicate the design process and the final design outcome in a forum through drawings, 3D visualizations, models and verbal presentations.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| On the | successful completion of the course, student will be able to: | |
|--------|---|----|
| CO1 | Understand the processes involved in narrowing down a design problem into its most essential questions. | K2 |
| CO2 | Understand how to effectively conduct user and contextual studies and draw practical inferences from the same. | K2 |
| CO3 | Apply inferences from research to concept development, form and space exploration and material and method choices. | K3 |
| CO4 | Analyse the suitability of various forms, materials and technologies researched to the design solutions considered. | K4 |
| CO5 | Create quality design solutions that are human cantered and environmentally friendly. | K6 |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 Project Definition 15 hours

Project Proposal - Topic of study, site plan, location, existing building plan if any and any other relevant information pertaining to the project site. Description of the Interior Design project proposed fo the site: Name, Use, a tentative list of facilities to be accommodated and Design goal.

Unit:2 Literature Research/Context and User Study 30 hours

Conduct Research on Building typology and related case studies - Anthropometric & Ergonomic Data, Climatic Data; Materials, detailing and technologies relevant to building function; Topic of interest such as User psychology, Colour theory, sensorial design, landscape for healing and sustainable interior detailing.

Prepare and Conduct Survey and Study - Current users of the Space & Future users of the Design Proposal — Their existing use patterns, problems and/or limitations, needs/wants, conflicting demands, user typologies, User timings and frequency, health, accessibility and maintenance issues, special considerations; Existing Site Conditions — Detailed Site Drawings, Materials and Finishes, the construction and condition or state of repair, Building Service connections, Natural Lighting and Ventilation, Existing Building Architecture and Detailing, Accessibility and Circulation/ Movement through the site, advantages and constraints, Climatic considerations, surrounding facilities, their usage, connection to the new proposal and physical appearance.

Unit:3 Programme Development & Design Concept 40 hours

Develop a Design Brief or Programme that details – Spaces to be provided, Areas for each, facilities to be accommodated in each of the spaces and functional and qualitative requirements for these spaces in terms of – activity accommodation, equipment needed, lighting ventilation needs, proximity needs etc.; Develop the main Design Idea or Concept – The Basic Design theme for your design. A simple space planning layout and sketches that will guide further development of your design.

Unit:4 Design Development 40 hours

Forms and details - Detailed double line plans, sections, elevation, 3D sketches, furniture details, ceiling design and landscape details if any - Material selections, mood boards, colour palettes and lighting is also worked on to arrive at the final design proposal. Details will indicate method of assembly or construction - Perspective sketches or 3D renders are used to visualise the design

Unit:5 Presentation 25 hours

Design Drawings should include

- Literature Study, Case Studies & Inference User & Context Study & Inference
- Design Programme& Concept
- Detailed plans, sections, wall elevations, ceiling details, furniture/fixture details Ornament details
- Graphics if any
- 3D visualizations (digital or hand constructed perspective drawings)Captions and Write-ups for all of the above

These are rendered and composed into presentation boards. Digital drawings can be made using SketchUp, or AutoCAD, 3dsmax and Photoshop. Hand drawings can also be presented. Presentation should include Mood boards of materials and textures.

| Pre-requisite | BSc Interior Design- Semester 1 – Theory of Interior Design; Semester 2, 3, 4, - Design Communication I, II, III. | Syllabi Versio | | 2025 2026 | |

