Program Specific Outcomes (PSOs)							
After the successful completion of <b>M.Sc. Clinical Psychology</b> program, the students are expected to							
PSO1	PSO1 Understand the fields of Clinical Psychology and the research specific areas						
PSO2	Understand the principles of Clinical psychology and its application in Clinical field						
PSO3	Learn the concepts which form a catalyst to behavior						
PSO4	Developing methods to write case analysis and assessment using psychological tests/instruments						
PSO5	To develop graduates into self-reliant individuals, with social responsibility and civic virtues.						

	Program Outcomes (POs)
	On successful completion of the M. Sc. Clinical Psychology program
PO1	Overall knowledge and capabilities of the discipline including knowledge of psychologicalprinciple, theories of individualand systemic functioning and change, maladaptive and dysfunctional behavior, psychopathy, cultural and ethnics bases of behavior.
PO2	The ethical, legal and professional aspects of psychological practice.
PO3	Design solution for human problems with appropriate consideration for the public health and safety, and the cultural, societal and the environmental considerations.
PO4	Activities that promote, restore, sustain and enhance cognitive functioning and a sense of well-being in individuals or groups of clients through preventive, developmental or remedial services and / or in the case of groups or organizations, restoring or enhancing group or organizational functioning.
PO5	Understand the impact of Psychology in societal and environmental contexts, and demonstrate the knowledge and need for sustainable development
PO6	Choose suitable job position and apply learnt theoretical knowledge into practice
PO7	Skills in self-assessment, reflective thinking and self-awareness; placing great importance on their personal and professional integrity, and on the willingness to explore, experiment and learn from mistakes.
PO8	Equipped to be active, well-informed citizens who make substantial contributions to society and have the potential to become leaders in their professions and communities.
PO9	Develop innovative ideas to solve problems and make right decision with respect to profession-based complexities.
PO10	Maintain and practice professionalism and decorum in engaging any profession

	Program Educational Objectives (PEOs)							
The M. S	The M. Sc. Clinical Psychology program describe accomplishments that graduates are							
	expected to attain within five to seven years after graduation							
PEO1 To prepare students to excel in Post graduate Programs and to succeed in field of Clinic.								
PEO2	To provide students with a solid foundation in clinical psychology and help them in gaining skills in the clinical areas of psychology and also to pursue higher studies.							
PEO3	To provide students with the foundation in clinical skill development required to develop intervention strategies for behavior change							
	To enable graduates to be globally competent entrepreneurs and professionals,							
PEO4	pursue higher studies or engage in research.							
PEO5	To provide the student with an academic environment aware of excellence, outstanding leadership, written ethical codes and guidelines with moral values, and the life-long learning needed for a successful career.							

Course code	BIOLOGICAL BASES OF BEHAVIOR	L	T	P	С
Core I	Basic understanding of behavior	5	-	-	4
Pre-requisite	Syllabus Version		2	2025-20	)26

The main objectives of this course are to:

- 1. To enable students to understand the basics of behavior.
- 2. To help students analyze and identify the sensation, perception and memory.
- 3. To enable students to understand the thinking & language, intelligence & creativity.
- 4. To understand the concepts of motivation and emotion.
- 5. To help students to analyzing the personality theories and assessment.

Exp	ected Course Outcomes:					
On the successful com	pletion of the course, students will be able to:					
1 To enable the understanding of b	piological basis of behavior.	K1				
2 To understand the basic motives	& emotions which influences the behavior	K2				
3 To familiarize with learning prin	ciple, intelligence and creativity.	K3				
4 To enhance the knowledge of the	eoretical perspective of behavior.	K4				
5 To familiarize the perspectives v	which influence the behavior.	K4				
<b>K1</b> - Remember; <b>K2</b> - Understand; <b>K3</b> - Apply; <b>K4</b> - Analyze; <b>K5</b> - Evaluate; <b>K6</b> – Create						
Unit I Definition and bases of human behavior 12 hours						

**Definition of psychology**. Types of Psychological Research. Contemporary approaches to Psychology. Scope of Psychology.

**Biological bases of Human Behavior**: Nervous system. Neurons. Structures and Functions of the Brain. Endocrine system. Genetic and Evolutionary Blue print of Behavior.

#### Unit II Sensation & Perception, Learning & Memory

12 hours

Sensation: Visual system: Vision & Color Vision. Auditory system and other Senses.

**Perception:** Constancy Phenomena, Loss of organization, Types of Perception-Form, Depth,

Movement. Illusions- Types of Illusion. Extrasensory Perception.