The main objectives of this course are to develop student ability to

- 1. Understand the importance of effective presentations in the field of interior design.
- 2. Develop skills in using digital tools to create visually appealing presentations.
- 3. Gain proficiency in hand rendering techniques for interior design presentations.
- 4. Learn how to effectively communicate design concepts and ideas verbally.
- 5. Apply design principles to create visually cohesive presentations.
- 6. Explore various presentation formats and mediums.
- 7. Develop critical thinking and problem-solving skills related to interior design presentations.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| On the | On the successful completion of the course, student will be able to: | | | | | | | |
|--------|---|----|--|--|--|--|--|--|
| CO1 | Remember how to improvise verbal and non verbal communication skills of students with an intension to improve their presentation skills | | | | | | | |
| CO2 | Understand that the student to ultimately explain / defend his/her design to single person or panel. | K2 | | | | | | |
| CO3 | Apply all the hand and digital rendering techniques to compile a strong portfolio exhibiting your design understanding. | K3 | | | | | | |
| CO4 | Analyse the compositions by experimenting with element and principles of design. | K4 | | | | | | |
| CO5 | Create your own problem solving techniques after strengthening the skill set and analyzing the skills further. | K6 | | | | | | |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 PRESENTATION FORMATS 6 hours

Importance of presentations in interior design. Exploring different presentation formats (e.g., mood boards, storyboards, digital slides). Choosing appropriate mediums for different presentation scenarios. Creating cohesive and visually appealing presentations.

Unit:2 ELEMENTS AND DESIGN PRINCIPLES 6 hours

Elements of an effective interior design presentation. Applying design principles (e.g., balance, rhythm, contrast) to presentations. Creating visual hierarchy and focal points in presentations. Using color, typography, and layout effectively

Basics of hand rendering for interior design presentations. Exploring different rendering styles (e.g., sketching, watercolor). Using markers, pencils, and other traditional media for rendering.

Understanding the need for making models; Making environment friendly models; Introduction to tools of model making. Making models out of clay, paper, cardboard etc.

Introduction to digital rendering software. Creating 2D and 3D visualizations for interior design presentations. Incorporating textures, lighting, and materials into digital presentations

Unit:4 WRITTEN/ VERBAL/ NON VERBAL 6 hours COMMUNICATION SKILLS

Writing Effectively: Subject Lines, Put the Main Point First, Know Your Audience, Organization of the Message. Types of writing skills - Analytical writing skills; Business writing skills; Technical writing skills etc.

Developing effective verbal communication skills for design presentations. Presenting design concepts and ideas confidently. Responding to questions and critiques during presentations.

Importance of Non Verbal Communication skills - Body language, Voice culture, Personal grooming, eye contact.

Unit:5 CRTICAL THINKING AND PROBLEM 6 hours SOLVING

Analyzing and evaluating design presentations. Problem-solving strategies for presentation challenges. Incorporating feedback and improving presentations

Total Lecture hours 30 hours

| Course code | 5EA | HUMAN FACTORS IN DESIGN | L | T | P | C |
|---------------|-----|---|---|----------------|------------|---|
| Elective 1 | | Paper | | 4 | - | 3 |
| Pre-requisite | | BSc Interior Design – Semester 1 – Theory of Interior Design, Semester 2, 3, 4 – Interior Design Studio I, II, III. | | labus rsion | 202 202 | _ |

The main objectives of this course are to:

- 1. Comprehend the human factors to be considered in designing of interior spaces, furniture and products for human occupation and use.
- 2. Design interiors and furniture that positively affect user well-being and improve efficiency.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| CO1 | Remember User psychological needs, response and Proxemics with respect to Design. | K1 |
|-----|--|----|
| CO2 | Understand the relevance of Anthropometric Data and apply appropriately Anthropometric data in design of spaces and furniture. | K2 |
| CO3 | Apply practical understanding of Human factors to design of Residential, Commercial, Healthcare & Educational Design. | K3 |
| CO4 | Analyze Universal and Inclusive design and its importance. | K4 |
| CO5 | Evaluate practical knowledge in designing for Diversity as inCultures, Elderly & Children. | K5 |
| CO6 | Understand Ergonomics for design of healthy productive interiorenvironments | K2 |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

| Unit:1 PROXEMICS 12 hour |
|--------------------------|
|--------------------------|

Psychology of the client/user as crucial factors - influence of such factors in the design of the environment and interior architecture. Study of proxemics - effect of cultural and psychological factors on design

Unit:2 ANTHROPOMETRICS 12 hours

Issues of anthropometrics – shape and size of human beings - critical dimensions relating to human form such as height, width and length of reach- application of such data in design. Use of anthropometrics in residential spaces - healthcare spaces - audiovisual spaces-recreational spaces and public spaces-eating and drinking spaces.