Learning: Nature of learning-Classical Conditioning-Operant conditioning-

Observational Learning-Cognitive factors and Learning.

Memory: Nature of Memory-Memory Coding, Memory Storage-Memory Retrieve- Forgetting.

#### Unit III | Thinking & Language, Intelligence & Creativity

12 hours

**Thinking:** Concept Formation- Problem solving- Critical Thinking- Reasoning-Decision Making.

Language: Language and Cognition- Language Acquisition- Language Development.

**Intelligence:** Theories on Intelligence-Assessment-Extremes of Intelligence-Influences on Intelligence.

**Creativity:** Nature of Creativity-Steps in creativity Process Characteristics of Creative

thinkers

Course code	ADVANCE PSYCHOPATHOLOGY - I	L	T	P	С
Core II	Basics in Psychopathology	5	-	-	4
Pre-requisite	Syllabus Version		2	2025-20	)26

The main objectives of this course are to:

- 1. To teach the factors which triggers psychopathology
- 2. To understand the role of stress in psychopathology
- 3. To evaluate the level of psychological illness.
- 4. To understand how preoccupied thoughts about body leads to psychopathology
- 5. To describe how people's psychological distress led to eating disorder

# Expected Course Outcomes: On the successful completion of the course, students will be able to: Understand the biological, behavioral, cognitive and social determinants of psychopathology Demonstrate advanced Psychiatric assessment.

Demonstrate advanced Psychiatric assessment. K2

Evaluate the level of stress which influences psychological well-being. K3

Create a psychological wellbeing society. K4

Apply various treatment to psychotic disorders. K4

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 – Create

#### Unit I Introduction to Psychiatry 12 h

**Diagnosis and Classification in Psychiatry**: Definition, Normal Mental Health, Classification in Psychiatry, Multi Axial Classification, Psychiatric History and Examination: Identification Data, Chief Complaints, History of Present Illness, Past Psychiatric and Medical History, Treatment History, Family History, Personal and Social History, Alcohol and Substance History, Physical Examination, Mental Status Examination.

#### Unit II Assessments in Psychiatry

12 hours

**K**1

**Clinical Assessment:** Basic Elements in Assessment, Assessment of the Physical Organism, Psychosocial Assessment, The Integration of Assessment Data, Classifying Abnormal Behavior, The Interview, Intelligence Tests, Neuropsychological Tests, Personality Assessment, Behavioral Assessment, Cognitive Assessment, Relational Assessment, Bodily Assessment. Case Studies of Assessments.

Unit III Stress 12 hours

**Definition** - Criteria for DSM-V and ICD-10. EffectsofSevere Stress. Stress and Coping Skills, Biological and Psychological Effects of Stress, Effects of Long-Term Stress. Post-Traumatic **Stress Disorder:** Reactions to Catastrophic Events. Prevalence of PTSD. Case Studies. Prevention and Treatment of Stress Disorders, Challenges in Treating Stress Disorders.

Course code	PERSONALITY THEORIES	L	T	P	C
Core IV	Basics of personality theories	5	•		4
Pre-requisite	Syllabus Version			2025-20	026

The main objectives of this course are to:

- 1. To understand the personality concepts & assessment.
- 2. To explain dispositional & biological domain.
- 3. To identify the Intrapsychic domain in personality.
- 4. To explain cognitive & experimental domain and sociocultural domain which shapes personality.
- 5. To discuss the eastern approaches of personality.

#### **Expected Course Outcomes:**

	On the successful completion of the course, students will be able to:	
1	Understand the concept of self and personality. Critically examine the	K1, K2,
	psychoanalysis theories of personality	K3, K4,K5
2	Summarize the life span and trait perspective of Personality.	K1, K2,
		K3, K5,K6
3	Understand the concepts of self, using humanistic and cognitive approaches	K1, K2,
		K3, K5,K6
4	Evaluate the various theories and techniques in behavioral theories.	K1, K2,
		K3, K5,K6
5	Critically examine the major theories and findings of the field of personality	K1, K2,

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit I Personality: Concept and Assessment 12 hours

Three levels of Personality Analysis: Human Nature, Individual and Group Differences, Individual Uniqueness. A fissure in the field – Grand theories of Personality, Contemporary Research in Personality. Six Domains of Knowledge about Human Nature: Dispositional Domain, Biological Domain, Intrapsychic Domain, Cognitive-Experiential Domain, Social and Cultural Domain, Adjustment Domain. The role of personality theory. Standards for evaluating personality theory. Sources of Personality Data: Self-Report Data (S- Data), Observer-Report Data (O-Data), Test-Data (T-Data), Life-Outcome Data (L-Data). Issues in Personality Assessment. Evaluation of Personality Measures: Reliability, Validity, Generalizability. Research Design: Experimental Methods, Correlational Studies, Case Studies.

#### Unit II Dispositional Domain and Biological Domain

12 hours

K3, K5, K6

What is a Trait? **Two Basic Formulations**. **Identification of the Most Important Traits**: Lexical Approach, Statistical Approach, Theoretical Approach. **Taxonomies of Personality** - Eysenck's Hierarchical Model of Personality, Cattell's Taxonomy: The 16 Personality Factor System, Five-Factor Model.

Sheldon's Physiological Approach to Personality. Physiological Measures Commonly Used in Personality Research: Electrodermal Activity (Skin Conductance), Cardiovascular Activity, Brain Activity, Other Measures. Physiologically Based Dimensions of Personality: Extraversion-Introversion, Sensitivity to Reward and Punishment, Sensation Seeking, Neurotransmitters and Personality, Morningness - Eveningness, Brain Asymmetry and Affective Style.

#### **Unit III** | The Intrapsychic Domain

psychology

12 hours

Psychoanalytic Approaches to Personality: Fundamental Assumptions of Psychoanalytic

Theory. Sigmund Freud: Structure of Personality, Dynamics of Personality, Psychosexual Stages of Personality Development, Personality and Psychoanalysis. Carl Jung: Analytical Psychology. Alfred Adler: Individual Psychology. **Psychoanalytic Approach – Contemporary Issues**: The Neo-Analytic Movement, Ego Psychology, Object Relations Theory.

**Motives and Personality**: Basic Concepts – Need and Press. Apperception and the TAT. The Big Three Motives – Achievement, Power, Intimacy. Humanistic Tradition: Maslow and Roger's Contribution.

12 hours

# Unit IV Cognitive/Experiential Domain and Social and Cultural Domain

Personality revealed through Perception- Field dependence. Personality revealed through Interpretation - Kelly's Personal Construct Theory, Locus of Control, Learned Helplessness. Personality revealed through Goals - Personal Projects Analysis - Life Tasks, Goals, and Strategies. Approaches to the Self: Descriptive Component of the Self-Self Concept. Evaluative Component of the Self-Self-Esteem. Social Component of the Self: Social Identity. Social Domain - Sex, Gender and Personality: Science and Politics of Studying Sex and Gender, Gender Differences in Personality, Masculinity, Femininity and Androgyny, and sex roles, Theor ies of Sex Differences. Cultural Domain - Cultural violation, Cult ural Personality Psychology, Three Major Approaches to culture: Evoked Culture, Transmitted Culture, Cultural universal.

#### Unit V Facets of Personality and Eastern Approaches to Personality 10 hours

Skinner: Operant Conditioning. Albert Bandura: Observational Learning. Martin E. P. Seligman: Learned Helplessness and the Optimistic/ Pessimistic Explanatory Style. Yoga and the Hindu Tradition — Major concepts, Dynamics and Structure. Zen and the Buddhist Tradition — Major Concepts, Dynamics and Structure. Sufism and the Islamic Tradition — Major Concepts, Dynamics and Structure. Integral Psychology — Basic Concepts and Model of Being. Probabilistic Orientation — Basic Postulate and Seven Factors.

Course code	COGNITIVE PSYCHOLOGY	${f L}$	T	P	C					
Core XV Basics of cognition 5										
Pre-requisite Syllabus Version 2025-202										
	Course Objectives:									
	The main objectives of this course are to:									
1. Unde	rstand the mental processes and their relationship to Brain, M	lind ar	nd beh	avior.						
2. Reco	gnize the higher mental processes and their relevance in daily	living	<b>g</b> .							
3. Relat	e the concepts of language and problem solving and creativity	y in ev	eryda	y life						
4. Unde	rstand memory structure and process and its relation to neuro	cogni	tion							
5. Unde	rstand the Neurophysiological sensing techniques and their ap	pplica	tions							
	Expected Course Outcomes:									
	On the successful completion of the course, students will	be abl	e to:							
1 Remen	ber the theoretical approaches of cognitive neurosciences				K1					
2 Apply	he various concepts of attention and memory				K					
3 Describe the process, acquisition of language and development										
4 Analyze the aspects of problem-solving and decision-making										
5 Assess the structures, approaches of intelligence and strategies to improve										
intellig		-

Course code	EXPERIMENTAL PSYCHOLOGY-I	L	T	P	C
Core VI	Basic psychological assessments	5	-	-	4
Pre-requisite	Syllabus Version			2025-	2026