| Unit:3 | ERGONOMICS | 12 hours |
|--------|------------|----------|
|--------|------------|----------|

Concept of ergonomics – Meaning, importance, factors involved – worker, workplace, equipment, environment, climate. Work environment– Location, space, indoor and outdoor climate, furniture, lighting and ventilation, flooring, noise, storage facilities. Design of workplace – Activity analysis –Designing for work based on ergonomics principles.

| Pre-requisite | | BSc Interior Design – Semester 1 – Art and Interior Design; Semester 3 – History of Interior Design. | Sylla Versi | | 202 202 | |
| Course Object | ives: | | | | | |
| The main object | tives of this o | course are to: | • | | | |

The main objectives of this course are to:

- 1. Learn about the various textile fibers, weave and finishes.
- 2. Learn basic elements and principles while designing a fabric.
- 3. Gain knowledge on the latest trends in fabrics for a healthy environment.

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| CO1 | Understand various types of fibres and their application in Interior design | K2 |
|-----|--|----|
| CO2 | Understand the process of weaving, knitting, dyeing and various textile processing techniques. | K2 |
| CO3 | Apply textile knowledge for designing a comfortable and healthy environment | К3 |
| CO4 | Analyze the need and requirement of fabric care and maintenance | K4 |
| CO5 | Evaluate the selection criteria for various applications in interiors. | K5 |
| CO6 | Remember to incorporate natural materials for better living | K1 |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

INTRODUCTION TO FABRICS

Fabric, yarn and fiber structure, Fabric structure- woven- warp, weft, selvedge ,knitted- course non-woven, Fabric types and classification-woven, including plain, twill, satin, Jacquard, crepe and pile weaves, knitted- including single knit, double knit, tricot knit, pile knit, lace and net ,nonwoven-including felts webs and films, identification and properties of fabrics, yarns and fibers.

APPLICATION OF ELEMENTS AND PRINCIPLES Unit:2 12 hours

Application of elements and principles of design across a range of textiles. Describe and analyze elements and principles of design -furnishings, textile arts, non-apparel. Functional and aesthetic requirements and features of textile range.

Unit:3 **COLOUR ON FABRICS** 12 hours

Fabric coloration and decoration- Principles of applying color to fabrics. Textile arts and crafts in interiors, traditional and modern materials and methods. Preparing samples on tie and die printing, batik printing, appliqué, macramé and braiding.

FURNISHINGS Unit:4 12 hours

Furnishings-classification, types of curtain, curtain construction, selection criteria relation to backgrounds in walls, floors and ceilings. Slip covers, cushion covers, bed linen and table linen Floor coverings -rugs and carpets, types selection, care and maintenance, installation of floor coverings

| TT . *4 . F | | 10.1. |
|-------------|-------------------------|----------|
| Unit:5 | OTHER NATURAL MATERIALS | 12 hours |

Jute or hessian – dyed jute fabric and its applications – various kinds of processed leather, its application in interior design.

| ELECIVE 2 | | SEMESTER VI | - | 3 | - | 3 |
| Pre-requisite | | BSc Interior Design- Semester 4 – Colour and Lighting, Semester 5 – landscape for Interiors. | Syllabu Version | | 2025- 2026 | • |

Course Objectives:

The main objectives of this course are to develop student ability to

- 1. Interior photography is the art and technique of capturing the beauty and essence of interior spaces.
- 2. This course provides students with a comprehensive understanding of the principles, techniques, and equipment used in interior photography.
- 3. Students will learn how to compose and capture stunning images that effectively showcase the design, architecture, and ambiance of various interior spaces, including residential and commercial settings.
- 4. The course also explores lighting techniques, post-processing methods, and the business aspects of interior photography