The main objectives of this course are to:

- 1. To realize the importance and utility of the methodology and statistics in psychology.
- 2. To learn the strategy to interpret the results of the factors/variables
- 3. To draw a meaningful conclusion based on the assessment results and data
- 4. To write clear, cogent summaries and interpretations.
- 5. To enhance skills to conduct psychological test

Expected Course Outcomes:							
On the successful completion of the course, students will be able to:							
1 Understand and learn the administration, scoring and report writing for the	K4, K5,						
psychological tests.							
2 Assess the level of severity through using rating scales related to	K4, K5						
psychological processes.							
3 Effectively Interpret the results and generate report.							
<b>K1</b> - Remember; <b>K2</b> - Understand; <b>K3</b> - Apply; <b>K4</b> - Analyze; <b>K5</b> - Evaluate; <b>K6</b> - Create

Course code	CLINICAL NEUROPSYCHOLOGY	L	T	P	C
Core VIII	Basics of neuropsychology	5	-	-	4
Pre-requisite	Syllabus Version			2025-2	026

The main objectives of this course are to:

- 1. To understand the history of neuropsychology.
- 2. To explain the structural element of neuropsychology.
- 3. To understand the neuropsychological disorders.
- 4. To explain cerebrovascular disorder.
- 5. To identity the intervention & management of impairment.

#### **Expected Course Outcomes:**

	Expected Source Stateonics.	
	On the successful completion of the course, students will be able to:	
1	Understand the meaning, history of neuropsychology, basic parts of the brain and their function and the various neurological disorders	K1, K2
2	Explain the anatomical parts of the frontal lobe and temporal lobe and their dysfunction like cognitive changes, personality change aphasias and amnesias	K1,K2, K3, K4
3	Discuss the anatomical parts of the parietal lobe and the dysfunctions like somatic sensory disorders, apraxia and spatial neglect	K1, K2, K3, K4
4	Analyze the anatomical parts of the occipital lobe and the dysfunctions like cerebral blindness and visual agnosia and neurological basis of learning disability, cerebral palsy, autism and other disorders	K1,K2, K3, K4
5	Understand the method uses of neurophysiological assessments like CT scan, MRI and EEG and the method and uses of neuropsychological assessment like BGT, LNNB, HRB and other tests	K1,K2, K3, K4

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit I History of Neuropsychology 12 hours

History, Origin - Development of Neuropsychological Assessment - Qualitative and Quantitative Perspectives of neuropsychological assessment - Basic Anatomy, Elements of Neurology, Methods of study -of Research in Neuropsychology -Anatomical Methods,

Degeneration Techniques, Lesion Techniques, **Chemical Methods**, Stereotaxic Surgery, Micro-Electrode Studies, Oscilloscope, Polygraph, Scanning Methods and Ethical Issues in Research Recent Trends in Neuropsychological Assessment.

#### Unit II Structural Elements of Neuropsychology

12 hours

**Major Structures and Functions**, Spinal Cord, Brain: Forebrain, Midbrain, Hindbrain, Cerebral Cortex, Temporal, Parietal and Occipital- Lobes; Prefrontal Cortex - Central Nervous System Peripheral Nervous System - Neural Transmission and its Perspectives Lobe Syndromes.

#### **Unit III** Neuropsychological Disorders

12 hours

**Neuro Developmental Disorders**- Autism, ADHD, Intellectual Disability, Down's Syndrome, Rhett's Syndrome, Fragile X, Cerebral Palsy, Meningitis and Related Disorders. Adult Neuropsychological Disorders - Schizophrenia, Substance Abuse Disorders, Major Affective Disorders and Anxiety disorders, PTSD.

#### Unit IV | Cerebrovascular Disorders

12 hours

Traumatic Brain Injury, Infections, Epileptic Seizure Disorder, Dementia, Delirium,

Alzheimer's Disease, Parkinson's Disorder, Metabolic Disorders, Autoimmune Disorders, Pain Disorders, Amnesia and its types, Multiple Sclerosis, Neurological Impairment Unit V **Intervention and Management** 10 hours Medical Interventions, Therapeutic Interventions, Life Style Modifications, Coping with the Management of Impairment, Overall Health Models, Rehabilitation Neuropsychological Disorders. Unit VI Contemporary Issues 2 hours Expert lectures, online seminars – webinars **Total Lecture hours** 60 hours Reference books 1 Morgan, J. E. & Ricker, J. H. (2018). Course code	ADVANCE PSYCHOPATHOLOGY – II	L	T	P	C
Core VII	Basics of psychopathology	5		-	4
Pre-requisite	Syllabus Version			2025-20	026

The main objectives of this course are to:

- 1. To understand the contribution of psychological, biological, and sociocultural factors.
- 2. To integrate theoretical and empirical research findings in understating mental disorders.
- 3. To describe the etiology and treatment of psychological disorders.
- 4. Understand the use of diagnostic tools, including the DSM and ICD.
- 5. Learn multiple perspectives in evaluating and interpreting mental disorders.

#### **Expected Course Outcomes:**

	On the successful completion of the course, students will be able to:							
1	Understand the major psychological disorders and be able to identify them as per the diagnostic manual.	K2,						
2	To analysis the role of neurobiology, psychological, and social context in the evaluation of mental disorders.	K4						
3	Apply the contemporary theories and research related to the causes and treatments of psychological disorders.	K3						
4	Apply the principles of diagnosis and treatment to a case study.	K3						
5	Remember the ethical and legal issues relevant to the provision of mental health services.	K1						

#### K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 – Create

#### Unit I Sexual Variant Disorders

12 hours

**Views of Sexual Behavior**. Sexual Dysfunction. Criteria of DSM - IV and V. Dysfunctions of Sexual Desire, Sexual Arousal, Orgasmic Disorders, Dysfunctions involving Sexual Pain. Sexual and Gender Variants. Paraphilias. Sexual Victimization. Sexual Abuse. Child Sexual Abuse. Pedophilia. Incest. Rape.

#### **Unit II** Substance Related Disorders

12 hours

**Alcohol Abuse and Dependence** - Criteria of DSM - IV and V. Prevalence. Comorbidity and Demographics. Acute Intoxication. Withdrawal State. Drug Abuse and Dependence. Other Drugs.

#### **Unit III** | Schizophrenia and Other Psychotic Disorders

12 hours

**Schizophrenia** - Criteria of DSM - IV and V. Etiology. Schizophrenic Spectrum Disorders Paranoid Disorganized, Catatonic, Undifferentiated, Residual Type, Other Psychotic Disorders. Clinical Picture in Schizophrenia: Delusion, Hallucination, Disorganized Speech,

#### Disorganized and Catatonic Behavior, Negative Symptoms.

#### **Unit IV** | Cognitive Disorders

12 hours

**The Brain:** An Interactional Perspective, Vulnerability to Brain Disorders, **Assessing Brain Damage:** Delirium, Dementia, Alzheimer's Disease, Pick's Disease, Huntington's Disease, **Parkinson Disease. Brain Trauma:** Injuries, Tumors and Infections. Amnestic Disorders. Criteria of DSM-IV and V. Cognitive Impairment Disorders: Cerebrovascular Disorder, Vascular Dementia, Korsakoffis Syndrome, Epilepsy.

#### Unit V Personality, Anxiety and Mood Disorders

10 hours

Criteria of DSM-IV and V. Clinical Features of Personality, Difficulties doing Research on

Personality Disorder, Categories of Personality Disorders, Treatments and Outcomes. Panic Anxiety and' Other Disorders, Prevalence, Gender and Age of Onset and Comorbidity. Generalized Anxiety Disorder, Prevalence, Gender and Age of Onset and Comorbidity. Obsessive Compulsive Disorder, Prevalence, Gender and Age of Onset and Comorbidity. Mood Disorders, Treatments and Outcomes.

Course code	RESEARCH METHODS – I (QUANTITATIVE)	L	T	P	С
Core IX	Basic statistics	5	-	-	4
Pre-requisite	Syllabus Version			2025-2	026

The main objectives of this course are to:

- 1. To explain the Foundation of quantitative research methods in psychology.
- 2. To understand the process of quantitative research.
- 3. To discuss the sampling techniques & data collection methods.
- 4. To draw the experimental design in psychology.
- 5. To develop tests and standardizing them.

#### **Expected Course Outcomes:**

	<b>^</b>	
	On the successful completion of the course, students will be able t	0:
1	Understand philosophical foundations and scientific basis of quantitative research.	K1, K2
2	Demonstrate knowledge of the different steps in quantitative research.	K1, K2,K3,
3	Analyze and apply various sampling techniques and methods of data collection	K1, K2, K3, K4
4	Understand and evaluate the different experimental designs.	K1, K2,K3, K4,k5
5	Develop tools and construct scales	K1, K2, K3, K4k5,k6

# K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create Unit I Foundations of Quantitative Research Methods in Psychology 12 hours

**Definition**- History of scientific research in psychology- Purpose and need of psychological research- Method of Acquiring Knowledge: Tenacity- Intuition- Authority- Rationalism-Empiricism- Types of Quantitative research: Descriptive- Correlational- Exploratory-Experimental- Ethical issues in Psychological Research. Research lab (5 Hours)

- 1) Literature Search- Exposure to various e-resources
- 2) Review of research article
- 3) Data Collection Procedure- Google forms and other methods.