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| On the | successful completion of the course, student will be able to. | | | | | |
|--------|--|----|--|--|--|--|
| CO1 | Understand the principles and technology of photography. | | | | | |
| CO2 | Understand the applications of photography in interior | | | | | |
| CO3 | Analyze and explore lighting techniques and understand the role of lighting in interior photography. | | | | | |
| CO4 | Evaluate effectively use composition techniques to create visually appealing interior photographs using color rendering. | K5 | | | | |
| CO5 | Create post-processing techniques to enhance and optimize interior photographs. | K6 | | | | |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 PRINCIPLES OF COMPOSITION 9 hours

Rule of thirds, perspective-worm's eye view, normal eye view, bird's eye view, one-point perspective, two-point perspective, three point perspective, exercises in composition.

| Unit:2 | PRINCIPLES OF PHOTOGRAPHY | 9 hours |
|--------|---------------------------|---------|

Technical definitions, understanding a camera, anatomy of a SLR camera, technical setting in a SLR camera, different types of lenses.

Unit:3 PRINCIPLES OF INTERIOR LIGHTING 9 hours

Technical definitions, lighting sources, types of lighting fixtures, types of lamps, calculating lighting levels, flash photography, types of flashes, controlling lighting levels with flash photography Exercise in interior lighting photography with artificial light and black and white photos

| Course Ohio | etivos. | | • | | | |

Course Objectives:

The main objectives of this course are to develop student ability to

- 1. Understand the fundamental concepts and principles of advanced materials in interior design and construction.
- 2. Identify and evaluate various advanced materials and their characteristics for specific design and construction applications.
- 3. Explore sustainable practices and considerations related to the use of advanced materials.
- 4. Develop the ability to integrate advanced materials into interior design concepts while considering functional and aesthetic requirements.
- 5. Analyze the impact of advanced materials on environmental sustainability and resource efficiency in design and construction

Expected Course Outcomes:

On the successful completion of the course, student will be able to:

| On the | successful completion of the course, student will be able to: | |
|--------|--|----|
| CO1 | Understanding of Material Properties: Students will gain a deep understanding | K2 |

| CO2 | Apply Material Selection and Specification: Students will develop skills in | K3 |
| CO2 | selecting the appropriate materials for specific interior design projects | |
| CO3 | Remember Sustainable Materials and Practices: Students will be introduced to | K1 |
| CO3 | sustainable design principles and the use of environmentally friendly materials. | |
| CO4 | Analyze Integration of Materials: Students will learn how to integrate different | K4 |
| CO4 | materials harmoniously within interior spaces. | |
| CO5 | Create Material Trends and Forecasting: Students will stay updated with the | K6 |
| 003 | latest trends and innovations in materials for interior design. | |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1 INTRODUCTION TO ADVANCED MATERIALS 9 hours

Definition, significance, and applications of advanced materials in interior design and construction - Historical overview and current trends in advanced materials - Properties and Characteristics of Advanced Materials - Mechanical, thermal, acoustic, and optical properties of advanced materials - Durability, maintenance, and life cycle considerations

Unit:2 ADVANCED MATERIALS IN INTERIOR DESIGN 9 hours

High-performance paints and coatings - Sustainable flooring options (e.g., bamboo, cork, and recycled materials) - Advanced wall coverings (e.g., eco-friendly wallpapers, acoustical panels) - Advanced Materials for Furniture and Fixtures - Sustainable upholstery and textiles - Innovative materials for furniture design (e.g., bio-based composites, 3D-printed furniture) - Energy-efficient lighting solutions and advanced lighting controls.

| Unit:3 | SUSTAINABLE PRACTICES IN ADVANCED | 9 hours |
|--------|-----------------------------------|---------|
| | MATERIALS | |

Environmental impact assessment and sustainable certifications - Life cycle assessment and carbon footprint analysis - Recycling, upcycling, and waste management of advanced materials - Case Studies and Design Integration - Analysis of real-world projects utilizing advanced materials - Integration of advanced materials into interior design concepts. Design exercises and projects incorporating advanced materials.