#### **Unit II** Process of Quantitative Research

12 hours

**The steps of scientific method**- The steps of Research Process- From finding a research idea to report writing- Conceptualization- Operationalization and Measurement- Causality and Experimentation; **Variable:** Definition- Nature- Types- Hypotheses; Types- Criteria for Good Hypotheses- Formulation of Hypotheses- Experimental manipulation and control of variable. Research lab (5 Hours)

- 1) Formulation of research problem and hypothesis
- 2) Introduction to SPSS- Install- Open file
- 3) Data view and Variable view: Data coding

#### **Unit III** | Sampling Techniques and Data Collection

12 hours

**Population:** Meaning - Types - Samples - Kinds of Samples - Determination of Sample Size-Sampling Distribution- Sampling Techniques: Probability and Non- Probability sampling-Methods of data collection: Observational methods, Survey, Questionnaires, Interviewing method, Case study methods and Psychometric tests. Research lab (5 Hours)

- 1) SPSS-Diagrammatic representation: Bar chart and Pie chart
- 2) SPSS- Demographic data analysis
- 3) SPSS-Tests of Normality: Kolmogorov-Smirnov & Shapiro-Wilk

#### Unit IV | Experimental Designs in Psychology

12 hours

**Adequate vs Inadequate (faulty) research design**- Types of Experimental design based on subjects and factors- Within-subjects- between subjects- single-subject- single- factor and factorial design- Sources of error variance and its management in the various types of experimental designs; Mixed design. **Non-Experimental Designs:** Relational – Comparative – Cross Sectional/ Cultural – Longitudinal.

Research lab (5 Hours)

- 1) SPSS-t-test: Independent sample & Paired sample
- 2) SPSS- ANOVA & Post-hoc Test
- 3) SPSS- Pearson & Spearman Correlation.

#### **Unit V** Test development and standardization

Coursedesigned by: Ms.Hema.D.Rajendran

10 hours

**Scaling Techniques:** Meaning — Classification of tests — Steps in test construction — Item evaluation procedure — **Reliability:** Meaning — Methods — **Validity:** Meaning — Types — **Norms:** Meaning — Development of Norms; Steps — Types; Age Equivalent Norm — Grade Equivalent Norm — Percentile Norm — Standard Score Norm — Stanine — Sten.

Research lab (5 Hours)

1) SPSS- Factor analysis.

## **Course Objectives:**

The main objectives of this course are to:

- 1. To understand the qualitative research foundations.
- 2. To recognize the qualitative research process.
- 3. To explain the methods of collecting qualitative data.
- 4. To understand the qualitative analysis of data.
- 5. To explain the mixed research designs.

	<b>Expected Course Outcomes:</b>								
	On the successful completion of the course, students will be able to:								
1	Understand the philosophical foundation and basic concepts of	K1, K2							
	qualitative research								
2	Gain familiarity with different qualitative research designs	K1, K2, K3							
3	Demonstrate skills on various data collection methods.	K1, K2, K3, K4, K5							
4	Evaluate and apply different traditions of qualitative data analysis.	K1, K2, K3, K4, K5							
		K1, K2, K3, K4, K5							
5	Executing mixed research design.	K1, K2, K3, K4,							
	-	K5,K6							

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit I Foundations of Qualitative Research 12 hours

**Defining qualitative research**; Historical development of qualitative research; Keyphilosophical and methodological issues in qualitative research; Different traditions of qualitative research; Grounded theory, Narrative approach, Ethnography, Action research and Discourse analysis. Research Lab (5 hours)

- 1) Review of different article related to the different traditions of qualitative research
- 2) Skill training seminars

#### **Unit II** The Qualitative Research Process

12 hours

Conceptualization of problem in qualitative research, the logic of qualitative research process, Conceptual Mapping, Sampling in qualitative research, designing samples, Theoretical sampling, Contrasting qualitative with quantitative approach in research process Issues of Credibility and trustworthiness

Research Lab (5 hours)

1) Qualitative research proposal lab 2) Simulated techniques on designing qualitative research

### **Unit III** | Methods of Collecting Qualitative Data

12 hours

What is qualitative data? Various methods of collecting qualitative data: participant observation, interviewing, focus groups, life history and oral history, documents, diaries, photographs, films and videos, conversation, text and case studies. (8 hours) Research Lab (3 hours)

1) Qualitative data analysis software NVivo 2) Reporting qualitative research data

### **Unit IV** | **Analysing Qualitative Data**

12 hours

Transcription and data management process, Data analysis in different tradition; Qualitative

Content Analysis-Thematic analysis: Analytical induction model, thematic network model-**Phenomenological analysis:** Traditions in interpretative phenomenological analysis-Narrative analysis; thematic, structural and performative narrative analysis. Discourse and conversational analysis

Research Lab (5 hours)

1) Qualitative data analysis software NVivo 2) Reporting qualitative research data

# **Unit V** Mixed Research Designs

10 hours

**Mixed methods approach to research**: principles and decisions. Classification of mixed designs for social and behavioral research: multi strand designs, concurrent mixed designs, sequential mixed designs, multi strand conversion mixed designs, fully integrated mixed design model. Research Lab (5 hours)

1) Qualitative data analysis software NVivo 2) Reporting qualitative research data

#### Unit VI **Contemporary Issues** 2 hours Expert lectures, online seminars – webinars **Total Lecture hours** 60 hours Reference books 1 Creswell, J.W., & Poth, C.N. (2017). Qualitative inquiryand research design: Choosing among five approached. Los Angeles, CA: Sage. 2 Ritchi, J., Lewis, J., McNaughton Nicholls, C., & Ormston, R. Core XVIII	Basic psychological rotation	5		-	4
Pre-requisite	Syllabus Version			2025-2	026

# **Course Objectives:**

The main objectives of this course are to:

- 1. Remember the basic therapeutic skills engage in brief sessional work with client.
- 2. Understand the interviewing, assessments & diagnostic skills in the clinical field.
- 3. Create a future clinician.

<b>Expected Course Outcomes:</b>								
On the successful completion of the course, students will be able to:								
1 Demonstrate skill in arriving at provisional and differential diagnose	K1 K2							
2 Applythe theoretical knowledge and practical skills	K3 K4							
3 Become more self-aware in terms of their therapeutic skills or blindspots.	K3 K4							
4 Provide a detailed Psychotherapeutic formulation	K5 K6							
<b>K1</b> - Remember; <b>K2</b> - Understand; <b>K3</b> - Apply; <b>K4</b> - Analyze; <b>K5</b> - Evaluate	; <b>K6</b> – Create							
Unit I Field work	60 hours							

### PART – A:

The students shall learn and demonstrate the following (Professional skills)

- 1. Basic therapeutic skills to engage in brief sessional work with clients.
- 2. Interviewing skills.
- 3. Basic assessment skills
- 4. Basic diagnostic skills.
- 5. Personal development as (future) clinicians

#### PART-B:

The students are expected to submit a brief internship report, a reflective essay, and an authorized internship-completion statement from their internship site which will be evaluated

- 1. Clinical assessment
- 2. Conceptualization
- 3. Intervention in a mental health institute.

Course code	PSYCHOLOGICAL ASSESSMENT AND DIAGNOSTICS	L	Т	P	С
Core XVI	Basics of psychological diagnosis	5	-	-	4
Pre-requisite	Syllabus Version			2025-2	026

### **Course Objectives:**

The main objectives of this course are to:

- 1. Understand the classification & rating scales.
- 2. Understand the clinical examination of the patient.
- 3. Remember the signs & symptoms during assessments.
- 4. Discuss about assessment, psychological testing & personality assessments.
- 5. Understand intelligence & neuropsychological assessments & ethics in clinical setting.

# **Expected Course Outcomes:**

	=Pooton contract contract	
	On the successful completion of the course, students will be able to:	
1	Understand the foundation and basic principles of psychological assessment and	K2
	statistics	
2	Evaluate the methods of analysis	K5
3	Analyse development and administration of the tests.	K4
4	Critically evaluate the various assessments	K5
5	Examine the current issues and future direction of psychological assessments	K4

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

### **Unit I** Classification and Rating Scales

12 hours

Classification: History - Current Classification Systems. Reliability of Present Psychiatric Classification. Advantages - Disadvantages. ICD-10 - History of Development. Features of ICD-10. Classification of Mental and Behavioral Disorders. DSM-5 - History - Features - Diagnostic Categories. Brief Instruments for Treatment Planning, Monitoring and Outcome Assessment: Symptom Checklist-90-R, Brief Symptom Inventory (BSI), The Beck Depression Inventory, State Trait Anxiety Inventory. Psychiatric Rating Scales: Characteristics -Some Rating Scales- Brief Psychiatric Rating Scale, Hamilton Anxiety Rating Scale, Hamilton Rating Scale for Depression, Yale-Brown Obsessive-Compulsive Scale, Scale for Assessment of Negative Symptoms, Social and Occupational Functioning Assessment Scale, Global Assessment of Relational Functioning.