Unit:4 FURNITURE, FIXTURES, AND EQUIPMENT (FF&E) 9 hours MATERIALS

Analyzing materials and finishes used in furniture, fixtures, and equipment. - Understanding the properties and characteristics of upholstery materials, textiles, woods, metals, and plastics. - Exploring sustainable and innovative materials for furniture design, lighting fixtures, and other interior elements.

Unit:5 EMERGING TRENDS & FUTURE 9 hours DIRECTIONS

Nanotechnology in interiors – biodegradable- 3D printing – Energy generating materials – Smart and Interactive – Biomimicry in Materials – circular Economy and materials reuse. Exploration of cutting-edge materials and technologies The role of advanced materials in smart homes and sustainable cities

| Pre-requisite | | | Syllabu Version | | 2025 2026 | |
| Course Ohio | otirroge | | | | | |

Course Objectives:

The main objectives of this course are to develop student ability to

- 1. This course explores the intersection of artificial intelligence (AI) and interior design, providing students with a comprehensive understanding of how AI technologies can enhance and transform the field.
- 2. Through a combination of theoretical knowledge and practical applications, students will learn about data analysis, machine learning, computer vision, and natural language processing in the context of interior design.
- 3. The course aims to equip students with the skills and knowledge to leverage AI tools and techniques to create innovative and personalized design solutions.

| Expected Course Outcomes: | | | | | | |
|---------------------------|--|------------|--|--|--|--|
| On the | successful completion of the course, student will be able to: | | | | | |
| CO1 | Understand the fundamental concepts and principles of artificial intelligence (AI) and its application in the field of interior design. | K2 | | | | |
| CO2 | Remember to develop an understanding of data collection, preprocessing, and analysis methods required for AI applications in interior design. | K 1 | | | | |
| CO3 | Analyze and collaborate with multidisciplinary teams to integrate AI technologies into the design process, fostering innovation and efficiency. | K4 | | | | |
| CO4 | Remember to utilize AI-based software and platforms to create virtual and augmented reality experiences for clients, allowing them to visualize and interact with design concepts. | K1 | | | | |
| CO5 | Evaluate and critique AI-generated design solutions, considering their feasibility, functionality, aesthetics, and user experience. | K5 | | | | |

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

| Unit:1 | INTRODUCTION TO ARTIFICIAL INTELLIGENCE IN | 9 hours |
|--------|--|---------|
| | INTERIOR DESIGN | |

Overview of artificial intelligence and its applications in various industries. Introduction to the concept of AI in interior design. Historical context and evolution of AI in interior design. Ethical considerations and challenges in AI adoption in the field.

| Unit:2 | DATA COLLECTION AND ANALYSIS FOR INTERIOR | 9 hours |
|--------|---|---------|
| | DESIGN | |

Data collection methods for interior design projects. Data preprocessing techniques and data cleaning. Exploratory data analysis for interior design. Data visualization tools and techniques. Case studies on real-world applications of data analysis in interior design.

| Unit:3 | MACHINE LEARNING FOR INTERIOR DESIGN | 9 hours |
|--------|--------------------------------------|---------|
| | | |

Introduction to machine learning and its relevance in interior design. Supervised, unsupervised and reinforcement learning algorithms. Feature engineering and selection for interior design datasets. Training and evaluation of machine learning models for interior design tasks. Practical applications of machine learning in space planning, material selection, and color schemes.

Unit:4 COMPUTER VISION AND IMAGE PROCESSING FOR INTERIOR DESIGN 9 hours

Fundamentals of computer vision and image processing. Image acquisition techniques for interior design projects. Image enhancement and restoration for better visualization. Object detection and recognition for furniture and decor elements. Augmented reality (AR) and virtual reality (VR) applications in interior design.

Unit:5 NATURAL LANGUAGE PROCESSING AND 9 hours INTELLIGENT ASSISTANTS IN INTERIOR DESIGN

Introduction to natural language processing (NLP) and its applications. Sentiment analysis and opinion mining for customer feedback analysis. Chatbots and virtual assistants for interior design consultations. Voice recognition and synthesis for smart homes and intelligent spaces. Future trends and advancements in AI for interior design.