# **Unit II** Clinical Examination of the Patient

12 hours

**Basics of Interviewing**. Rapport, Transference and Counter Transference. Specific Interview Techniques - Types of Questions, Reflection, Facilitation, Silence, Confrontation, Clarification, Interpretation, Summation, Explanation, Transition, Self-Revelation, Positive Reinforcement Reassurance, Advice. Interviewing Psychotic Patients. Factors of Compliance. Burnout. Specific Issues: Fees, Confidentiality, Supervision, Missed Appointment and Length of Sessions, Arrangement of Seating and Office, Notes Taking, Follow-up Interviews. Interviewing Variations - Depressed Patients, Aggressive Patients, Interview of Relatives.

**The Case History:** Objective of Case History. Identifying Data, Chief Complaints, History of Present Illness, Past Illness, Personal History (Anamnesis) - Prenatal and Perinatal, Early Childhood, Middle Childhood, Late Childhood, Adulthood, Sexual History, Family History, Fantasy and Dreams. Mental Status Examination: General Description, Mood and Affectivity, Speech Characteristics, Perception, Thought Content and Mental Trends, Mini Mental Status Examination (MMSE), Sensorium and Cognition, Impulsivity, Judgment and Insight, Reliability.

## **Unit III** | **Signs and Symptoms**

12 hours

**Definition of Signs and Symptoms** -. **Consciousness** - Disturbances in Consciousness, Disturbance in Attention, Disturbance in Suggestibility. **Emotions** - Mood, Affect, Other Emotions, Physiological Disturbances associated with Mood. **Disturbances in Motor Behavior** (**conation**). **Thinking** - General Disturbance in Form or Process of Thinking, Specific Disturbances in Form of Thought, Specific Disturbance in Content of Thought.

**Speech** – Disturbance in Speech, Aphasic Disturbance. **Perception** – Disturbances of Perception, Disturbances associated with Cognitive Disorder and Medical Conditions, Disturbances associated with Conversion and Dissociative Phenomena. **Memory** – Disturbance of Memory, Levels of Memory.

**Intelligence** – Information and Vocabulary, Abstraction. **Insight** – Complete Denial (Grade 1) to True Emotional Insight (Grade 6). **Judgment** - Critical Judgment, Automatic Judgment, Impaired Judgment

# Unit IV Assessment, Examination, Psychological Testing in Child Cases and Personality Assessment 12 hours

**Assessment, Examination and Psychological Testing in Child Psychiatry**: Clinical Interviews. Structured and Semi Structured Interviews. Rating Scales. Child Psychiatric Evaluation. Mental Status Examination for Children. Neuropsychiatric Assessment. Behavioral Indexes of Brain Damage in Children. Developmental, Psychological and Educational Testing.

**Self-Report Personality Inventories**: MMPI – MCMI - CPI. **Projective Techniques**: Nature of Projective Techniques. Classification of Projective Tests. Thematic Apperception Test – Administration, Scoring and Interpretation. Rorschach – Administration, Scoring, Structural Summary and Interpretation. Evaluation of Projective Techniques.

# Unit V Intelligence and Neuropsychological Assessment, Case Report, Ethics in Clinical Psychology 10 hours

Intelligence Testing: Standford-Binet Intelligence Scale – Wechsler Intelligence Scales.

Neuropsychological Testing: Assessment of Reasoning, Concept Formation and Problem Solving, Memory, Orientation, Perceptual and Psychomotor Performance, Language, Attention and Concentration. Neuropsychological Test Batteries: Luria-Nebraska Neuropsychological Test Battery – Halstead Reitan Battery of Neuropsychological Testing. Cognitive Screening Tools and Neuropsychological Tests in India. Case Report: Case History - Report on MSE - Further Diagnostic Studies – Summary of Findings – Diagnosis – Prognosis – Psychodynamic Formulation and Defense Mechanisms – Treatment Plan. Ethics in Clinical Psychology: Utilitarian Theory. Autonomy Theory. Ethical Principles: Justice and Respect, Patient Therapist Sexual Relations, Informed Consent, Surrogate Decision Making, Involuntary Treatment, Confidentiality.
